

# UV/IRS Flame Detector

## Ultraviolet and Infrared Optical Sensors

The UV/IRS (Ultraviolet/Infrared) flame detector delivers exceptional performance with many distinct functions and features. Two precise spectrums of radiation must be recognized and confirmed by highly tuned sensors for the UV/IRS to initiate a fire condition. This accurate and reliable flame monitoring technology combined with immunity to arc welding, hot body radiation, lightning, and sunlight greatly reduces costly false alarms while providing critical safety performance to your site and personnel.

- Two radiation wavelengths necessary for alarm – minimizing false alarm events
- Low power consumption increases uptime and lowers overall costs
- Manual and automatic testing of optical surfaces
- Global certifications and approvals
- Wide voltage range allows for greater stability and system compatibility

Enclosed in a rugged, explosion-proof housing, the UV/IRS flame detector uses the latest in modular microprocessor and Ultraviolet/Infrared sensor technology – delivering accurate and reliable monitoring for hydrocarbon based fires. It is capable of standalone operation or can be connected to a variety of networked safety systems to create a dependable fire monitoring system.

The UV/IRS flame detector has many unique features which make it one of the industries best: an extra wide field of view – up to 120 °C; user defined sensitivity and time delay settings can be completed in the field with no special tools required; one of the lowest power consumption levels and widest voltage range available on the market.

- Field-selectable sensitivity and delay settings allows operators to fine tune at installation site
- Wide area coverage, extended range with fast response times
- Analog, relay, RS-485 digital Modbus, and HART® outputs available
- Three year warranty electronics/two years on sensors

**The UV/IRS flame detector is simple to operate and maintain while delivering all the security and performance required for high-risk, industrial installations!**
