

## LIFECYCLE SERVICES - SMART WIRELESS SERVICES

### Wireless Health Check

## Are you getting the best from your network?

You've already made the investment into an Emerson wireless network, which has allowed you to increase plant efficiency and cost-effectively enable additional measuring points in areas you couldn't in the past – rotating equipment or harsh environments.

Perhaps you want to expand further or want to ensure you are getting the very best from the system. Let our team of trained technicians review your network and suggest possible areas of improvement.

Talk to Emerson. We're the experts in wireless so you don't have to be.

### + WHAT IF

You are unsure or would like confirmation that the Emerson Wireless Network is performing at its optimum, whilst also getting some on site basic training.

With Emerson Lifecycle Services support, our trained technicians can get you on line according to your schedule and train your staff so you're better equipped to run at maximum efficiency for years to come.

## Post Installation Wireless Health Check

A comprehensive look into your network and instruments to ensure everything is working at its optimum:

+ Start-up on your schedule — The service includes one site visit Monday through Friday, 08:00 to 17:00. All travel expenses are included, which means no surprise costs to you.

+ Reliability study

- Review and analyze the Smart Wireless network diagnostics
- Review the Smart Wireless network and offer any recommendations
- Review Power Modules and advise on life expectancy
- Discuss future expansion, if required
- Issue a detailed report on the Smart Wireless network status

+ Smart Wireless Gateway

- Upgrade to latest firmware – if required
- Reset Smart Wireless Gateway statistics
- Perform a system back-up
- Check Smart Wireless device update rates
- Check Smart Wireless Gateway loading

+ Smart Wireless Devices

- Site walk through to visualise network and any potential issues
- Check antenna orientation

+ Improve staff skill sets — Our experts will share basic training on Smart Wireless product fundamentals with your employees whilst on site so your team will be better equipped to diagnose and resolve common device issues. Full training is available if you require.

Emerson wireless products have logged over 1 billion operating hours across the globe, with a proven ability to increase efficiency and reduce costs. Contact Lifecycle Services today to learn how we can optimize your wireless network and unleash its full potential.

### Real customers, real results

*“Using Smart Wireless we have been able to significantly reduce the cost of upgrading the pressure measurement to an online system. Installing new cabling would have cost €10,000 more than the wireless solution.”*

Morten Hansen  
Instrument Manager  
Nynas AB
