

Extend the Usable Life of Your Combustion Probes with Life Cycle Assurance

Combustion Probe Life Cycle Assurance for North America

With an expected life cycle average of up to 20 years, Emerson's OCX-8800 and Oxymitter combustion analyzers are engineered for process applications where measurement analysis and accuracy are critical. Because of the rough rugged environment in which these combustion analyzers are installed, routine check-ups and continuous maintenance by experienced personnel is highly recommended.

With Life Cycle Assurance services provided by Rosemount Analytical, our factory-trained and certified technicians help you maximize the measurement accuracy and continuous performance of your equipment. From installation assistance, to startup and commissioning, to maintenance support and training services, we can provide a customized program for your equipment and application's needs.

Prevent costly repairs and reduce the risk of unexpected shutdowns. Speak to one of our SureService technicians to learn more about Life Cycle Assurance services. For a complete list of services, visit www.RosemountAnalytical.com/SureService

6 Month Extended Warranty Available

SureService Life Cycle Assurance programs provided by Rosemount Analytical technicians are backed up by our six month extended warranty program.

Number of Probes	Your Investment
2 probes (minimum)	\$ 1,000 per probe
3 probes or more	\$ 500 per probe

Life Cycle Assurance Services

Eliminate risk and ensure you are getting the most out of your Rosemount Analytical equipment by consulting one of our certified technicians and learn more about the following service programs available:

■ Installation

- Wiring and grounding
- Proper gas connections
- Probe length selection and alignment

■ Startup and Commissioning

- Calibration and accuracy
- Measurement analysis and testing

■ Maintenance and Support

- Field testing and serviceability
- Downtime reduction
- Measurement accuracy of support gas
- Ongoing support

■ Training
