

ROSEMOUNT® 5708 3D SOLIDS SCANNER PRE-PAID START-UP & COMMISSIONING SERVICE

Be sure your technology tells an accurate story

Measure level and volume with greater confidence

Measuring the level and volume of bulk solids is never easy, because surfaces are uneven with irregular contours. Take the guesswork out of solids level measurement with the Rosemount® 5708 3D Solids Scanner for the highest accuracy in level, volume or 3D visualization. Proper installation is critical for optimal performance, accurate results and trouble-free operations.

Trust Emerson service technicians to verify transmitter installation, configure it to OEM specifications, and test its operation. Our work will be planned and carried out according to your demanding schedule, so you can free up your staff for more important duties. Gain confidence that your system is installed and commissioned properly—giving you the accurate measurements you need to improve solid material inventory management.

ON YOUR TANK. ON SCHEDULE.

Use the Rosemount 5708 3D Solids Scanner Pre-paid Start-up & Commissioning Service to make sure your solids level measurement products are operating to optimal specs, on your start-up schedule.

Emerson service technicians are factory trained and Rosemount Certified to get you online, on time. We can also train your staff and extend your warranty to keep your solids scanner technology operating at peak performance for years.

ROSEMOUNT®

EMERSON™
Process Management

The Rosemount 5708 3D Solids Scanner will help you measure level and volume with greater confidence

Established method for success

Get the best performance from your Rosemount® 3D Solids Scanner technology. Enlist experienced Emerson service technicians to provide a comprehensive and cost-effective start-up.

+ Ensure the highest quality

- Validate and certify proper mechanical and electrical installation on instrumentation according to your reference standards
- Configure and commission transmitters, perform diagnostic tests (including echo curve analysis and communication quality tests)
- Verify and fine-tune bulk solids measurement

+ Start-up on schedule

- Set up an onsite visit during the business week from 7 a.m. to 5 p.m.

+ Improve staff skill set

- Conduct onsite training on product fundamentals with Emerson service technicians
- Demonstrate essential installation, operation, maintenance and troubleshooting guidelines to better diagnose and resolve common device issues

+ Get a three-year warranty*

- Increase your one-year factory warranty to three years with this start-up and commissioning service

+ Receive a comprehensive follow-up

- You will receive remote support for the first six months to make adjustments as needed after a 3DLinkPro is installed or when you provide a LAN connection
- A technician will contact you to assess transmitter performance
- Commissioning is fully complete only after running through process cycles (fill/ empty) that may take a few weeks during which system configuration (such as false echo mapping) is adjusted
- Remote support is an efficient and cost effective method to fine-tune or troubleshoot system configuration

+ Limited time offer

- For a limited time you will receive FREE 3DLinkPro modems. This is a savings of over \$950 per 3DLinkPro. The number of 3DLinkPros provided will depend on your site setup and your quantity of Rosemount 5708 3D Solids Scanners.

* If the 3D Solids Scanner was purchased with an extended warranty, and you've purchased this service, then whichever warranty is longer will be in effect.
