

**Your refinery needs to be safe, reliable  
and operate at maximum efficiency.**

**So why settle for control valves that provide anything less.**

To remain competitive, refiners need to achieve new levels of safe, optimum performance especially in key areas. Our unrivalled range of Fisher® valves, including tailor-made severe service valves for critical applications and instrumentation, both wired and wireless, form a key part of the PlantWeb™ digital Smart Refinery from Emerson that is proven the world over. Unplanned situations are minimised, and safety and reliability are built into your operation. Learn more at [www.FisherSevereService.com](http://www.FisherSevereService.com)
