ToPWorx™ DISCRETE VALVE CONTROLLERS
POSITION MONITORING AND CONTROL OF AUTOMATED ON/OFF VALVES

- Suitable for use on rotary and linear applications
- Certified for use in all hazardous areas
- Integrated solutions (bus + sensors + pilot)
- Technology leadership in fieldbus networks
TopWorx™, a business within Emerson™, is a global leader in on/off valve control and position monitoring for the process industries. Our solutions enable plants, platforms, and pipelines to manage and control operations more intelligently and efficiently under the most demanding and extreme conditions.

**GLOBAL TECHNOLOGY LEADERSHIP**
TopWorx™ technology advancements are at the forefront of innovation in the process automation industry. TopWorx™ uses wireless technologies and fieldbus protocols such as FOUNDATION Fieldbus, DeviceNet, AS-Interface, Profinet, and HART to reduce installation costs and enable predictive maintenance.

**GLOBAL HAZARDOUS AREA CERTIFICATIONS**
In addition to high temperature (175°C), cold temperature (-60°C), and sub-sea (6,800 meters) applications, TopWorx™ products are suitable for use in Flame-proof/Explosion Proof, Non-Incendive, and Intrinsically Safe hazardous areas with IECEx, ATEX, EAC, InMetro, UL, CSA, KOSHA, and NEPSI certifications.

**GLOBAL SERVICE & SUPPORT**
With company locations in the United States, United Kingdom, South Africa, Bahrain, and Singapore, TopWorx™ is strategically positioned to provide outstanding support. In addition, over 200 Certified Product Partners throughout the world are available to provide competent local support when needed.

Visit www.topworx.com for comprehensive information on our company, capabilities, and products – including model numbers, data sheets, specifications, dimensions, and certifications.
TopWorx™ discrete valve controllers enable automated on/off valves to communicate via FOUNDATION Fieldbus, DeviceNet, AS-Interface, Profibus, HART and Wireless HART protocols. They attach to all rotary and linear valves and actuators, operate in the most demanding environmental conditions, and carry a variety of hazardous area certifications.

Discrete Valve Controllers for:
- Any bus network
- Any hazardous area
- Any valve or actuator
- Anywhere in the world

TopWorx™ valve control solutions deliver on today’s new customer requirements. With the TopWorx™ program, customers enjoy:

- A complete line of valve controllers and monitors for every protocol, application, environment, and hazardous area.
- The world’s leading selection of valve networking products, including FOUNDATION Fieldbus, DeviceNet, AS-Interface, and Profibus.
- The most reliable and durable valve position sensor on the planet, the GO™ Switch.
- On/Off valve control and indication through wireless technology.
- Quality products with global agency approvals including IECEx, ATEX, CE, UL, CSA, as well as NEPSI, KOSHA, InMetro, PESO and EAC.
- The unmatched process experience and bus networking expertise of TopWorx™, the leading provider of valve control and position sensing solutions for the process industries.
TopWorx™ D-Series discrete valve controllers are certified for use in every world area. They carry IECEx, ATEX, and UL certifications in a single model, making it easier for global customers to standardize across plants in multiple world areas. Other certifications available include NEPSI, KOSHA, InMetro, and EAC.

D-Series discrete valve controllers can survive in virtually any plant condition. Their heavy-duty construction and corrosion resistance enable superior performance in the most demanding applications.

### The D-Series is Built Tough!

Designed to provide reliable service for a lifetime, the D-Series has been built to last in the most demanding applications, and endurance tested for over 3.5 million cycles to prove it.

- **Wet**
  Tested against intense water pressure blasts and complete submersion underwater for 96 hours at a depth of 30 meters.

- **Hot**
  Tested for long-term functionality in temperatures up to 176°F/80°C

- **Cold**
  Tested for endurance in temperatures down to -76°F/-60°C

- **Dirty**
  Tested in dust chamber and proven dust tight

- **Abusive**
  Tested against the “300 pound man step test” and proven impact and step resistant

- **Corrosive**
  Tested against hundreds of corrosive and caustic elements and proven to resist deterioration or chipping

- **Explosive**
  Tested by UL and Sira for use in explosive environments with no seal-off fittings required (DXP, DXS)

- **Chemical Compatibility**
  Tested against hundreds of chemicals with varying exposure times, temperatures, and concentrations. Please contact factory for compatibility information.

TopWorx™ T-Series switchboxes deliver outstanding value by providing full functionality in compact, direct-mount enclosures.

Available with a variety of position sensors, integral solenoid valves, and bus networks, the T-Series is suitable for use in all hazardous areas and carry IECEx, ATEX, and UL certifications.

The TopWorx™ T-Series Delivers Outstanding Value
Designed to provide maximum functionality in a compact form factor, the TopWorx™ T-Series has a number of unique features that save space, time, and money.

Optimum Use of Space
The unique layout supplies ample working space inside the enclosure for wiring and setting of the switches while taking up very little space above the actuator.

Low Profile Design
The unique direct-mounting feature eliminates expensive mounting brackets while reducing the height of the switchbox and the overall footprint above the actuator.

TwistSet™ Cams
Unique TwistSet cam design allows easy access and accurate stepless setting of sensor position with minimum hysteresis. Color-coded strikers enable quick identification of open/closed switches. Includes locking feature to ensure no target migration.

Direct Mounting
Unique mounting design enables simple attachment to any ISO/NAMUR actuator without the need for expensive mounting brackets.

The T-Series direct mount feature helps to reduce cost by omitting the need for custom brackets.
Solid Enclosures for Every Environment
• Aluminum, Composite, Stainless
• Up to four conduit entries (English or Metric)

TOPWORX™ CUSTOM PRODUCTS
Engineered for your special application

**SUB-SEA**

**KSS**
- DUPLEX and SUPER DUPLEX

**KCS**
- Carbon steel with custom specified coating

**Applications**
- Depths up to 2500 meters.

Enclosures are available in a range of materials including carbon steel, 316L stainless steel, 254SMO stainless steel (20%Cr–18%Ni–6%Mo), Duplex 2205 and Super Duplex

Available with a wide variety of switches in combination with a 4-20ma transmitters and HART

Custom penetrations can be accommodated to accept a customer specified sub-sea connector or cable entry

**Applications**
- Rig positioning
- Sub-sea emergency shut down
- Manifold valves and taker loading or balancing
High Vibration
- Custom #7338
- Engineered for high vibration applications
  - Locked-in target magnets
  - Samarium Cobalt target magnets provide a powerful magnetic field that will ensure strong contact pressure
- Available with (2) SPDT GO™ Switches

Applications
- Compressor Stations
- Pump Stations
- Pipers with water hammer
- Flow induced vibration

Example: DXS-L21GNEB000007338
Sensor-Communication Modules
TopWorx™ Sensor-Communication Modules are microprocessor based ‘brains’ that mount inside TopWorx™ enclosures to deliver position sensing and bus networking functionality to on/off valves. They combine position sensors, bus communications, solenoid outputs, and wiring terminals into a compact, sealed module that drops into various TopWorx™ enclosures.

SCM Features:
- Short-circuit protection
- Resistant to impact, moisture, shock, vibration, contamination
- LEDs indicate valve position and facilitate sensor set-up

Bus Networks
TopWorx™ Sensor-Communication Modules make it easy to connect automated on/off valves to modern bus networking protocols such as FOUNDATION Fieldbus, DeviceNet, AS-interface, Profibus, and HART.

![FOUNDATION Fieldbus](image1)
![ASi](image2)
![DeviceNet](image3)
![HART](image4)
![Profibus](image5)
**FOUNDATION FIELDBUS**
- Factory programmed with: (2) DI, (1) DO, (1) AI, (1) PID, with the ability to add 10 new function blocks.
- Pre-defined templates, on-board diagnostics, and EDDL-enhanced on-board diagnostics.
- Consumes only 17mA to operate, reduces VCRs and DSTs required.
- Local calibration button for factory setting open and closed position.
- Position feedback via DO readback reduces number of function blocks.

**HART 7**
- Local user interface via Graphic LCD
- Selectable endpoint hysteresis +/- 3%
- Internal device temperature monitoring
- Supports NE-107 and NE-43
- Five-point valve position calibration
- Polarity and overvoltage protection
- Full options of alarms and counters to diagnose potential device problems
- Burst Mode and Event Notification
- Point to Point and Multi-drop mode

**MONITORING FEATURES**
- The two built in cycle counters, a life cycle counter and adjustable counter, with high limit alarm that gives the user needed information to implement a preventative maintenance strategy.
- With built in timers that record valve time in open position, open travel time, and close travel time allowed for failure prediction by trending opening and closing times.

**CALIBRATION SWITCH**
Equipped with a local calibration button for pre-installation function testing of the valve actuator package. This ensures that all valve automators can function test packages before installation without having to purchase expensive test equipment. LEDs indicate correct position setting of the switches.

**DeviceNet**
- 3 Discrete Inputs, 2 Discrete Outputs, 1 Analog Input
- Rockwell, Emerson DeltaV approved
- On-board diagnostics and early warning LEDs

**PROFIBUS**
- ASi 2.1 with up to 4 Discrete Inputs and 3 Discrete Outputs
- Early warning LEDs

**HART**
- Profibus DP V0
- 4 Discrete Inputs
- 2 Discrete Outputs
- Early warning LEDs
- Digital confirmation of analog signal
- Auto-calibration via handheld
TopWorx™ provides the industry’s leading selection of valve position sensors, including GO™ Switch leverless limit switches, proximity sensors, mechanical limit switches, potentiometers, and 4-20mA position transmitters.

### All-In-One Proximity Sensor and Limit Switch

GO Switches are hermetically sealed to outperform all other position sensors in hot, cold, wet, dirty, abusive, corrosive, and explosive conditions. GO Switches deliver best-in-class capabilities:

- Highest amp rating (4amp/120vac, 3amp/24vdc)
- Highest temperature rating: 105°C
- Up to four GO Switches inside
- Hermetically Sealed contacts
- SPDT, DPDT, and Stainless Steel options
- Proximity operation – nothing to jam, bend, break, or wear out
- Resistant to electrical noise, radio frequency interference, dust, dirt, and most chemicals
- No leakage current, not voltage or polarity sensitive
- Simple device – inherently intrinsically safe with barrier
- Unlike Reed Switches, Gold flashed contacts allow for use in both low and high current applications within a single switch

Unique cam design allows quick and accurate setting of the GO Switch positions reducing deadband and hysteresis to a minimum. Switches can easily be set in the mid-position for control applications such as 3-way ball valves or diverter valves.

### New GO™ Switch Option in T-Series

Introducing an exciting new GO™ Switch offering in the T-Series line. This new GO™ Switch offers the same reliability as existing GO Switches with improved features and benefits. The 36 GO™ Switch will offer the option of having (4) SPDT hermetically sealed switches and an integrated solenoid, giving the user a fully integrated product for on/off valve automation.

Features:
- Fully encapsulated switch cluster
- Hermetically-sealed contacts
- Ex e terminal strips (push type terminals) integrated into the switch cluster
- 1A@24VDC, 3A@24VDC, and 4A@120VAC options
- Tested to 1-million cycles at PLC loads
- Immune to electrical noise
TopWorx™ provides a portfolio of self-contained ASCO pilots and spool valves to control pneumatic actuators. ASCO spool valves are specially designed to stay open for long periods of time and close when needed. The ASCO unique design combines hard T-seal and flexible o-rings, provides bubble-tight shutoff, resistance to dirt, and multimillion cycle life controlling air or inert gas, making them a perfect fit for any application.

**PILOTS**
- Internally mounted for protection from the environment
- Low Power Solenoid or Ultra-Low Power Piezo pilots
- Single or Dual Pilots
- Fail open, Fail closed, Fail in last position
- 50 million cycle minimum life
- Class F coil insulation
  (Class H available on request)
- Response time 10mS

**VALVE BODIES**
- Anodized Aluminum
- 316 Stainless Steel

**FLOW RATES**
- .86 or 3.7 Cv

**MANUAL OVERRIDES**
- Momentary/Latching

**SPECIAL ASCO SEAL DESIGN WITH T-SEALS ARE DESIGNED TO:**
- Reduce leakage by applying more pressure to a smaller area around the spool sealing surface
- Self-cleaning design and less sensitive to particulate contamination in the medium
- Provide a dynamic wiping action making them better suited to spool valves than plain “o-rings”
- Eliminate “stiction” with smaller contact area and higher contact pressure provided by the cushioning rings located behind the T-seal

**FLAME ARRESTORS**
These double as in line filters, protecting the pilot against damage caused by dirty air. This design also allows the users to replace or work on the external valve in situ without affecting the integrity of the explosion proof enclosure.

Integrated metal manifold with color coded tubing for supply and work to allow for easy of trouble shooting. In case of a solenoid failure easily diagnose the failed component: pilot or spool.
TopWorx™ SIL-3 ESD Valve Controllers provide a complete Partial Stroke Test Solution with unique features and functionality that enable partial stroke testing of emergency shutdown valves without disrupting or shutting down the process.

The TopWorx™ Partial Stroke Test Solution comes complete with:
- Sensor Control Module to partially close the valve without disrupting the process
- Pass/Fail indication via high/low response on the return signal
- Open and Closed position sensors for feedback to the DCS or PLC
- Onboard Diagnostics to enable predictive maintenance and early-warning alerts
- Aluminum, Composite, and 316 Stainless Steel platforms certified for use in Flameproof/Explosion Proof, or Non-Incendive hazardous areas
- An optional local, lockable partial stroke Test Button integral to the unit

The TopWorx™ Partial Stroke Test Solution provides Onboard Diagnostics to alert the user to the following Dangerous Failures:
- Valve packing/shaft damage
- Actuator spring fatigue/breakage
- Solenoid pilot exhaust blockage
- Solenoid spring failure
DXP Tropicalized Aluminum Flameproof/Explosion Proof

DXS 316 Stainless Steel Flameproof/Explosion Proof

Capabilities
- Suitable for use in SIL-3 applications
- Certified for use in hazardous areas
- Integrated solution with all controls in a single housing
- Onboard diagnostics for performance validation
THE STAINLESS STEEL, 35-SERIES GO™ SWITCH
Hermetically-Sealed, Stainless Steel, DPDT Proximity Switch

For over fifty years, GO™ Switch, all in one proximity sensor and limit switches, have set the standard for reliability and durability in the process industries. Their unique operating principle and best-in-class capabilities have made them the most specified switch in the world for demanding process applications.

TopWorx™ has once again improved on greatness.
The 35-Series GO™ Switch is available in two versions: The original Single Pole Double Throw GO™ Switch or the stainless steel, Double Pole Double Throw, version.

Features:
- One-piece, stainless steel housing
- Hermetically-sealed, Double Pole Double Throw contacts
- Suitable for both Ex d and Intrinsically Safe applications
- Up to four (4) switches in a single enclosure
- Extremely low hysteresis
- PLC and higher current ratings with AC/DC
  - NO/NC wiring flexibility
- 4amp/120vac and 3amp/24vdc
- Available with SOV and HART options
4-20mA POSITION TRANSMITTER

- Fully potted electronic module with LEDs and Auto Calibration feature
- Precise setting of the zero and span can be done in seconds for both CW and CCW rotation with a simple push button
- Position feedback sensor is mounted directly to the switchbox shaft eliminating backlash caused by traditional gear train
- Up to 300° rotation for choke valve applications
- The need for re-calibration is eliminated
- Available with GO Switches

DXP AND DXS WITH IEC/ATEX IIC CERTIFICATION
The Only IIC Valve Controller with an Integral Solenoid.

Most ATEX Ex d IIC valve controllers have small containers with screw-top lids and very few options. Often the threads on the screw-top lids bind up, causing safety issues on multiple levels. TopWorx™ is changing all of that with the IIC-certified DXS valve controller.

There is no competition.

The unique modular design of the TopWorx™ discrete valve controller combines bus networking, pilot valve and position sensors into a globally certified, explosion proof enclosure that attaches to any automated valve package.

Features:
- Serrated Flange (No binding of threads)
- Improved ingress protection
- IECEx, ATEX, & Ex d Group IIC
- The only IIC Box with integral solenoid
- Available with all Bus & Sensor options!
TopWorx™ Visual Indicators
A variety of indicators to fit every application, including multiple color combinations such as Green/Red and Yellow/Black, plus three-way, 90° and 180° flow paths. Other languages are also available upon request.

COLD TEMP TO -60°C/-76°F
The TopWorx™ D-Series will give accurate position indication down to -60°C with the use of the GO Switch.

TopWorx TVF Now Available with LED’s
The TVF with high intensity LEDs will give you a clear and bright visual indication of your valve state in the darkest of conditions. Have the confidence you need to ensure your valve is in the proper state visually and electrically with TopWorx.

Benefits:
- Intrinsically Safe or Zone 2/Div 2 approved
- Available with GO Switches, reeds, or mechanical
- 10 point terminal strip
- Fully integrated options with internal pneumatics
- Conformal coated PCB board for enhanced reliability
- 24VDC or 120VAC @ 250mA
- Type 4X, IP67 Rated
TopWorx™ offers thousands of mounting kits to fit a wide variety of valves and actuators. Each kit comes complete with a parts list and installation instructions.

ONLINE PRODUCT CONFIGURATOR

Product datasheets can be generated using the Online Product Configurator. By walking through the selection process, you can easily create the part number and datasheet that meets your application needs. Product datasheets include dimensional data, product options, a wiring diagram, a visual indicator image, and nameplate information.

Example Datasheet for model DXP-L21GNEB:
**GO Switches**

<table>
<thead>
<tr>
<th>Option</th>
<th>Contact Type</th>
<th>Contact Form</th>
<th>Electrical Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>L</td>
<td>Gold-Flashed, Dry-Contact</td>
<td>SPDT</td>
<td>4A@120VAC, 3A@24VDC</td>
</tr>
<tr>
<td>Z</td>
<td>Palladium Silver, Dry-Contact</td>
<td>DPDT</td>
<td>4A@120VAC, 3A@24VDC</td>
</tr>
</tbody>
</table>

**Transmitters**

<table>
<thead>
<tr>
<th>Option</th>
<th>Type</th>
<th>Signal</th>
<th>Electrical Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>_X</td>
<td>Potentiometer</td>
<td>4-20mA</td>
<td>8.5-34VDC</td>
</tr>
<tr>
<td>_H</td>
<td>Potentiometer</td>
<td>4-20mA, HART</td>
<td>15-39VDC</td>
</tr>
</tbody>
</table>
## Solenoid Valves

### D-Series

<table>
<thead>
<tr>
<th>Voltage</th>
<th>Power Consumption</th>
<th>Pressure Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>24VDC</td>
<td>.5W</td>
<td>45-150 PSI</td>
</tr>
<tr>
<td>110VAC</td>
<td>3VA</td>
<td>45-150 PSI</td>
</tr>
<tr>
<td>220VAC</td>
<td>3VA</td>
<td>45-150 PSI</td>
</tr>
<tr>
<td>Piezo</td>
<td>12mW</td>
<td>45-150 PSI</td>
</tr>
</tbody>
</table>

### T-Series

<table>
<thead>
<tr>
<th>Voltage</th>
<th>Power Consumption</th>
<th>Pressure Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>24VDC</td>
<td>.5W (I.S.), 1W (non-I.S.)</td>
<td>30-100 PSI</td>
</tr>
<tr>
<td>110VAC</td>
<td>3VA</td>
<td>30-100 PSI</td>
</tr>
<tr>
<td>220VAC</td>
<td>3VA</td>
<td>30-100 PSI</td>
</tr>
</tbody>
</table>
TopWorx™ recommends you call your local sales representative, inside sales, or use the online configurator tool on TopWorx.com to ensure you choose the right product for your application. The following is an example of how to configure your product using the TopWorx™ Ordering Guide.

A switchbox part number can be configured by following a number of sequential steps. The ordering guide is organized in a number of categories which are setup as columns. By moving from right to left and filling in the boxes at the bottom of each column you will create a valid switchbox part number.

The following example is for reference and does not reflect all the available options of a TopWorx switchbox. Refer to the full ordering guide for full product options.

Product part number example: DXP-L21GNEB1A21
When configuring a valve monitor the part number is considered complete once the “o-ring” option is specified and the rest of the options can be left blank, i.e., DXP-L21GNEB. If an on/off valve controller is configured the part number is considered complete once the “Valve Cv” option is specified, i.e., DXP-L21GNEB1A2. “Regional Certs” and “Manual Override” options can be left blank or specified. If a “Regional Certs” options is specified and “Manual Override” is left blank the part number will look as follows: DXP-L21GNEB1A20N.

Product part number example:

**DXP-L21GNEB1A21**

About Emerson Automation Solutions
Emerson Automation Solutions is a powerful, global, single source of process improvement technology and expertise. We help major companies in selected industries optimize their plants and processes to achieve higher quality, greater reliability and faster time to market, while steadily advancing productivity and profitability. We can build it – providing experienced project management, engineering and a single point of accountability for the entire instrumentation and automation system. We can connect it – seamlessly integrating people and technology at every level of the process. We can improve it – creating more efficient utilization of energy and raw materials. And we can sustain it – producing greater reliability, month after month, year after year. From the field, to the plant, to the bottom line – where performance is the question, Emerson is the answer.
