

INVEST IN A CSI 2140 NOW AND REAP ARES™ PLATFORM BENEFITS LATER

When Emerson's ARES Asset Management Platform is released, will your program be ready to reap the rewards? The answer is yes when you purchase or upgrade to a CSI 2140 Machinery Health Analyzer. Last year, customers who upgraded to a CSI 2140 experienced a total value-added cost savings of more than \$14 million over CSI 2130 users.

Prioritizing your valuable resources to improve plant reliability is possible with the new ARES Platform and AMS Machine Works vibration analysis program. This solution combines predictive intelligence with modern communication technology, for accurate, real-time decision making. Alert settings can be customized by frequency, criticality, or asset type, and are delivered through a secure network environment. Future ARES Platform updates will integrate data from various devices as well as other reliability technologies and business systems.

Reserve your ARES platform upgrade, at no charge, with your purchase of a CSI 2140 and a three-year Guardian™ Support license for your AMS Machinery Manager software.

Purchase must be made by September 30, 2016. ARES platform will be delivered at its release.

The CSI 2140 delivers simultaneous four-channel plus phase-data collection and unique impact detection capabilities for the earliest indication of bearing and gearbox degradation. It is rated for ATEX/IECEX Zone 2, and Class I, Division 2, with gas safety rating approvals to safely monitor and analyze assets in hazardous areas. It also is the only analyzer available with explosive dust certification for Class II, Division 2, Groups (F,G).

Guardian Support helps you achieve your reliability goals by providing an easy management dashboard, knowledge-based articles, technical phone support 24x7, and annual battery replacement evaluation and calibration for your CSI 2140.

If you haven't upgraded to a CSI 2140 yet, talk to your Emerson sales representative to see if you qualify for a trade-in-discount:

40% OFF

- **When you buy a new CSI 2140.**
- **When you trade in a third party analyzer for a new CSI 2140.**
- **When you trade up a CSI 2120 or CSI 2130.**
