

Betreff: China Pattern Approval Certificate

Autor: Kembel Ye bei CNSHAPO1

Datum: 02.03.98 13:48

Gentlemen,

I am pleased to announce that we now obtain the official Pattern Approval Certificate (PAC) from China Government. It means all the analytical products listed below are allowed to bear the mark PAC if the destination of the products is China. For other analytical products, PAC is not required at this stage. Once a product obtains PAC, the mark can be applied to this product until it is discontinued to produce.

The PAC mark is shown as the attached file. Under the mark is the PAC number. Each product family has a specified number. You may put the mark on the products or the package or just present the PAC number in the shipping documents at your convenience.

The products of Uniloc are:

- | | |
|-------------------|---------------------|
| 1, Turbidity, | PAC number: 97-C212 |
| 2, pH meter, | PAC number: 97-C213 |
| 3, TFC/TRC meter, | PAC number: 97-C214 |
| 4, DO meter, | PAC number: 97-C215 |

The products of PAD are:

- | | |
|---------------------|---------------------|
| 1, 400 FID family, | PAC number: 97-C208 |
| 2, 800 NDIR family, | PAC number: 97-C209 |
| 3, OPM-2000 family, | PAC number: 97-C210 |
| 4, 340 Moisture, | PAC number: 97-C211 |
| 5, 900 CLD family, | PAC number: 97-C218 |
| 6, NGA-MLT family, | PAC number: 97-C219 |

Now we are the only one company in China who obtains the official PAC and is allowed to bear the PAC mark to the relevant process analysers. It will be a very strong sales tool to beat our competitors. We'll release this news in the coming FRCN Newsletter and distribute the copies of official PACs to our sales people very soon. And we'll put the mark on our Chinese version PDSs when we reprint it. Copies of the official PAC are available. Please advise if you would like to get the copies.

Should you have any questions, please contact me.

Thanks and best regards

Kemble
