

Gain Operational Data from Remote Assets

Zedi SaaS SCADA

Effortlessly integrate data from any source to rapidly enable better business decisions while increasing production, profits and sustainability.

Rapidly realize your production potential through cloud analytics, machine learning and mobility.

Getting end-to-end production data in real time from every sensor in the field is the key to optimizing your operations. Now you can provide your staff with secure, real-time, easy-to-read production data – anytime, anywhere. Driving stronger business decisions at every level.

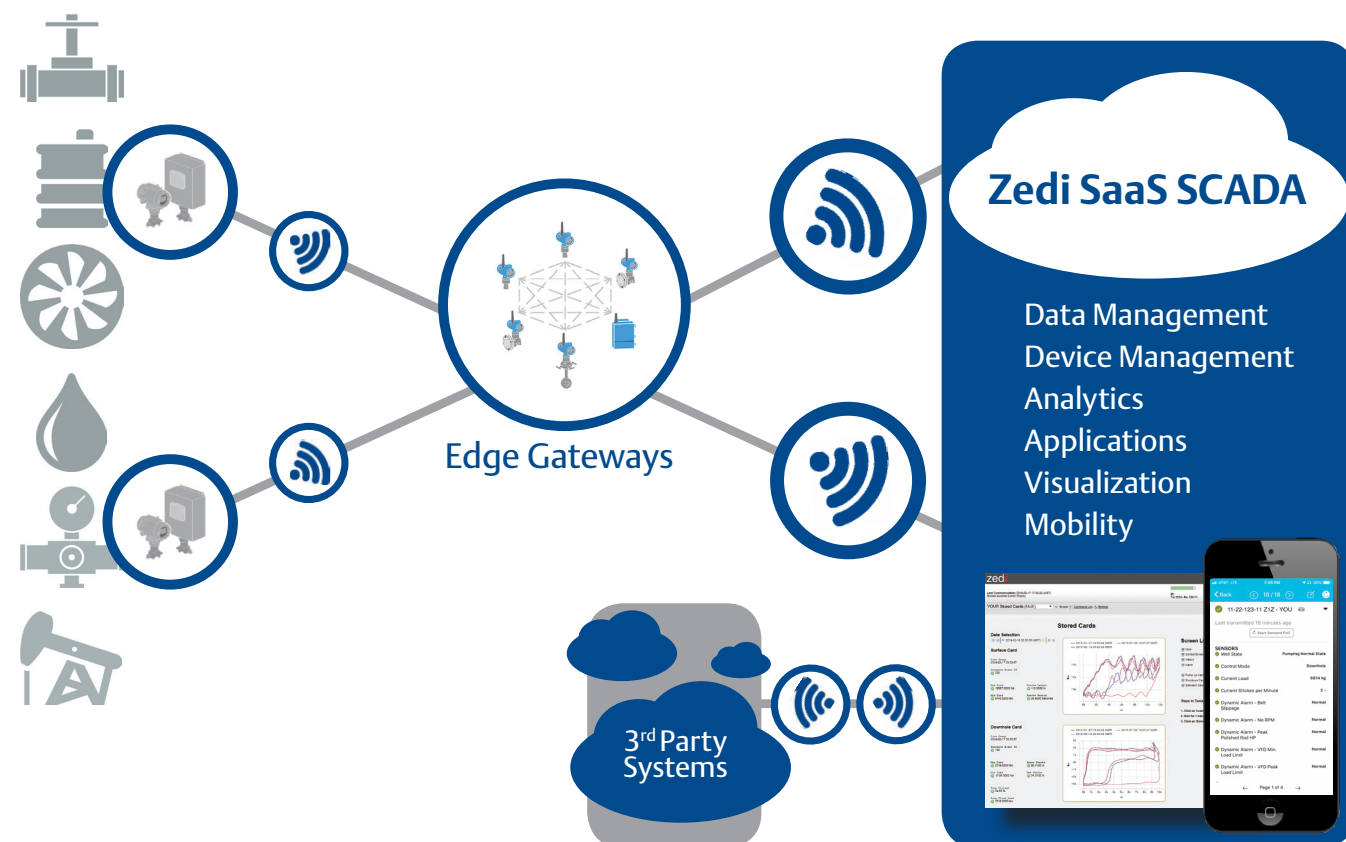

Emerson's secure, scalable Zedi SaaS SCADA enables operators around the world to compile data from any digital monitoring hardware via gateways that support a variety of protocols.

We provide end users with a web interface, as well as the ability to push data to third party platforms, allowing remote control and optimization via cloud-based data access.

Discover how our cloud solutions will help you better understand big data with vivid analytics while providing greater mobility.

Monitor & control assets in the field – anytime, anywhere.

Operational Data and Analytics

Real-world applications of how our Software as a Service (SaaS) solutions are built to provide Operators and authorized end users to have anytime, anywhere access to remote asset data.

Pipeline Leak Detection

Quickly get alarms for potential leaks, while reducing costly false alarms and wasted trips to site. Engineered with machine learning and artificial intelligence to adjust to historical operations to provide the confidence that you're meeting regulatory compliance, and HSE.

Tank Monitoring and Control

Easy to read data and visibility to your tanks with sensor points showing current volume or levels, with alarms if things go wrong from anywhere, anytime.

Rod Pump Monitoring and Control

Reduce site visits while increasing your safety, profitability and uptime. Easily monitor your Rod Pump from anywhere with simple, easy to read data. Our advanced Cloud SCADA enables any problem to be mitigated; from over/under pumping to loading and balancing issues.

Plunger Lift Monitoring and Control

Increase overall liquid production from lower pressure wells, resolve liquid buildup in tubing and slugging in gas wells and solve reservoir pressure decline with alarms, reporting and trending with analytics for optimization.

Compressor Monitoring and Control

Connects any compressor system, with or without an integrated controller to provide increased operational efficiency and safety, reduced fuel costs, higher productivity, reduced downtime, efficient maintenance, and increased environmental results.

Video Surveillance

Visual monitoring and analytics enables you to confirm field assets are operating properly, while strengthening site security and faster response time.

Software as a Service

Unlock the most value from your data with our SaaS SCADA

Easily and seamlessly access current, user-friendly data for real-time, accurate decision-making gains. Our software applications are delivered as a service to ensure you always have the latest enhancements, secure storage and full support. Increase profitability and operational excellence for better performing assets, streamlined compliance, and optimized resources.

Acquire, manage, and analyze your asset data while ensuring compliance

- Unlimited users, no seat or site licenses required
- 24/7/365 customer support
- Application upgrades
- User training
- Access anytime, anywhere
- Mobile app Zedi Go
- Business continuity
- Infrastructure management
