Valve Automation Technology
When and Where You Need It

TEC2 Electric Actuator With Model 500
Intelligent Electric Valve Actuation Made Simple (Model 500 Discontinued)
High Performance Digital Valve Control Made Easy

TEC2
Proven technology in electric actuation coupled with simplified digital controls, TEC2 is the next step in reliable high-performance digital valve control to make your work easier and safer.

Enhanced data-logging feature with time and date stamp features provide you with information to make effective and timely preventive maintenance decisions.

TEC2 Key Benefits:
• Advanced configuration, diagnostics and predictive capability through DCMlink™ remote diagnostic, configuring and monitoring software with integration path to AMS Device Manager, Delta V, Emerson PlantWeb
• Ease of Use and Service - Multiple languages, improved graphical display, patented remote module
• Non-Intrusive design & rugged ductile iron gear housing is shock and vibration-resistant
• Non-penetrating, vibration-resistant Hall Effect switches enable setup without opening control compartments
• Discrete, analog and digital controls availability
• Open network control for a wide range of topologies and protocols, including Modbus RTU, Profibus, FOUNDATION™ Fieldbus, DeviceNet™, Ethernet, HART™ and Wireless HART™

TEC2 * Certifications:
• F.M., C.S.A., CE, IECEx, GOST, InMetro, CEPEL, AWWA C542, ATEX
• Shock & Vibration (MIL-STD-167-1, MIL-STD-901D)
• IP68 certified for submersible applications (50 ft, 7 days)
• SIL

CE IP68
**Maximize Plant Efficiency and Safety Every Time**

- **Programmable Monitoring**: Performance data can be monitored to fix current problems and recorded to analyze future issues.
- **Safe, Convenient Calibration & Operation**: Patented Remote Display Module (RDM) allows control and monitoring up to 4,000 ft (1.2 km) away which is ideal for hazardous environments.

Reliable Process Insight For Every Application

Prevent untimely operation with a built-in inhibitor interlock system that prevents operation with other devices until external contact has been made. Your systems can now coordinate with each other.

If pump = on then open valve

Your displays need to show the right information without being too simple or complex. Easy to read IconoText displays and icons allow for an easy and intuitive setup.

If overtorque = true then stop all functions

Configurable process alarms are standard - TEC2 will alert you of any issues in your process and alarms can also be set to trigger open or close functions.

World Area Configuration Centers (WACC) offer sales support, service, inventory and commissioning to our global customers. Choose the WACC or sales office nearest you:
