

DeltaV™ AgileOps Product Support

Key Benefits

- Minimize downtime and system disruptions with faster issue resolution
- Efficient management of software updates
- Improve collaboration by managing systems across your enterprise

Introduction

Faster issue resolution leads to less unplanned downtime, and Emerson's expert technical engineers can proactively optimize the performance of your system enabling you to achieve sustainable production improvements.

Get unlimited 24x7 support with secure remote system diagnosis capabilities. You can call or chat with our support team or submit questions and issues through the Guardian digital platform or mobile app. Email and chat support are also available 24 hours during Monday through Friday.

Features

System Health Score*

The System Health Score measures Key Performance Indicators (KPIs) that determine the performance of high-risk areas. These risk areas typically include KBA management, software updates, and service calls.

24/7 Expert Product Support (GSC)

Includes unlimited 24x7 Expert Telephone Product Support, with secure remote system diagnosis capabilities. You can call our Product Support or submit questions and issues through the Guardian platform or mobile app. Email and Chat Support are also available 24 hours during Monday through Friday.

Remote System Diagnosis

Remote system diagnosis helps speed-up troubleshooting and problem resolution, effectively reducing downtime in critical situations.

Service Call Logs

Service Call Logs allow you to monitor the progress of technical support calls, examine past service calls, and send/receive call status updates.

Software/Firmware Updates

The latest software updates, patches, and hotfixes matched to system content can be accessed directly from the Guardian platform.

Knowledge Base Articles (KBA)

KBAs are prepared by Emerson as a supplement to standard product documentation. These are evaluated for applicability to a broad audience of system users.

Asset and License Inventory

Guardian provides an updated and accurate inventory of all system components and licensing. Access information like serial numbers, software and hardware versions, and registered system licenses.

Downloadable Installation Media

Guardian allows you to download the installer media of our latest major software version and upgrades, including new features and enhancements. Users can download the latest media directly from Guardian.

*Legal Disclaimer:

The urgency and severity ratings of this notification are not tailored to individual users; users may value notifications differently based upon their system or network configurations and circumstances. The "System Health Score" presented in the Guardian website indicates the performance of the system based upon a comparison of identified risk area management relative to other systems subscribed to Product Support worldwide. The Guardian "System Health Score" considers only what is known to Emerson relative to a limited collection of risk factors (e.g. Knowledge Base Articles, uninstalled hotfixes, etc.) with no consideration of the processes under control, the application/configuration of that system, or the actual actions taken locally to mitigate the identified risks. A high "System Health Score" is a recognition of the efforts taken to mitigate these particular risks Guardian is capable of identifying, but in no way guarantees, or implies, that the operation of the system is risk free in any way.
