

LIFECYCLE SERVICES - EDUCATIONAL TRAINING

Targeted training. Real results.

Increase the performance of your plant — and your people

Technology advancements are increasingly changing the way you manage your assets. As you move to smart field instrumentation and wireless solutions to monitor and control your processes, it can be a challenge to ensure your workforce has the proper skills and training to fully harness your evolving technologies. You can equip your team with the knowledge they need while saving time and costs for your business when you draw on training resources and support from Emerson Educational Services.

+ WHAT IF

STAY AHEAD OF THE CURVE ... WHAT IF

your staff could detect and troubleshoot plant performance issues earlier and more efficiently?

With custom training solutions from Emerson Educational Services, your team will gain hands-on experience on state-of-the-art equipment, providing them with the expertise to more efficiently install and maintain your plant instrumentation.

Train your own experts

When your employees participate in our certified courses, they'll gain valuable knowledge of the industry's cutting-edge technologies and best practices. You'll be confident your staff has the expertise to efficiently install, configure, calibrate and maintain your instrumentation, so they can detect and troubleshoot plant performance issues early. With your own experts on staff, you'll be able to achieve greater performance and cost efficiencies to help you extend the lifecycle of your plant.

- + **Learn from the best in the industry** — Your staff will learn from full-time, factory-certified Emerson Service trainers, who can share their unsurpassed knowledge and expertise of instrumentation products and processes.
- + **Gain hands-on experience for more effective learning** — You'll reap more effective training results through true hands-on experiences, including theoretical and practical scenarios taking place on state-of-the-art Emerson Process Management equipment.
- + **Choose the training you want, on your schedule** — Tailor training to your needs. Educational Services offer a variety of hands-on instruction and self-guided materials featuring the latest configuration and software tools. Convenient training schedules give you flexibility so you can avoid business disruptions.
- + **You decide where you take the training** — Conduct your training where it works best for you — at your site, a local Emerson Process Management facility or a local hotel.
- + **Comprehensive curriculum** — Support your staff with a curriculum designed to help them operate, maintain and manage industrial process control devices. Educational Services training programs focus on the latest techniques and standards with options including:
 - Process Measurement Products: Pressure and Temperature, Flow, Level
 - Fieldbus Courses: Instruments, Transmitters, Flowmeters
 - Multi-Variable Transmitters
 - Wireless Self-Organization Network
 - Guided Wave Radar and Non-contacting Radar Instruction
 - AMS Device Manager

Credibility is Part of the Equation

+ STRAIGHT FROM THE CUSTOMER

"We suffered for years from an efficiency standpoint because of inadequate training. Now, these trainees are exposed to everything they will encounter ... They have great credibility with our trainees because they've all worked in the field."

Gene Johnson, Tech Training Coordinator
