

Emerson DCMLink Software

DCMLink Software

- DCMLink Software is the command and control software for electric actuators.
- Enables users to configure, calibrate, monitor and diagnose all electric actuators from a central location independent of protocol, actuator or host system.
- Enhances plant productivity by unifying all electric actuators on a common platform while allowing plant operators to gain deep insights into asset status and performance in real-time.
- Provides actuator data gathering, condition monitoring, events log and prioritization of actuator alarms in a unified and consistent user interface.

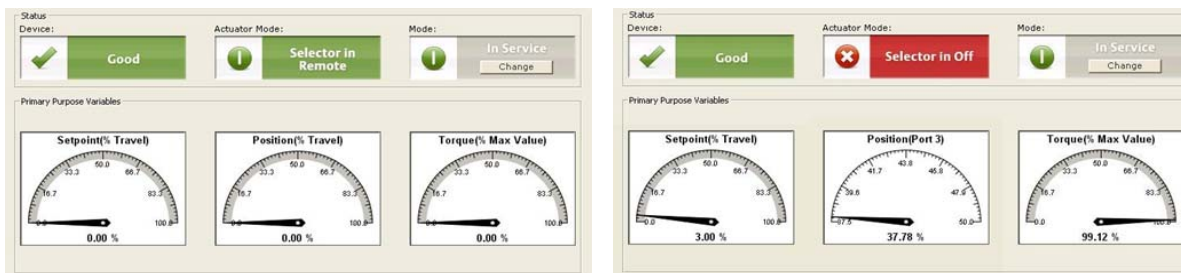

DCMLink

Benefits

- Integrates with Emerson's PlantWeb™ solution
- Improve maintenance efficiency, and reduce maintenance cost
- Support for WirelessHART, Foundation Fieldbus, MODBUS, Profibus and Bluetooth protocols

DCMLink offers a uniform and consistent user interface (UI)

Emerson DCMLink Software

Simplified Status for Alarms

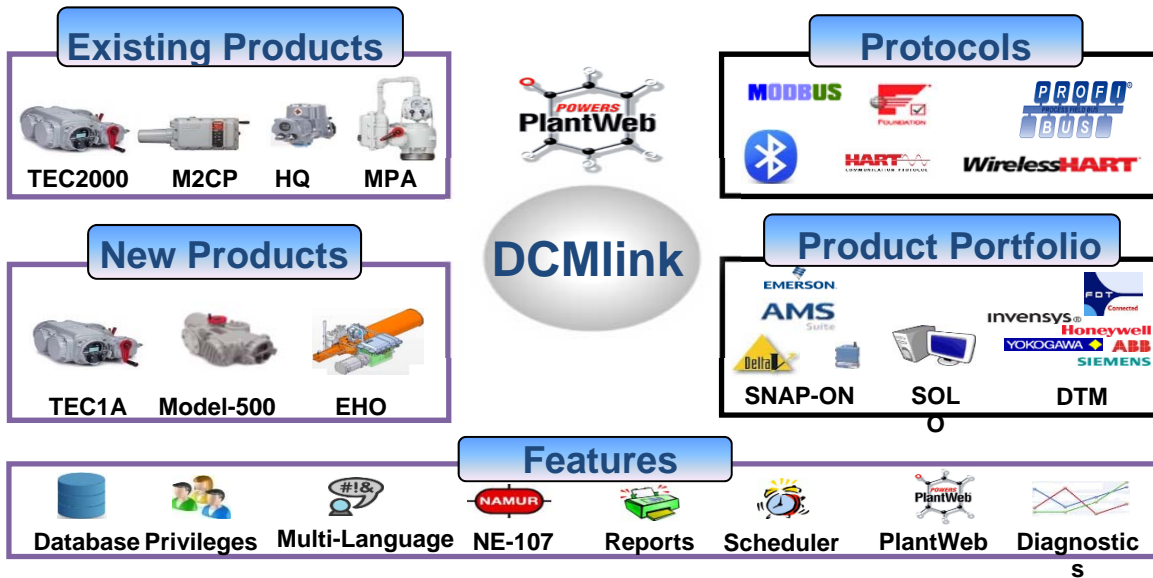

- Up to 53 alarms are reported
- Green & Good status = No Active Alarms
- Active alarms categorized into four types per NE-107

Uses universal symbols used for colored blindness

Emerson Business Synergy

- Integrates with Emerson
 - PlantWeb solution
 - AMS Device Manager
 - DeltaV
- PlantWeb compatible alerts, alarms and diagnostics
- Emerson Waveguide compliant
- WirelessHART integration with Rosemount THUM
- Same look and feel (GUI) as Fisher® ValveLink™ software
