

We invite you to

# „Fuel Efficiency“ 2013

Exhibition · Lectures · Talks

Wednesday 20<sup>th</sup> of March 2013,

11:00 am – 6:00 pm,

**Penthouse Elb-Panorama**

Atlantic-Haus, 20<sup>th</sup> floor

Bernhard-Nocht-Strasse 113

20359 Hamburg

- Precise Fuel Measurement
- Fuel Monitoring on Bridge
- Remote Monitoring of vessel performance
- Claim Management
- EEOI reporting
- Support of SEEMP

**Wave**

**Micro Motion**

## Marine Fuel Measurement - Superior measurement for outstanding results with Micro Motion und Wave

### Lower Cost

- Meter accuracy between  $\pm 0.1\%$  and  $\pm 0.2\%$
- System accuracy of  $\pm 0.5\%$  onboard
- Increase fuel efficiency and lower fuel waste by understanding actual fuel usage and overall vessel engine performance
- Avoid engine damage, premature fuel pump failure, or sticking of piston rings by ensuring fuel viscosity is correct and burning more efficiently

### Improved Performance

- Monitor fuel quality to determine when fuel additives are required to ensure engine is burning fuel optimally
- Immediate feedback to heater systems to control fuel viscosity going into fuel injectors for optimal engine performance
