

## **2008 - 2009 Catalog Introduction**

*Dear Valued Customer,*

*Welcome to the 2008 – 2009 Rosemount Product Catalog. After more than 50 years of delivering reliable Rosemount products that enable unparalleled efficiency and safety in your process, we are continuing to expand our portfolio to provide you with even more value.*

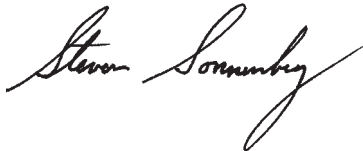

*New this year is the Wireless Products section. Emerson's Smart Wireless solutions are an extension of the PlantWeb<sup>®</sup> digital plant architecture, combining highly reliable, smart monitoring devices with wireless transmitters in an innovative self-organizing mesh network that automatically adapts as device points are added or removed, or obstructions encountered. The network, which uses Time Synchronized Mesh Protocol (TSMP) technology, has been extensively tested in real-world environments, consistently delivering greater than 99% data reliability. Rosemount wireless products are built on the same proven, industry-leading platforms as their wired counterparts, and based on open protocols, making our wireless products as familiar and easy to use as possible.*

*Another change this year is that we have expanded our Level portfolio to include Mobrey brand products. The addition of Mobrey products to the Emerson family ensures that we can offer you the right technology for even more level applications.*

*At Emerson, quality continues to be our top priority. Our products are manufactured or assembled in ISO 9001 certified facilities in locations around the globe, so we can provide the best delivery and support wherever you need it. Our experienced Instrument Consultants are available to help you determine the best Rosemount product for your measurement application.*

*We are excited about our 2008 – 2009 product offering and look forward to working with you to provide solutions for all your process measurement needs. To learn about our newest innovations in pressure, temperature, level and flow measurement, be sure to visit us at [www.rosemount.com](http://www.rosemount.com).*

*Sincerely,*

*Steve Sonnenberg*

*President*

*Emerson Process Management - Rosemount Division*
