Rosemount 2240S Multi-input Temperature Transmitter
for tank gauging systems

- Get ultra-stable temperature measurement for precise inventory calculations and custody transfer for API chapter 7.3 compliance
- Obtain outstanding temperature conversion accuracy of ±0.05 °C (±0.09 °F)
- Connect up to 16 three- or four-wire temperature elements
- Include integrated water level sensor
- Benefit from convenient and safe installation with 2-wire IS bus power supply
Rosemount 2240S Multi-input Temperature Transmitter

The high performance 2240S Multi-input Temperature Transmitter is approved for demanding custody transfer applications, which require very accurate level and temperature measurements for net standard volume calculations.

2240S can connect up to 16 three or four wire temperature spot elements and an integrated water level sensor. The value from each individual spot temperature element, in combination with the level value from the radar gauge is used for average liquid temperature calculation.

Available temperature sensor versions are:

- Rosemount 565 Multiple Spot Temperature Sensor
- Rosemount 566 Multiple Spot Temperature Sensor for cryogenic applications such as LNG
- Rosemount 765 Multiple Spot Temperature Sensor with Integrated Water Level Sensor

2240S has an ultra high temperature conversion accuracy of ±0.05 °C (±0.09 °F).

The 2240S supplies measured data to the Tankbus, which utilizes the FOUNDATION™ fieldbus communication protocol.

The IP 66/67 and Nema 4X certified robust design makes it suitable for installation in harsh environments. The water level sensor is factory calibrated. If any adjustment is necessary during installation, it can easily be done with the 2240S built-in on-line calibration feature.

---

(1) Temperature sensors of Pt-100 or Cu-90 type, for use in -200 to 250 °C (-328 to 482 °F), can be connected to the Rosemount 2240S.

(2) Water level sensor only requires Number of Temperature Sensor Inputs code 00, Leads per Temperature Element code 0, and Auxiliary Inputs code A.

(3) Approval plate, sealing kit and Eich adapter included. One spot position used for external reference.
   Available spot elements in Number of Temperature Sensor Inputs = 15, 7 or 3.
   Requires Rosemount 2410 Tank Hub with corresponding Custody Transfer Type Approval.
   Requires one out of following displays: 2410 with integral display, Rosemount 2230 with corresponding Custody Transfer Type Approval, or TankMaster.

(4) Min. temperature -20 °C (-4 °F). ATEX / IECEx. Exe approved. Includes 2 plugs, and 3 glands (includes an M32 gland if combined with Mechanical Installation code W or P).

(5) M33x1.5 female threaded connection. As standard, the transmitter is not pre-assembled with any temperature sensor.

(6) For separate installation of temperature sensor and transmitter.
Specifications

Performance specifications

Temperature conversion accuracy
±0.05 °C (±0.09 °F)
Over measuring range and ambient temperature 20 °C (68 °F)

Ambient temperature effect
±0.05 °C (±0.09 °F)

Temperature measuring range
Supports -200 to 250 °C (-328 to 482 °F) for Pt-100

Resolution
± 0.1 °C (± 0.1 °F) according to API chapter 7 and 12

Update time
4 s

General specifications

Number of spot elements and wiring
Up to 16 RTD spot elements or averaging sensors can be connected to a 2240S.

Rosemount temperature / water level sensors (models 565, 566, and 765)
Three wiring types can be used:
- 3-wire RTD with common return (1-16 spot elements)
- 3-wire RTD individual (1-16 spot elements with Rosemount 565, 1-6 spot elements with Rosemount 566, and 1-14 spot elements with Rosemount 765)
- 4-wire RTD individual (1-16 spot elements with Rosemount 565, 1-4 spot elements with Rosemount 566, and 1-10 spot elements with Rosemount 765)

Standard temperature sensor types
Supports Pt-100 (according to IEC/EN60751, ASTM E1137) and Cu-90

Metrology sealing possibility
Yes

Write protect switch
Yes

Configuration specifications

Configuration tool
TankMaster WinSetup is the recommended tool for easy configuration of 2240S. The Tankbus autoconfiguration feature, handled by the Rosemount 2410 Tank Hub, supports 2240S.

Configuration parameters (examples)

Temperature:
- Number of temperature sensor elements
- Temperature element type (spot or average)
- Temperature element position in tank

Water Level Sensor:
- Level offset (difference between tank zero level and water zero level)
- Probe length (autoconfigured by Rosemount 765)

Output variables and units
Spot and average temperature: °C (Celsius), and °F (Fahrenheit)
Free water level (FWL): meter, centimeter, millimeter, feet, or inch

FOUNDATION fieldbus characteristics

Polarity sensitive
No

Quiescent current draw
30 mA

Lift-off minimum voltage
9.0 VDC

Device capacitance / inductance
See “Product Certifications” on page 8

Class (Basic or Link Master)
Link Master (LAS)

Number of available VCRs
Maximum 20, including one fixed

Links
Maximum 40
Minimum slot time / maximum response delay / minimum intermessage delay

8 / 5 / 8

Blocks and Execution time

1 Resource block,
3 Transducer blocks (Temperature, Register, AVG_Temp),
2 Multiple Analog Input (MAI) blocks: 15 ms,
6 Analog Input (AI) blocks: 10 ms,
1 Analog Output (AO) block: 10 ms,
1 Signal Characterizer (SGCR) blocks: 10 ms,
1 Proportional/Integral/Derivate (PID) block: 15 ms,
1 Integrator (INT) block: 10 ms
1 Arithmetic (ARTH) block: 10 ms,
1 Input Selector (ISEL) block: 10 ms
1 Control Selector (CS) block: 10 ms,
1 Output Splitter (OS) block: 10 ms

Instantiation

Yes

Conforming FOUNDATION fieldbus

ITK 5.2

PlantWeb alert support

Yes

Action support wizards

Restart/stop measurement, write protect device, factory reset - measurement configuration, reset statistics, start/stop device simulation

Advanced diagnostics

Failures/Maintenance/Advisory alerts:
Software, memory/database, electronics, internal communication, simulation, auxiliary device, auxiliary device measurement, ambient temperature, average temperature measurement, temperature measurement, configuration

Electrical specifications

Power supply

• FISCO: 9.0-17.5 VDC polarity insensitive
• Entity: 9.0-30.0 VDC polarity insensitive

Internal power consumption

0.5 W

Bus current draw

30 mA

Tankbus cabling

0.5-1.5 mm² (AWG 22-16), twisted shielded pairs

Built-in Tankbus terminator

Yes (to be connected if required)

Tankbus to sensor isolation

Minimum 700 VAC

Auxiliary sensor input

Digital bus connection for water level sensor

Mechanical specifications

Housing material

Polyurethane-coated die-cast aluminum

Cable entry (connection/glands)

Three ½ - 14 NPT entries for cable glands or conduits. Two metal plugs to seal any unused ports are enclosed in the delivery

Optional:
• M20 x 1.5 conduit / cable adapter
• Cable glands in metal (½ - 14 NPT)
• 4-pin male Eurofast connector or A size Mini 4-pin male MiniFast connector

565/566/765 connection

M33 x 1.5 female threaded connection

Optional:
• An M32 adapter or M32 gland can be used if the 2240S is installed away from the sensor

Installation

The 2240S can be installed directly on top of the temperature / water level sensor or remotely installed on a 33.4-60.3 mm (1 to 2-in) pipe or on a wall
Weight
2.8 kg (6.2 lbs)

**Environmental specifications**

**Ambient temperature**

-40 to 70 °C (-40 to 158 °F).
Minimum start-up temperature -50 °C (-58 °F)

**Storage temperature**

-50 to 85 °C (-58 to 185 °F)

**Humidity**

0-100% relative humidity

**Ingress protection**

IP 66 and 67 (Nema 4X)

**Transient / built-in lightning protection**

According to IEC 61000-4-5, level 1 kV line to ground. Complies with IEEE 587 Category B transient protection and IEEE 472 surge protection
**Product Certifications**

**European ATEX Directive information**
EC-Type Examination Certificate Number: FM09ATEX0047X
Control Drawing: 9240 040-976

**Special conditions for safe use (x-marking), ATEX & IECEx:**
Special conditions of use, FM-US & FM-C:

The enclosure contains aluminum and is considered to present a potential risk of ignition by impact or friction. Care must be taken during installation and use to prevent impact or friction.

Rating II 2[1] G Ex ib [ia IIC] IIC T4 Ta= -50 °C to 70 °C FISCO 9240040-976; IP 66/IP 67 is only applicable when supplied from a certified Ex [ib] FISCO Power Supply with triplicated output voltage limitation meeting the requirements for two faults ("ia" voltage limitation) e.g. a Rosemount 2410 Tank Hub.

The Rosemount 2240S Multi-input Temperature Transmitter will not pass the 500 Vrms dielectric strength test and this must be taken into account during installation.
