

## FLOW CUSTOMER TRAINING

Maximize the Value of Flow Measurement

Emerson's Flow Customer Training Service ensures your technicians and engineers are confident to correctly install, configure, startup and troubleshoot your Emerson devices. Instructors share real-world experience and examples to lead student through hands-on exercises using the latest configuration tools.

Training is available for Micro Motion® Coriolis, density, and viscosity meters and Rosemount® Magnetic and Vortex flowmeters.

### Flow Customer Training enables you to:

- Quickly and easily commission and start-up new instruments
- Properly install instruments using best practices
- Troubleshoot instrument problems
- Improve instrument lifecycle
- Reduce downtime and cost
- Increase reliability and availability

Emerson Certified Instructors offer in-depth product training either at our factory, at local Emerson offices, at business locations in your area or at your own site.

### WHAT IF...

Your maintenance technicians are working on equipment they have never been trained on?

You could have on-site personnel trained to quickly troubleshoot issues to keep your process running?

With Flow Customer Training, you will receive extensive theoretical and hands-on training to maximize your investment.

# Flow Customer Training

## Customer Training Topics

We provide training for Micro Motion and Rosemount Flow instruments:

- Coriolis flowmeters
- Density and Viscosity meters
- Magnetic flowmeters
