FIUIA	Base Temp.									
	Specific Gravity at Base									
	Operating Specific	-								
	Mol. Weight Operating Viscosity	Cp/Cv								
	Quality % or Superl									
Select Primary	Base Press Base Temp. Check one and fill in corresponding information below:									
Element	☐ Orifice Plate									
Liemene	· ·									
	Averaging Pitot Tube									
	Other:									
	Integral Temperature Yes No									

DP Flow Transmitters

DP Flow Specification Sheet 00815-0100-4485, Rev AA 2013

	Check one:							
	☐ Standard (one hole plate)							
	☐ Conditioning (multi-hole plate) Beta = d/D							
Orifice Primary Element	Orifice Bore Diameter	_						
	Line ID	_						
	Plate Material	_						
	Vent or Drain Hole	_						
	Plate Thickness							
	Connection Type							
	• • • • • • • • • • • • • • • • • • • •	_						
	Plate Type							
	Тар Туре	_						
	Flange Type							
	Flange Rating							
	Flange Material							
	Standard (AGA, etc)							
	Line ID							
	Sensor Material Sensor Material							
	Mounting Style							
Averaging	Check all that apply:							
Pitot Tube	☐ Wafer Style							
Primary Element	☐ Compression Sealing Mechanism							
	☐ Opposite Side Support Required							
	☐ Flanged - Flange Rating							
	☐ Threaded							
0.1 0.1	☐ Hot-Tap							
Other Primary	Body Material Control of the Control							
Element	Wetted Material							
	Pressure Rating							
	Тар Туре							
	Beta Ratio							
	Bore Size							
	Throat Size							
	Flow Coefficient							
	Standard/Approvals							
	Other Information:							
Transmitter	Check one:							
Mounting	☐ Direct Mount							
	Remote Mount							
	Secondary Instr. Tag							
	Transmitter Type – Check one and fill out the corresponding calibration							
Secondary	information below:							
Instrument	Mass or Energy Flow ⁽¹⁾ - Compensation Level							
	Differential Pressure							

DP Flow Specification Sheet

00815-0100-4485, Rev AA 2013

DP Flow Transmitters

	Differential Pressure LTV=		UTV=	Units=	
Flowmeter	Pressure	LTV=	UTV=	Units=	
Calibration	Temperature	LTV=	UTV=	Units=	
Notes					

⁽¹⁾Transmitter that provides real-time fully compensated mass, energy, and totalized flow by measuring differential pressure, static pressure, and process temperature
