

Technical Product Training Program 2016

Always ready for your next challenge

ROSEMOUNT TANK GAUGING PRODUCT TRAININGS

Rosemount Tank Gauging offers complete training courses for commissioning and maintenance of our gauging systems. The courses include both practical and theoretical training. During 2016 we have two training courses available to customers, integrators and distributors.

TANK GAUGING TECHNICAL PRODUCT TRAINING

5-day course covering the complete 5900 tank gauging system including 5300/5400 and Smart Wireless as well as the previous generations of inventory tank gauging systems with 3900 Rex and 5600 Pro. Auxiliary equipment used in conjunction with tank gauging systems like temperature and pressure transmitters are also covered on a functionality and integration basis in the class. The training covers installation, configuration, calibration and troubleshooting of our products. The course covers the use of our TankMaster software's maintenance client WinSetup to configure and maintain the gauging systems as well as general Tankmaster functions.

This is a general all-inclusive start-from-scratch course that is suitable for both commissioning and maintenance personnel as well as project and engineering personnel involved in tank gauging systems. No previous knowledge about the Rosemount tank gauging system is required to participate in this course. It is recommended that participants have some general knowledge about instrumentation and computers.

Course dates RTG101US:

- February 1 - 5, 2016
- April 4-8 2016
- June 6-10 2016
- August 1-5 2016
- October 10-14 2016
- December 5-9 2016

TANKMASTER TRAINING

2-day course covering the inventory and system functionality of the Tankmaster Tank Gauging system. The course will cover inventory configuration and management, networking with clients and redundancy, Tankmaster.Net web server, host interfacing to 3rd party applications, reports, user accounts and program access control, operator handling of inventory, alarm system and batch system.

This is a general all-inclusive start-from-scratch course that is suitable for both commissioning and maintenance personnel as well as project and engineering personnel involved in tank gauging systems. No previous knowledge about the Rosemount tank gauging system is required to participate in this course. It is recommended that participants have previously attended our Tank Gauging Technical Product Training course, but it is not a requirement as long as participants have some general knowledge about instrumentation and computers.

Course dates RTG102US:

- February 8-9 2016
- August 8-9 2016

QUALITY TIME FOR QUESTIONS & DISCUSSIONS

Due to our ambition to have educational lectures and rewarding hands-on exercises, there is a maximum of 12 participants for both Technical Product Training and TankMaster training.

| Practical Information | |
|-----------------------------------|---|
| Location | All courses are held at the Rosemount Tank Gauging NA facility at 6005 Rogerdale Rd, Houston TX 77072, USA |
| Course fee | <ul style="list-style-type: none"> • RTG101US Tank Gauging Technical Product Training: US\$ 2,300 • RTG102US TankMaster Training: US\$ 1200 |
