**FOR IMMEDIATE RELEASE**

**New Emerson high pressure relief valves broaden overpressure protection offering**

*Additional sizes offered for EZH, EZR and FL series regulators*

McKINNEY, TEXAS (July 17, 2012) – Emerson Process Management has expanded its overpressure protection offering with additional sizes for the EZH, EZR and FL series relief valve and backpressure regulators. Pilot operated relief valves and backpressure regulators are used for overpressure protection in natural gas systems to protect pipelines and gas processing equipment downstream of the regulator. The EZH is now offered in 1” through 4” sizes, the EZR is available in 1” to 8” sizes and the FL is available in 1” to 10” sizes.

The Types EZH, EZR and FL are used in applications requiring high capacity and low pressure build-up. Typical applications would be city gate stations, large capacity distribution systems and power plant feeds. The EZH, EZR and FL series offer bubble tight shut off, durable construction, versatility, precise pressure control, a common body platform and long life.

These new product offerings are now reflected in new and updated bulletins and instruction manuals which include all of the new sizes for Types EZH, EZR and FL, along with the addition of the PRX/182 relief pilot. The bulletins and instruction manuals for Types EZH and EZR may be found at [www.FisherRegulators.com](http://www.FisherRegulators.com). Bulletins and instruction manuals for Type FL regulators may be found at [www.Tartarini-NaturalGas.com](http://www.Tartarini-NaturalGas.com).

## **About Emerson Process Management**

Emerson Process Management ([www.emersonprocess.com](http://www.emersonprocess.com)), an Emerson business, is a leader in helping businesses automate their production, processing and distribution in the chemical, oil and gas, refining, pulp and paper, power, water and wastewater treatment, mining and metals, food and beverage, life sciences and other industries. The company combines superior products and technology with industry-specific engineering, consulting, project management and maintenance services. Its brands include PlantWeb™, Syncade™, DeltaV™, Fisher®, Micro Motion®, Rosemount®, Daniel™, Ovation™, and AMS Suite.

## **About Emerson**

Emerson (NYSE: EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions for customers in industrial, commercial, and consumer markets around the world. The company is comprised of five business segments: Process Management, Industrial Automation, Network Power, Climate Technologies, and Commercial & Residential Solutions. Sales in fiscal 2011 were \$24.2 billion. For more information, visit [www.Emerson.com](http://www.Emerson.com).
