

Mobile Oxygen Supply Emergency Case

Specifications

The WegaMed™ Emergency Case has been specifically designed for emergency situations when a vast number of injured or diseased casualties have to be dealt with by emergency staff. Two 5 litre oxygen cylinders facilitate the immediate use of emergency devices, such as respirators or suction equipment. Additionally the oxygen treatment by breathing masks or insufflation can be ensured via the supply unit as well. The outlet connections allow for BS quick release couplings, device specific screw connections or flow selector switches – the right combination for every purpose can be offered. The Emergency Case can also be run with an external gas supply (e.g. a wall outlet in a hospital or an ambulance) by connecting the device unit via central gas supply hose (provided) and self closing NIST-coupling. Thus providing a safe way to ensure the oxygen supply of the patient is not interrupted.

□ Technical Data

- Dimensions: LxWxD 705 x 415 x 250
- Weight:appr. 31 kg
..... including 2 compressed gas cylinders
- Content:
..... 2 x 5l compressed medical oxygen
..... pressure reducer
..... supply unit with couplings for up to
..... 6 casualties/devices
..... 5 m - hose for Central Gas Supply
..... including NIST coupling

Optional accessories:

- DIN or BS or NF coupling*
- NIST- fitting
- Flow Switch
- Demand valve
- Suction unit
- Low pressure acoustic alarm

* further couplings on request

Europe only

- **Outstanding flow performance**
Even with flow rates up to 180 l/min the WegaMed™ pressure reducer guarantees constant and precise pressure stability and hence a safe and reliable patient supply.
- **Robust aluminium casing**
Zarges® box
Stackable
Fixed and tightened pressure reducer
Secured gas cylinders
Easy exchange of cylinders by use of quick tight cylinder brackets
- **Also available as 300 bar version including 3000 l oxygen.**
