Education in Machinery Health™ Management

Regional Fundamentals of CSI 2140 Course, Course# 2076

Fundamentals of CSI 2140 (CEUs: 1.4)

This 2-day hands-on course focuses on the basic operation of the CSI 2140 Machinery Health Analyzer. Students collect data on lab machines. This course is designed for personnel with little or no experience with CSI analyzers, but who are experienced in the field of vibration data collection and analysis.

Prerequisites:

Understanding of vibration analysis. Familiar with basic vibration collection principles.

Course highlights include:

- Analyzer/computer communication
- Predefined route data collection
- Job data collection and setup
- Manual mode measurements
- Introduction to CSI 2140 Analysis Expert Functions

Date: July 18 to 19, 2017. 8:00 AM to 4:30 PM

Location: John H. Carter Company
