Emerson Process Management Manufacturing GmbH &Co. OHG
Industriestrasse 1
Hasselroth, 63459
Germany

Dear Burkhard Rienecker,

The Fieldbus Foundation is pleased to inform you that Emerson Process Management Manufacturing GmbH &Co. OHG has successfully completed device registration testing under Fieldbus Foundations ITK 4.51 and has met the requirements for official device registration as defined by the Foundation's Device Registration process, FF 524.

Attached to this notice is the Registration Confirmation for the device tested. This Registration also identifies the Device Description (DD) and Common File Format (CFF) that was submitted for testing with this device. The DD and CFF are the official DD and CFF registered along with this device and identify a specific version number for each.

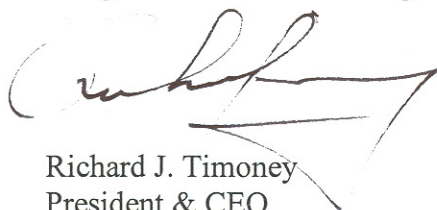

You are reminded that should you modify, change or version up the device, the DD or CFF you may be required to re-submit the device, the DD and/or the CFF for re-test and re-registration. Please contact the Foundation should you have any questions in this regard.

The device DD, CFF, and version number will be posted to the Foundation's web site. A pdf copy of this certificate will also be posted on the web site as the official registered device version.

Additionally, your company is authorized to use the terminology "Foundation" tested and has the right to use the Product Registration mark for the device, DD and CFF as described and identified in the Exhibit A attached for all related marketing materials.

A copy of FF graphic standard MT- 045 is attached. Please contact the Fieldbus Foundation to obtain the necessary camera ready artwork.

Congratulation and Best Regards,

Richard J. Timoney
President & CEO
Fieldbus Foundation
