Your path to a better bottom line

Emerson has developed Rosemount technologies and products to fill almost every one of your process measurement needs. But Rosemount products are more than the world's most advanced measurement instruments; they enable the implementation of better measurement practices. It is these practices that are allowing plants, mills, and manufacturers around the world to become not only more efficient, but safer.

Pressure Products

Whether your application is critical control, safety or monitoring, there is a Rosemount Pressure Product that best meets your needs. [Learn More](#)

Temperature Products

Whether you require solutions for critical control and safety or monitoring applications, there is a Rosemount Temperature Solution that meets your needs. [Learn More](#)

Level Products

Rosemount level transmitters from Emerson are designed to cut costs and increase safety by giving precise and reliable level data under most process conditions. [Learn More](#)

Flow Products

Emerson Process Management, the undisputed leader of industrial instrumentation, proudly provides the broadest of flow applications. [Learn More](#)

Smart Wireless Products

Emerson Process Management, the undisputed leader of industrial instrumentation, proudly provides the broadest of flow applications. [Learn More](#)

Mass Flowmeter product 1

The first scalable device that provides a foundation for integrated pressure, flow, and level solutions. [Learn More](#)

Mass Flowmeter product 2

The Rosemount 3051 performance specifications guarantee accuracy and stability under the most demanding conditions. [Learn More](#)

Mass Flowmeter product 3

The newest extension to the Rosemount pressure product line. Loaded with the same superior features found in the HART-based 3051. [Learn More](#)

Mass Flowmeter product 4

The state-of-the-art transmitter features unmatched operating performance, a flexible Coplanar platform, and a pathway to the future. [Learn More](#)

Mass Flowmeter product 5

Accurately measures differential pressure, static pressure, and process temperature to dynamically calculate fully compensated mass. [Learn More](#)

ROSEMOUNT

Rosemount 3051S Pressure Transmitter

The Rosemount 3051S is the first scalable device that provides a foundation for integrated pressure, flow, and level solutions. It allows you to customize performance, functionality, diagnostics, and connection systems for your application. No matter what your needs, the 3051S Series enables better measurement practices that result in improved profitability.

There's no better way to prepare for future migration paths than the Rosemount 3051S Series of Instrumentation from Emerson. So you can go wherever you need to – like new process diagnostics or wireless – without having to start over each time. From faster start-ups to increased productivity, the 3051S is uniquely designed to cover both short-term needs and long-term goals
