Education in Machinery Health™ Management

Regional Intermediate AMS Machinery Manager Course #2074

Intermediate AMS Suite: Machinery Health Manager (CEU's: 2.8)

This four-day course teaches some of the more advanced machinery analysis techniques available in AMS Suite Machinery Health Manager Software. This course focuses more on analysis and reporting with the use of the Vibration Analysis module, Reporting module, Exception Analysis, PeakVue™ technology, and a full version of RBMview.

Prerequisites:

Introduction to AMS Machinery Health Manager (course # 2068) plus the Basic Vibration Analysis course or 6 months vibration analysis experience are recommended.

Topics include:

- PeakVue Technology
- Vibration Analysis module
- Reporting module
- Exception Analysis
- Nspectr
- RBMview

This course is based on the current mass release of the AMS Machinery Manager software. Students should call to verify if the course is appropriate to the version they have installed. Advanced vibration analysis, infrared analysis, motor analysis, online machinery monitoring and oil analysis modules are covered in other course offerings and are not part of this course.

Date: September 9 to 12, 2014, 8:00 AM – 4:30 PM Daily

Location: 2728 N. Arnoult Rd. Metairie, LA 70002

Cost: \$2,500 per person.

Registration: Please contact Joyce Barrosse at office: 504-887-8550, fax: 504-887-8723 or e-mail: joyce.barrosse@johnhcarter.com
