

## FOUNDATION Fieldbus devices available on (Rev AF) System Cards and Resource CD

### Complete FOUNDATION Fieldbus DD Listing (MARCH-2017)

Untested DDs listed are not loaded onto the System Cards at the Factory, but are part of this Resource CD's "PC Database" and can also be downloaded from the internet.

To move the Untested DDs to a System Card of a unit, they must be manually added. See the Programming Utility Help (Manually Add/Remove DDs in a 475 Field Communicator) for further information.

Note: The *Easy Upgrade* feature is required to perform this procedure.
