

## EIM Industry Customer Listing

At EIM, we could have been satisfied with an early reputation for rugged, dependable products - after all, the first actuator we made in 1949 is still in service. But at EIM, we like to stay on top of things.

Through the years, dedication to engineering excellence has resulted in a broad line of products built in the finest tradition of American technology and craftsmanship. In manufacturing, EIM has become an industry leader with eyes on the future. Through automation and computer aided design, our fabrication and assembly plant near Houston, Texas is one of the most modern in the world.

Today you'll find EIM valve controls at work on every ocean and continent, in applications ranging from water treatment, petrochemical and power utility to aircraft carriers and guided missile cruisers.

Listed below is a listing of the various industries in which you will find EIM actuators and controls. Please click on the industry to see a partial listing of our customers in that industry.
