For your world-class plant, choose a high-performance service provider.

When you have got an issue with a control valve, maximize your uptime by making sure your valve repair stays repaired.

Our Service Centre and field capabilities cover both our own products and competitive products.
Fast Parts
Genuine Fisher parts are readily available from an Emerson sales office near you in Southeast Asia. Distribution centers in Asia, Europe, and North America maintain a significant inventory of genuine Fisher parts. The FisherFAST® program uses that inventory to provide you with the most timely and cost-effective delivery of your order.

Also available are convenient Fisher spare parts kits that contain the parts typically needed for routine valve maintenance. They simplify parts inventory management with the use of a single kit number versus individual part numbers.

Fisher Parts Support Personnel are ready to assist you in the management of your spare parts inventory, the control of plant and inventory costs, and improving the bottom line of your entire operation.

Equipment Startup
• Project management services
• Pressure regulating skill integration
• Factory acceptance tests
• Installation
• Loop validation
• Startup/commissioning
• Start-up assistance
• Valve installation
• Valve signature tests

Asset Optimization Consulting
• Reliability-based maintenance
  • Assessment and benchmarking
  • Program design and improvement
  • Program implementation

Education and Certification
• Onsite and classroom courses
  • Computer-based and self-paced learning
  • Certification to recognized industry standards

Service Delivery
• Same day
• Next day
• Seven day
• Week
• Month

SureServices® Portfolio
• System reliability maintenance & optimization
• Remote system diagnostic
• Guardian support
• Expert technical support
• Scheduled onsite service
• Alarm management solutions
• Emergency onsite service
• Training services
• Express module replacement
• Security assessment service

Asset Reliability Services
• Turnaround services
  • Pre-turnaround diagnostics services
  • Predictive diagnostics using AMS® Suite
  • Valve signature tests
  • Inline machining
  • Remote valve replacement
  • Onsite turnaround inventory

• Preventive services
  • Certified calibrations
  • Critical support routine services
  • Valve signature testing
  • Check/maintenance
  • Calibrations
  • Preventive maintenance

• Inventory programs
  • Inventory analysis
  • Inventory standardization
  • Inventory optimization

• On-demand services
  • Diagnostics
  • Repair
  • Remote valve replacement
  • Valve signature testing
  • Valve remanufacture and recertification

Natural Gas Skid Integration Centre
• Design and engineering of pressure regulating and metering systems
• Integration and testing

SureServices® Portfolio
• System reliability maintenance & optimization
• Remote system diagnostics
• Guardian support
• Expert technical support
• Scheduled onsite service
• Alarm management solutions
• Emergency onsite service
• Training services
• Express module replacement
• Security assessment service
