## **Emerson Launches Roxar RMS 2010.1 Reservoir Modeling Solution**

*RMS 2010.1 adds seismic visualization for improved decision-making and quality control*

STAVANGER, NORWAY (August 26, 2010) -- Emerson Process Management announced the release of Roxar RMS 2010.1, adding powerful seismic visualization for improved decision-making and quality control within Emerson's industry leading reservoir modeling solution. Users will now be able to fully leverage their seismic data through every step of the seismic to simulation workflow, enabling critical decisions with less risk.

Roxar RMS 2010.1 adds advanced seismic volume visualization tools to the workflow - tools which facilitate thorough quality control of interpretations, structural and property models, simulation models, and well plans. The import of 2D and 3D seismic data is extremely easy and the modern visualization sets a new standard in performance by unleashing the power of modern graphic cards.

RMS 2010.1 also features improved quality control (QC) tools, offering an efficient and easy way to QC property models. With just a few button clicks, RMS 2010.1 will produce all the necessary charts and maps to check consistency between the property models and the input data, with the maps and charts intuitively organised in a separate data tree that provides easy access for both new and experienced RMS users.

"Our goal is to provide a completely integrated and intuitive workflow that is usable by all skill levels, whilst handling the geological complexity that Roxar RMS is famed for" said Ordin Husa, Managing Director of Roxar Software Solutions. "Today's announcement of RMS 2010.1 is another such milestone which further closes the gap in the workflow between seismic and simulation."

Emerson's flagship reservoir modeling solution, Roxar RMS comprises 13 fully integrated software modules, including mapping, reservoir modeling, well planning, reservoir simulation and uncertainty

modeling tools. RMS 2010.1 operates on Linux 64-bit, Windows XP and the Vista 32 and 64-bit platforms, as well as Windows 7 64-bit.

Emerson will be holding a technical forum on August 26<sup>th</sup> to highlight the benefits of the new release. The event will be taking place at Roxar's Stavanger headquarters from 2.00 pm to 6.00 pm. For further information on RMS 2010.1 visit [www.roxar.com/rms2010](http://www.roxar.com/rms2010) or on the forum, contact [rss@roxar.com](mailto:rss@roxar.com).

### **About Emerson Process Management**

Emerson Process Management ([www.emersonprocess.com](http://www.emersonprocess.com)), an Emerson business, is a leader in helping businesses automate their production, processing and distribution in the chemical, oil and gas, refining, pulp and paper, power, water and wastewater treatment, mining and metals, food and beverage, life sciences and other industries. The company combines superior products and technology with industry-specific engineering, consulting, project management and maintenance services. Its brands include PlantWeb™, Syncade™, DeltaV™, Fisher®, Micro Motion®, Rosemount®, Daniel®, Ovation®, AMSSuite, and Roxar™.

### **About Emerson**

Emerson (NYSE:EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions to customers in industrial, commercial, and consumer markets through its network power, process management, industrial automation, climate technologies, and appliance and tools businesses. Sales in fiscal 2009 were \$20.9 billion. For more information, visit [www.emerson.com](http://www.emerson.com).
