

# Fisher® Innovation: Internal Valves

Solutions for your demanding applications

Type C804HM32

Types C483 and P723

Type C897

## Industry's First Internal Valve for Y-gas Applications All Stainless Steel Constructions Detachable Nameplates with Individual Serialization Rotary Driven Actuators

### PRODUCT LONGEVITY

- ✓ Rotary eliminates side-load wear for longer valve service life
- ✓ Innovative cam design for maximum service life
- ✓ Increased bleed seal area for maximum product longevity
- ✓ Calibrated stroke design to prevent over-torque actuation

### DURABILITY FOR HARSH APPLICATIONS

- ✓ New packing for cold weather service and enhanced sealing
- ✓ Improved gland packing for service down to -40°F

### EASIER AND SAFER INSTALLATION AND SERVICEABILITY

- ✓ Stud mount bolting for easy actuator installation
- ✓ No pinch point design

Fisher introduced the internal valve in 1959. Since then, Fisher continues to provide innovative solutions to customers.
