TopWorx™ GO™ Switch is the most versatile sensing solution. It detects like a proximity switch and functions like a limit switch, providing higher reliability when conventional switches fail.
Emerson is a global leader in valve control and proximity sensing for the process industries. Our Topworx solutions enable plants, platforms, and pipelines to manage and control operations more intelligently and efficiently under the most demanding and extreme conditions.

**Global Technology Leadership**
The technology advancements in TopWorx products are at the forefront of innovation in the process automation industry. TopWorx products use wireless technologies and fieldbus protocols such as FOUNDATION Fieldbus, DeviceNet, AS-Interface, Profibus, and HART to reduce installation costs and enable predictive maintenance.

**Global Hazardous Area Certifications**
In addition to high temperature +204 °C (+399 °F), cold temperature -50 °C (-58 °F), and sub-sea 7,010 m (23,000 ft) applications, TopWorx products are suitable for use in Flameproof/Explosion Proof, Non-Incendive, Intrinsically Safe hazardous areas with IECEx, ATEX, GOST, InMetro, UL, CSA, KOSHA, and NEPSI certifications.

**Global Service & Support**
With company locations in the United States, United Kingdom, South Africa, Bahrain, and Singapore, Emerson is strategically positioned to provide outstanding support. In addition, over 200 Certified Product Partners throughout the world are available to provide competent local support when needed.
High Reliability Applications

GO Switch provides reliable, durable proximity sensing in the most demanding conditions. Using unique technology, GO Switch outperforms all other types of sensors in applications that require high reliability and durability.

Capabilities

• Superior current rating
• Superior pressure rating
• Superior temperature rating
• Superior hazardous area ratings
• Superior resistance to physical abuse
• Superior resistance to corrosives, salt water

With GO Switch, customers enjoy:

• One-of-a-kind technology that offers high current ratings, AC/DC and NO/NC wiring flexibility and non-contact detection of ferrous metal and magnetic targets.
• Global certifications for use in Zone 0 (intrinsically safe), Zone 1 (explosion proof), Zone 2 (non-incendive) Class I, Div. 1 & 2, Class II, Div 1 & 2 and Class III hazardous areas.
• Proven reliability in power generation, chemical, refineries, steel & aluminum, water & wastewater, oil & gas, petrochemical, food & beverage, pulp & paper, heavy equipment, mining, military vehicles, manufacturing, amusement parks, and material handling industries.
• Durability in mission-critical applications in extremely hot, cold, wet, dirty, abusive, corrosive, and explosive environments.
### GO™ Switch Capabilities

**Common Features & Benefits**

Using a unique technology, GO Switch outperforms conventional limit switches and proximity sensors in the toughest applications.

- **Features**
  - Proximity triggering with ferrous metal and magnetic targets - no exposed moving parts
  - Extended sensing with use of target magnets
  - Immune to electrical noise, weld fields, and radio frequency interference
  - Consume no power to operate
  - Can be wired AC or DC, N/O or N/C, in series or parallel
  - All-metal housings with contacts potted and sealed from the environment
  - Multiple wiring options, including lead wires, cables, quick disconnects, etc.
  - A wide variety of hazardous area certifications for Zone 0, 1, 2 and Class 1 & 2, Div 1 & 2
  - Operating temperatures ranging -50 °C to +204 °C (-58 °F to +400 °F).

- **Solutions**
  - Eliminate broken or bent lever arms, poor mechanical alignment, and poor repeatability
  - Eliminate the need to purchase/acquire a different device to obtain extended sensing
  - Eliminate electrical problems common to inductive proximity sensors
  - Eliminate leakage current and voltage drops
  - Flexibility to cover a variety of application needs with fewer part numbers
  - Performance is not affected by dust, dirt, moisture, or most caustics, corrosives, or chemicals
  - Easy installation and seamless integration into your existing plant wiring standards
  - Compliance with intrinsically safe, explosion proof, and non-incendive requirements
  - Ability to monitor plant processes in areas too hot or too cold for conventional sensors

GO Switch models 11, 21, 31 and 81 are the ideal replacements for traditional mechanical limit switches. Sealed contacts, rugged housings, non-contact detection of ferrous metal & magnetic targets, and snap action response make these switches the ultimate problem solvers for troublesome mechanical limit switch applications.

Seesaw armature provides **snap action** and solid contact pressure, eliminating ‘contact teasing’ and ‘contact chatter’ in high vibration applications.

Optional 316L Stainless Steel housing withstands physical abuse, moisture, and corrosives.

Sealed contact chamber prevents moisture or dust from reaching the contacts.

Potting fills the entire switch cavity, forming a barrier against moisture.

Conduit hub can be located in any of 5 positions for versatile installation.

Consumes no power to operate and has no current leakage or voltage drop.

Side sensing range can be extended to nearly 4” using external target magnets.

Multiple wiring options:
- Terminal Block
- Lead Wires
- Subsea
- Cable
- Quick Disconnects

Versatile gold flashed contacts are suitable for high and low electrical loads, and can be wired AC or DC, N/O or N/C.

GO™ Switch-Extended Sensing
Built to last in the most demanding conditions
Models 11, 21, 31, and 81 were the world’s original GO Switches. Their simple design, rugged housings, long sensing ranges, and global approvals make these switches the ideal choice wherever reliable proximity sensing is needed. Some features common to all these models include a standard operating temperature range of -50 °C to 105 °C (-58 °F to +221 °F) and gold-plated SPDT dry contacts.

**Model 11**
- **Features**
  - Single Pole Double Throw (SPDT)
  - 5A/240VAC, 10A/120VAC, 3A/24VDC
  - AC/DC, NO/NC Wiring Flexibility
  - -50 °C to 105 °C (-58 °F to +221 °F) operating temperature
  - 10 mm (3/8 in) sensing distance (ferrous metal)
  - Dry Contact
  - Intrinsically Safe
  - Side sensing
  - Gold Plated Contacts

- **Options**
  - High Temperature: -50 °C to +176 °C (-58 °F to +350 °F)
  - 316L Stainless Steel Housing
  - Extended Sensing: 14 mm (9/16 in)
  - Terminal Block, Lead Wires, or Cables
  - Latching Contacts
  - SubSea Connectors
  - Quick Disconnects - Micro or Mini
  - Global Hazardous Area Approvals

**Model 21**
- **Features**
  - Single Pole Double Throw (SPDT)
  - 5A/240VAC, 10A/120VAC, 3A/24VDC
  - AC/DC, NO/NC Wiring Flexibility
  - -50 °C to 105 °C (-58 °F to +221 °F) operating temperature

**GO™ Switch - Precision Sensing**  
Built to last in the most demanding conditions

With all stainless steel construction, flexible AC/DC, NO/NC, and SPDT/DPDT contact configurations, superior corrosion resistance, and global certifications for all hazardous areas, 70 Series GO Switches outperform inductive proximity switches in the toughest applications.

- End sensing range can be extended using external target magnets.
- Sensing face is stainless steel rather than plastic, preventing damage due to incidental physical contact.
- Three magnets provide snap action and solid contact pressure, eliminating 'contact teasing' and 'contact chatter' in high vibration applications.
- Sealed contact chamber prevents moisture or dust from reaching the contacts.
- Unique sawtooth contacts are suitable for high and low electrical loads, and can be wired AC or DC, N/O or N/C.
- Potting fills the entire switch cavity, forming a barrier against moisture.
- Consumes no power to operate and has no current leakage or voltage drop.
- Multiple wiring options: - Lead Wires - Cable - Subsea - Quick Disconnects

Discrete valve control sensors

35 Series GO Switches have set the standard for reliable performance in valve monitors. With hermetically sealed contacts, low hysteresis, and superior resistance to vibration, moisture, contaminants, and temperature extremes, the 35 Series clearly outperforms any other valve monitoring switch or sensor available. When ordering valve position monitors and switchboxes, be sure to specify GO Switch.

Features
- AC/DC, NO/NC flexibility
- Intrinsically safe
- Hermetically sealed contacts

Options
- SPDT rated 4A/120VAC and 3A/24VDC (Copper coated with flat black lacquer)
- DPDT rated 4A/120VAC and 3A/24 VDC (Stainless steel housing)

Hydraulic/pneumatic cylinder end-of-stroke sensors

Stroke-To-GO cylinder proximity sensors provide precise end-of-stroke position indication on pneumatic and hydraulic cylinders. Designed to exceed automotive industry standards, the housing is machined from stainless steel bar stock to handle pressures to 3,000 PSI (206 bars) operating (tested to UL’s 4X burst requirement) while withstanding the extreme external conditions such as weld slag, coolants, cutting fluids, physical abuse and even high temperatures. Stroke-to-GO incorporates the same 70 Series GO Switch mechanism that has been proven in the field in the most rigorous applications. This unique design offers the greatest benefits in cylinder position end-of-stroke indication.

Features
- SPST or SPDT contacts
- AC/DC, NO/NC flexibility
- Stainless steel housings
- 3,000 psi (206 bars) operating pressure
- -50 °C to +105 °C (-58 °F to +221 °F) operating temperature
- 360° adjustable

Options
- -50 °C to +204 °C (-58 °F to +400 °F) high temperature
- Quick disconnect connector
- Underwater capabilities
- LED indication
**Submersible sensors**

GO Switch submersible sensors are submersible up to depths of 7,010m/23,000ft and offer trouble-free position sensing in applications such as offshore oil platforms, lock and dam gates, ships and vessels, pin placement detection, wastewater rendering areas, bilge level, high pressure washdown, draw bridges and subsea valve position monitoring.

**70 Series junction head**

GO Switch models 71, 73, 75, 77, 7G, and 7I are available with a junction head option. The junction head carries an ATEX/IECEX ‘e’ coding. Combined with the GO Switch’s ATEX/IECEX ‘d’ coding, the complete GO Switch, junction head assembly carries an Ex ‘de’ coding. The Ex ‘de’ coding gives the GO Switch, junction head assembly an increased safety rating helping to reduce installation costs in Zone 1 hazardous areas. This option allows for termination directly into the switch.

**Pneumatic valve**

GO Switch Model 7A is a pneumatic valve designed to work with a 60 PSI air pilot signal. Incorporating the same GO Switch technology found in our popular model 70 series GO Switches, the 7A offers reliable pneumatic control in air logic systems. The 7A uses three permanent magnets and a push-pull plunger assembly to control a poppet. The switch operates with a snap-action response and low hysteresis, providing precision airline switching. This unique technology allows for non-contact detection of ferrous metal and magnetic targets to switch from the outlet port to the exhaust port.

**Features**

- 3-port design (P = Supply, A = Outlet Port, E = Exhaust)
- 1.5 mm (0.062 in) Sensing distance (Ferrous metal)
- -40 °C to +105 °C (-40 °F to +221 °F) operating temperature
- Intrinsically safe
- Operates small cylinders
- 60 PSI (4 bars) max air supply
- 3.5 SCFM nominal flow rate

**High temperature sensors**

GO Switch HiTemp sensors are rated for continuous operation in temperatures up to 204 °C (400 °F). This proves especially useful in steam turbines as well as other high heat applications such as driers, boilers, aluminum die-casting, steel processing and valve position monitoring on steam valves.

**Features**

- Light-weight aluminum and stainless steel junction heads
- -40 °C to 100 °C (-40 °F to 212 °F) operating temperature
- Intrinsically safe
- Zone 1, Ex ‘de’
GO™ Switch Power Plant Solutions
Sensing Solutions for the Power Generation Industry

GO Switches are the ideal solution for troublesome mechanical limit switch applications in power plants, including coal and ash handling equipment, soot blowers and wall blowers, dampers, igniters, feedwater heaters, hopper valves, water demineralization valves, and scrubber valves.

DEFENDER™ turbine trip monitors

In the power generation industry, reliability is a must. This is especially true when it comes to turbine control valves. But one of the more common difficulties in power plants is the typical limit switch arrangement on throttle, governor, intercept, and reheat stop valves. Conventional limit switches in this application are notorious for failing due to heat and physical abuse, and for falling out of tolerance and requiring readjustment.

The Defender provides dependable monitoring of throttle, governor, intercept, and reheat stop valves.

It is a self-contained, pre-wired system packed with up to ten GO Switches and is a drop-in replacement for existing limit switches on Westinghouse valves, and is easily adaptable to valves from General Electric and others.

Features

- Easy switch setting
- Switches rated to 204 °C (400 °F)
- Mil spec quick disconnect
- Heavy duty 11 Guage Steel (12”x10”x5”)

TURBINE TRIP MONITOR SWITCH SYSTEM
TopWorx GO nuclear qualified sensors

GO Switch Nuclear Globally Qualified Sensors are designed for maximum, long-life dependability in Containment LOCA, Containment Non-LOCA (Harsh Duty), and Mild Duty applications. Unique and robust, the GO Switch is a “Set and Forget” sensor that will replace and exceed the operation and reliability of lever arm mechanical switches in Nuclear and Commercial applications.

Advantages of GO Switch Nuclear Qualified Sensors
- By far the highest, most up to date environmental qualifications for qualified life, temperature, pressure, seismic and radiation
- Direct replacement for most mechanical switch applications
  - Contact output N/O N/C AC or DC
- No physical contact is required
- Only one internal moving part
- No lever arm to adjust
- Not affected by most caustics or chemicals
- Water-proof/submersible options
- Explosion-proof options
- Not influenced by RFI and EMC
Quick Disconnects & Cordsets

Quality-engineered connectors and cordsets make installation and maintenance a snap. Standard designs are shown, with custom connectors available on special order. Refer to the Wiring Options portion of each GO Switch Ordering Guide for detailed information.

**Micro Change™ Quick Disconnect**
22 gauge (3 pin .23” dia.; 4 pin .25 dia.; 5 pin .26 dia.) molded PVC anodized aluminum shell rated 105 °C (221 °F) 300V
Available on all GO Switches

**Mini Change™ Quick Disconnect**
16 gauge (3 pin .41” dia.; 4 pin .44” dia.; 5 pin .52” dia.; 7 pin .54 dia.) molded PVC anodized aluminum shell rated 105 °C (221 °F) 600V
Available on most GO Switches

**Water Resistant Squeeze Connector**
Stainless steel water resistant strain relief. Approx. 25 mm (1 in) in length.
Available on GO Switch Models 72, 74, 76, 7C, 7D, 7E and 7F

**High Pressure SubSea Quick Disconnect**
Molded Neoprene™ Quick Disconnect with Delrin™ lock-sleeves. Provides water-tight seal, safety and quick change-out. Overall length of connector is 74 mm x 31 mm (2.9 in x 1.23 in) dia.
Available on 10, 20, 70, 80 Series and Stroke to GO Switches.
Mounting Brackets

Standard mounting brackets are available to cover most GO Switch installations. They are designed to provide secure installation without interfering with the operation of the switch.

**Heavy Duty Mounting Bracket**
Side mount bracket for 10 Series GO Switches

**Universal Mounting Bracket for 10/20 Series**
Universal mounting bracket for 10 Series and 20 Series GO Switches

**Combination Cover Plate and Mounting Bracket**
Bottom mount for 10 or 20 Series GO Switches

**Universal Mounting Bracket for 80 Series**
Side mount bracket adapts 80 Series GO Switches for rotary valve position indication

**Strap Bracket**
Strap brackets for 30 Series GO Switches

**Heavy Duty “L” Mounting Bracket**
“L” bracket for 70 Series Model 73, 74, 75, 76 & 7G GO Switches

**Cover Plates**
Cover plate for 10 and 20 Series GO Switches. Bottom mount cover plate/conduit for 10 and 20 Series GO Switches. Furnished with gasket and screws

**Jam Nuts**
Nickel plated brass jam nuts for 70 Series GO Switches

**Parker Seal Nut and Washer**
ThredSeal Kits for 70 Series GO Switches. Zinc plated steel with nitrile rubber (standard) or Viton (hi-temp or hydraulic fluids detergent) washer

**Sealant Tape**
Grafoil sealant tape for 70 Series GO Switches. Forms a leak-tight temperature stable joint. Recommended for high pressure and/or high temperature
Target Magnets

Standard magnets are available to increase the sensing distance of any GO Switch model. This feature gives the customer the flexibility of using the magnet as the target and increasing the sensing distance up to 10 times that of ferrous metal targets.

**AMP3 Magnet/Resin Cover**
AMC3 magnet in plastic molded bracket with mounting holes. 22 mm (7/8 in) x 65 mm (29/16 in) x 13 mm (17/32 in) thick with 6 mm (7/32 in) holes.

For all GO Switches

**AMS7 Magnet/Stainless**
Magnet assembly. 50 mm (2 in) x 13 mm (1/2 in) 7/16-20 UNC threads.

For 70 Series GO Switches

**AMS4 Magnet/Stainless Cover**
AMC4 magnet molded into stainless steel cover, with mounting holes. 32 mm (1-1/4 in) x 37 mm (17/16 in) x 25 mm (1 in) thick with 5 mm (3/16 in) holes.

For all GO Switches

**AMS12 Magnet**
Magnet assembly. 66 mm (2-3/5 in) x 22 mm (7/8 in) 7/16-20 UNF threads.

For 70 Series GO Switches

**AMC5 Magnet/Stainless Cover**
AMC1 magnet molded into stainless cover with mounting holes. 22 mm (7/8 in) x 65 mm 29/16” (13 mm) thick with 7/32” (6 mm) holes.

For all square GO Switches

**AMF6 Magnet (Machinable)**
Flexible sensing amplifier/external magnet. 76 mm (3 in) x 305 mm (12 in) x 3/8” (10 mm) thick.

For all square GO Switches

GO™ Switch – The all-in-one proximity sensor and limit switch.

GO Switch provides reliable, durable proximity sensing in the most demanding conditions. Using unique technology, GO Switch outperforms all other types of sensors in applications that require high reliability and durability. The most versatile sensing solution. It detects like a proximity switch and functions like a limit switch, providing higher reliability when conventional switches fail.
