

Emerson ZV Solution Capability at its Jubail Facility

IN KINGDOM facility with vast capabilities

Emerson is pleased to have been selected as a technically and financially qualified vendor by Saudi Aramco for supplying 9-Com and ZV supplies.

Our 9,000 square-metre Jubail World Area Configuration Centre (WACC) has the local capability of providing Saudi Aramco with world-renowned electric, pneumatic and hydraulic actuator brands. In addition, we have the expertise to fully integrate these brands and other Emerson products with necessary accessories. We provide complete **Valve Operating Systems and Actuator Valve Packages for up to 36-inch quarter-turn valves** for **ON/OFF** Rotary (Ball, Butterfly) and Linear (Gate) types of Valves. All of our systems and actuated packages are fully tested and certified locally to our own high standards of excellence.

Emerson systems are capable of diagnostics and online partial stroke testing for safe operation within a **Safety Instrumented Systems (SIS)** environment. Our Jubail WACC has immediate parts availability and experienced technicians for any required in-facility or off-site service, including commissioning, startup and troubleshooting.

For more information about our complete products offering and available services, please contact us:
