Maximize Your Skills and Investment with Valve Automation

Over the years Emerson has been making significant investments in factories and service centers across MEA and is moving its operations closer to customers, in terms of manufacturing, service, support and training.

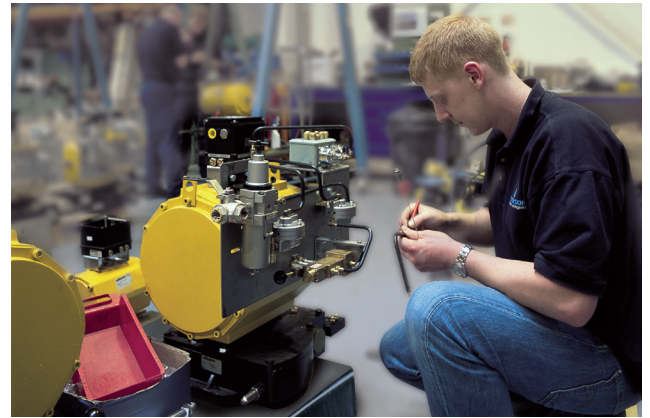

Emerson has the expertise and experience to handle your maintenance and repair, regardless of your industry. The way you manage your key production assets directly affects your facility's availability and profitability. The health and performance of your assets can determine your success in reaching your business goals.

With vast experience in training and education, Emerson's Valve Automation Educational Services remains committed to providing quality training to its Middle East and Africa customers when and where they need it.

Our dedicated staff can help assess your company's training needs and design a suitable training program to help your group be successful with their valve assets. Supported by our World Area Configuration Centers in Jubail, Saudi Arabia, Dubai, U.A.E. and Johannesburg, South Africa, our training programs represent the best in the industry.

Additionally, we are offering customized on-site courses, minimizing time away from work, travel and lodging costs. We can tailor training in your local area to meet your specific needs. Regardless of which option your organization opts for, we strive to provide you the best learning experience possible.

Our training courses and classes are constantly being improved to meet the requirements of our customers and evolving valve automation solutions.

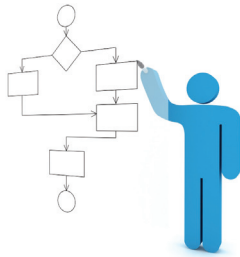

Additional Info

- Courses will be held twice in a year – December and June.
- These courses are available on request for customers having a minimum number of participants (normally at least 6).
- Certifications will be provided

To register, please contact

Take Your Career Further With Us

In-House Training

Emerson's Valve Automation offers in-house training programs designed to provide a solid foundation for more advanced programs. These programs take place in our training centers and provide the attendee with in-depth knowledge of our products from classes held in our facilities.

- Learn everything you need to know about our products and how they operate
- Provide the best training in a safe and controlled environment; taking place in Training Centers or World Area Configuration Centers (WACC)
- Discussion of the products, how they work and popular industry applications
- Training facilities will provide all the tools and equipment for the course
- Collaborate with other attendees in the class to discuss topics and sample technologies featured in the training.
- Courses will provide top-notch competencies and is highly suited for non-field personnel requiring technical training on products:
 - Product Specialists
 - Application Engineers
 - Technical Writers
 - Technical Support Engineers
 - Products Sales Agents

Site Training

Understanding the intricacies of our industry-leading technologies requires nothing less than total knowledge of the product and how it operates in the field. Emerson's Valve Automation offers training programs that take you to the operating environment of the products to provide the best understanding of how they work on-site and how to provide solutions where it counts.

- Advanced training on Valve Automation products, and their industrial applications
- Training takes place in customer workshop or field installations where Valve Automation products are in use.
- Attendees will learn how actuators work together with other systems in the industry
- Gain a broader understanding of application design and where Valve Automation products fit in the picture.
- Learn how to tackle the challenges facing actuators operating in the field.
- Courses will provide industry-leading knowledge at great value and is recommended for field and plant design personnel:
 - Design Engineers
 - Process Engineers
 - Plant Engineers
 - Plant Operators
 - Field Technicians

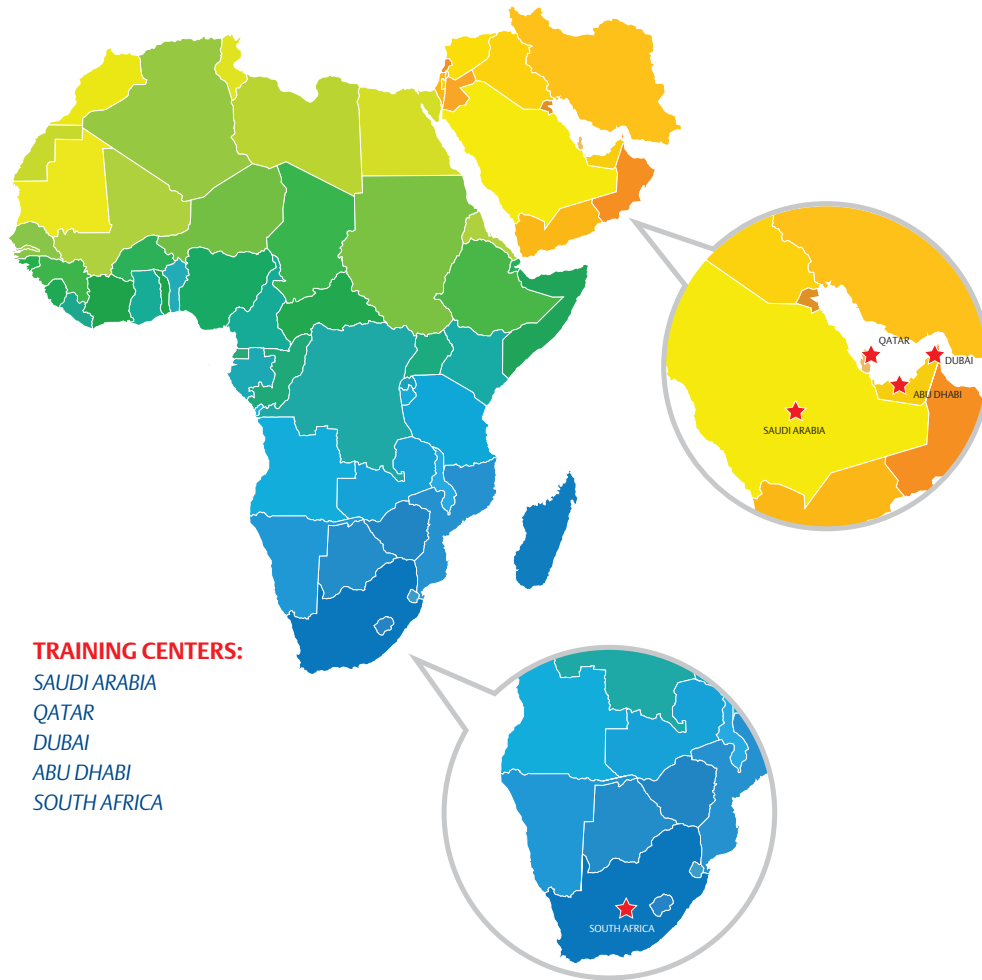

Service Training

Representing the world's finest in valve automation solutions, Emerson's Valve Automation is known not only for its products but also for the quality of service we provide to our customers. Our service training programs provide cutting-edge competencies that specialize in the maintenance and servicing of valve automation products.

- Service training specializes in training personnel on the maintenance, troubleshooting and repair of valve actuators
- The service training program takes place in Emerson's training facilities
- Topics covered include comprehensive diagnosing, servicing and troubleshooting of Valve Automation products
- Hands-on training on common and advanced actuator servicing and repair procedures
- Courses are designed to provide attendees with leading knowledge and competencies on valve actuator servicing and repair and is recommended for:
 - Field Technicians
 - Plant Maintenance Technicians
 - Service Engineers/Technicians
