X-STREAM X2GC and XEGC Analyzers Replaced with X2GK and XEGK Analyzers

Effective October 1, 2012 (at the start of FY13), the X-STREAM X2GC and XEGC gas analyzers will be moved to **INACTIVE STATUS** and removed from our pricebook. These will be replaced with X-STREAM X2GK and XEGK series. Status change applies to all unit mounting variations of this gas analyzer, which include: Table-Top , Rack Mount, and Portable units.

As per the Rosemount Analytical Product Life Cycle policy, we will continue to repair, service and provide spare parts to X2GC and XEGC analyzers for the next 7 years before making these obsolete.

If you have any questions or concerns, please consult with the factory. For a full list of available X-STREAM products and services, [please click](#) here or visit our website www.RosemountAnalytical.com
