

NOTHING TO LOSE... ENERGY TO GAIN

STEAM TRAP MONITORING

improves personnel safety by reducing water hammer incidents, manual rounds and foot traffic in higher risk areas

improves reliability & availability by reducing damage to assets caused by water hammer, impingement, corrosion, or freezing

improves yield, throughput, & product quality by assuring temperature control and optimal transfer of steam enthalpy

reduces steam usage by 5-10% amounting to a <2 year payback and reduction in greenhouse gas emissions

TRY Emerson Process Management's **Pervasive Sensing™ Steam Trap Monitoring Solution FOR 90 DAYS**. If the solution complies with the agreed expectations, an invoice with payment terms of net 30 days will be presented. If the expectations outlined at the start of trial are not met, the solution can be returned to Emerson without penalty.

Contact your Emerson Process Management representative for more information.
