

Educational Services

Maximize Your Investment!

Active participation when learning new skills is known to increase skill retention and deliver more immediate results. But these days it is harder to find the time and money in the budget to attend the hands-on workshops you need to stay current with your work skills. What if you could actively participate in a training workshop without leaving home... and work at your own pace for a more thorough understanding of the material?

Emerson's new blended learning approach combines the content from traditional classroom instruction with other tools such as e-learning, virtualized computers, video and email to create the most thorough learning environment available... and all from your home or office. Work at your own pace, spending as much or as little time required on individual sections so you are confident in mastering all subject matter.

AMS Machinery Manager: Vibration Analysis Workshop for the PdM Professional

Course 2008B CEUs 1.4

Overview The purpose of this workshop is to provide the vibration analyst with exercises to advance his/her knowledge and proficiency with the use of the Vibration Analysis tab in Emerson's AMS Machinery Manager software.

This workshop was designed as a self-paced, blended-learning training experience. The student will be provided with a workbook, access to a virtual training computer, and an eLearning module.

The student will be given a link to a Virtual Training Computer to complete exercises using AMS Machinery Manager software. If there are questions on how to complete steps in the exercise, students can use the eLearning module for assistance or email questions to an instructor at MHM.Training@Emerson.com.

Prerequisites Some knowledge of AMS Machinery Manager software and vibration analysis experience is recommended.

Topics The workshop contains 11 topical exercises for use with the Vibration Analysis tab in AMS Machinery Manager, including:

- Tools for Analyzing Spectral Data
- Selection Type Preferences
- Point Details
- Setup Options

Price \$1,000
