

Rosemount TankMaster.net™

Access your tank farm services on the Internet!

TankMaster.net™ – the s outside see what's insid

With TankMaster, we changed the way you manage your tank inventory system. Now it's time to enhance the time-saving benefits into profitable corporate and customer services.

TankMaster.net is the web version of TankMaster.

It monitors your tank farm inventory data on a secure website. From there, the information is available for your customers, suppliers, corporate management and others via the Internet or the corporate intranet.

Tank content levels, volumes and temperatures

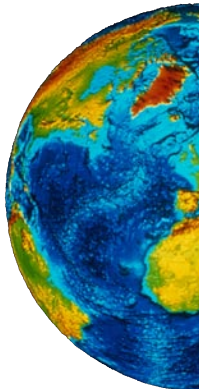

Terminal manager benefits

- Shared information: Suppliers, customers and transporters get automatic real-time inventory overview via Internet or intranet
- Improved service with less labour
- Reduced need of staff
- Competitive advantages
- Online promotion of available tank capacity

Corporate management benefits

- Improved asset control and overview
- Improved reporting of trends and events
- Improved decision quality
- More profit

Safe way to let people manage your tanks.

are user-friendly viewed in all standard browsers, as are transactions and other historical events. Values, trends, utilization etc can easily be observed.

All users get unique usernames and passwords, giving access only to their own dedicated tanks.

The benefits are several: Added value for your customers, real-time asset control for your corporate management, and last but not least, less labour and more profit for you.

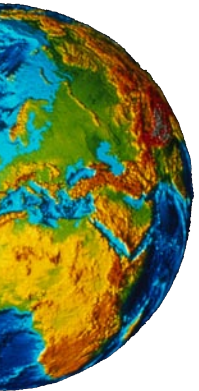

Terminal customer benefits

- Inventory control available 24 hours a day, at any location
- Improved logistics, optimized liquid bulk distribution
- Improved utilization of tank capacity
- Automatic event history overview

TankMaster.net features

- Web version of TankMaster, the tank inventory control software from Rosemount Tank Gauging
- Includes virtually all monitoring functions from TankMaster
- Fulfills all branch and legal requirements: API, CP etc
- Open system architecture based on OPC/OLE industry standard
