Mobrey MSM400
Ultrasonic Suspended Solids Monitoring and Control System

- Continuous sludge discharge monitor for up to 50% suspended solids
- Rugged 316 stainless steel sensors for in-tank mounting
- Choice of flanged pipeline sensors for in-line density measurement
- Blanket level detection for primary and secondary sludge and industrial slurries
Overview of the Mobrey MSM400

The Mobrey MSM400 ultrasonic suspended solids monitoring and control system can continuously monitor the suspended solids or sludge density contained in, or flowing from, a clarifier or settlement tank during de-sludging.

Measurement principle

Many years of practical experience have shown that measurement of ultrasonic attenuation in a slurry is directly proportional to the percentage of suspended solids.

The MSM400 system uses this principle to produce a digital display of the suspended solids measurement.

Features and benefits

Control unit

- Bright local display of the measured value and statuses
- 4–20 mA / HART output signal of measured value
- Two SPDT (single-pole-double-throw) relays for control and alarm indication purposes
- A digital trigger input can perform various control actions
- Comes complete with a range of user-selectable calibration settings for simple initial set-up, but can also be calibrated against samples analyzed for % solids in a laboratory
- Provides the automatic control sequence to start a pump or control a valve for sludge or settled product removal
- Local programming of the control unit is supported using the integral keypad and an easy to navigate menu structure
- Remote programming and monitoring is supported using a Field Communicator or a smart wireless THUM™ adapter
- Auto-selection of AC or DC power supply, allowing back-up if one power supply fails

Intrinsically safe sensors

- Dual-operating-frequency gap sensors, 1 MHz or 3.3 MHz

**MSM400 Control Unit and Sensors Ordering**

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See Material selection below for more information.

**Table 1. MSM400 control unit ordering information**

<table>

(1) Sensor size selection depends on the application. If in doubt, please contact Rosemount Measurement to ensure that the size is suitable for the application.

(2) For other cable lengths, contact Rosemount Measurement. The maximum cable length is 164 ft. (50 m).

**Material selection**

- Emerson provides a variety of products with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser’s sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson Process Management is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.
Specifications for Control Unit

Product
- Mobrey MSM400 control unit

Physical

Mounting style
- Wall mount (brackets included)
- Six mounting holes, 0.2 in. (5 mm) diameter

Display
- Integral 32 x 122 pixels LCD with backlight, providing up to four lines of characters

Keypad
- Integral membrane keypad with six buttons for menu system navigation and configuring the application

Conduit/cable entries
- Six conduit/cable entry positions, pre-drilled at bottom of the enclosure
- Supplied with three M20 glands and three M16 glands

Dimensions
- See “Dimensional Drawings” on page 7

Construction materials
- ABS enclosure with clear polycarbonate lid
- 304-grade stainless steel cover-fixing screws
- UV resistant polycarbonate membrane keypad
- Nylon cable glands and blanking/stopping plugs

Electrical

General
- Cage clamp terminal blocks in separate compartment
- Maximum wire size is 2.5 mm² (12 AWG)

Power supply input connections
- Alternating Current (AC) mains and Direct Current (DC) terminal connections on each control unit for external supply
- Auto-selection of AC or DC supply, allowing back-up if one power supply fails

AC power supply requirements:
- 115 or 230 Vac ±15% (switch selectable)
- Power consumption: 10 VA nominal
- Fuse (F1): 200 mA (T), 5x20 mm, 240 V

DC power supply requirements:
- 15 to 30 Vdc, 24 Vdc nominal
- Power consumption: 6 W nominal

Sensor input connections
- Captive screw terminal block for 1 x ultrasonic gap sensor (Mobrey MSM433 or Mobrey MSM448)
- 1 MHz or 3.3 MHz operating frequency auto-selection

Digital input connections
- Accepts two 5 Vdc trigger input signals
- 5 Vdc provided by control unit

Other input connections
- Field communicator connection points (HART test points A and B)

Current output connections
- Nominal signal range 4–20 mA (default) or 0–20 mA, software selectable
- Full output range (linear): 3.8 to 20.5 mA
- (See Table A-1 on page A-3 for current saturation and alarm indication levels)
- Load: maximum resistance is 1 K Ohm at 22 mA
- Maximum applied voltage: 48 Vdc
- Isolated from other terminals to 500 Vdc
- Update rate (software): 10 times every second

Relay output connections
- Two SPDT (single-pole-double-throw) relays, rated 5 A at 240 Vac resistive

Environment

Ambient temperature
- –22 to 131 °F (–30 to 55 °C)

Relative humidity
- 95%

Enclosure rating
- IP65 indoor and outdoor

Certifications

See “Product Certifications” on page 6 for certified approvals.
Specifications for Tank-mountable Sensors

Product
- Mobrey MSM433 tank-mountable ultrasonic gap sensor, 316 Stainless steel, 1 MHz / 3 MHz operating frequency
- Gap size 4, 6, 8, 12, or 18 in (100, 150, 200, 300, or 450 mm)

Connections
Mounting connection
- ¾-in. BSPT

Sensor cable
- 23 ft. (7m) dual screened/shielded twisted pair (others upon request)
- Ready to connect to the MSM400 control unit

Environment
Operating temperature
- –40 to 130 °F (–40 to 55 °C)
- Up to +212 °F (+100 °C) upon request
- See also “Product Certifications” on page 6 for approval temperature ranges

Operating pressure
- 1522 psi (105 bar)

Ingress protection
- IP68

Certifications
See “Product Certifications” on page 6 for certified approvals.

Specifications for Pipe-section with Sensors

Product
- Mobrey MSM448 pipe-section with integral 316 stainless steel ultrasonic gap sensor, 1 MHz / 3 MHz operating frequency
- Gap size 4, 6, 8, 12, or 18 in (100, 150, 200, 300, or 450 mm), depending on pipe size/flange choice

Physical
Pipe-section material
- Epoxy-coated carbon steel

Spray nozzle/flushing valve
- 1-in. BSP thread,
- 316 stainless steel wetside

Drain fitting
- 1-in. NPT

Connections
Mounting connection
- Raised Face (RF) flanged in-line installation
- EN1092-1 DN100 (PN 10/PN 16), DN150 (N 10/PN 16), DN200 (PN 10) or 4-in., 6-in., 8-in. ASME B16.15 Class 150

Sensor cable
- 23 ft. (7m) from junction box, oil hose protected, dual screened twisted pair (others upon request)
- Ready to connect to the MSM400 control unit

Cable junction box
- IP65 aluminum alloy

Environment
Operating temperature
- –40 to 158 °F (–40 to 70 °C)

Operating pressure
- 145 psi (10 bar)

Ingress protection
- IP68

Certifications
See “Product Certifications” on page 6 for certified approvals.
Product Certifications

Approved manufacturing location

Rosemount Measurement Limited
Slough, United Kingdom

European directive information

The EC declaration of conformity for all applicable European directives for this product can be obtained by contacting your local sales office.

ATEX directive (94/09/EC)
- The control unit and gap sensors comply with EN60079-0 and EN60079-11

Low voltage directive (2006/95/EC)
- The control unit complies with EN61010-1
- The gap sensors are outside the scope of the LVD directive

Pressure equipment directive (PED) (97/23/EC)
- The control unit and in-tank mounted gap sensor are outside the scope of the PED Directive
- The pipe-section gap sensor complies with the PED directive

Electro magnetic compatibility (EMC) directive (2004/108/EC)
- The control unit and sensors comply with EN 61326-1

CE-mark
- The control unit and sensors comply with the applicable directives

Hazardous location certifications

The MSM400 control unit ("control unit") may be connected to an intrinsically safe gap sensor located in a hazardous area. The control unit must not itself be located in a hazardous area.

Control unit approvals

ATEX intrinsically safe approval (gap sensor inputs only)
- Certificate numbers: ITS00ATEX2002X
- Intrinsically safe for II 1 (1) G, (Ga) [Ex ia] IIC
- Ambient temperature: –40 to +55 °C
- Channel 1 (Rx) electrical parameters:
  \( U_o = 1.2 \text{ V}, \quad I_o = 42.1 \text{ mA}, \quad P_o = 13 \text{ mW}, \quad C_o = 0.4 \text{ nF}, \quad L_o = 0.04 \text{ mH} \)
- Channel 2 (Tx) electrical parameters:
  \( U_o = 4.6 \text{ V}, \quad I_o = 162 \text{ mA}, \quad P_o = 0.2 \text{ W}, \quad C_o = 0.4 \text{ nF}, \quad L_o = 0.04 \text{ mH} \)

IECEEx intrinsically safe approval (gap sensor inputs only)
- Certificate numbers: IECEx ITS 13.0044X
- Intrinsically safe for (Ga) [Ex ia] IIC
- Ambient temperature: –40 to +55 °C
- Channel 1 (Rx) electrical parameters:
  \( U_o = 1.2 \text{ V}, \quad I_o = 42.1 \text{ mA}, \quad P_o = 13 \text{ mW}, \quad C_o = 0.4 \text{ nF}, \quad L_o = 0.04 \text{ mH} \)
- Channel 2 (Tx) electrical parameters:
  \( U_o = 4.6 \text{ V}, \quad I_o = 162 \text{ mA}, \quad P_o = 0.2 \text{ W}, \quad C_o = 0.4 \text{ nF}, \quad L_o = 0.04 \text{ mH} \)

Gap sensor approvals

ATEX intrinsically safe approval
- Certificate numbers: ITS00ATEX2003X
- Intrinsically safe for II 1 G, Ex ia IIC T6...T3 Ga
- Ambient temperature: –40 to +70 °C
- Electrical parameters:
  \( U_i = 4.6 \text{ V}, \quad I_i = 162 \text{ mA}, \quad P_i = 0.2 \text{ W}, \quad C_i = 14 \text{ nF}, \quad L_i = 0.1 \text{ mH} \)

IECEEx intrinsically safe approval
- Certificate numbers: IECEx ITS 13.0044X
- Intrinsically safe for Ex ia IIC T6...T3 Ga
- Ambient temperature: –40 to +70 °C
- Electrical parameters:
  \( U_i = 4.6 \text{ V}, \quad I_i = 162 \text{ mA}, \quad P_i = 0.2 \text{ W}, \quad C_i = 14 \text{ nF}, \quad L_i = 0.1 \text{ mH} \)
