

For immediate release

New Emerson 3D CAD models accelerate the design process

*3D and 2D drawings available for broad line of regulators*

McKINNEY, TEXAS (November 27, 2012) – Emerson Process Management now offers 3D CAD drawings and 2D drawings with dimensions for its regulator products.

The interactive 3D CAD drawings are high-quality, photorealistic images that can be rotated and zoomed for a complete view of the product, allowing the viewer to truly see how the product can be integrated into the equipment being designed.

The 3D representations save design time and reduce possible issues during fabrication. Two and three-dimensional representations are available for Emerson's broad line of natural gas, air, liquid, LP-gas, process gas, steam, tank blanketing and sanitary regulator products. The drawings are compatible with all major CAD software, including Autodesk, PTC and Solidworks. The new CAD drawings can be found at <http://cad.emersonregulators.com>.

#### About Emerson Process Management

Emerson Process Management ([www.emersonprocess.com](http://www.emersonprocess.com)), an Emerson business, is a leader in helping businesses automate their production, processing and distribution in the chemical, oil and gas, refining, pulp and paper, power, water and wastewater treatment, mining and metals, food and beverage, life sciences and other industries. The company combines superior products and technology with industry-specific engineering, consulting, project management and maintenance services. Its brands include PlantWeb™, Syncade™, DeltaV™, Fisher®, Micro Motion®, Rosemount®, Daniel™, Ovation™, and AMS Suite.
