

# Durable, Adjustable and Maintenance-Free Valve

## Low cost of ownership

### WHAT IF...

- You could achieve safer, more efficient, durable positive isolation at a lower cost

## OWNING AN AFFORDABLE VALVE THAT IS WITHOUT FUSS

Vanessa Series 30,000 allows for easy replacement of existing gate, ball and globe valves, and is durable and virtually maintenance-free.

- Allows for a simplification of the entire piping system with subsequent reduction of costs associated to piping supports
- Unaffected by adjacent induced piping stresses through its single line seat
- Does not require planned maintenance in most applications, yielding significant cost savings across its lifecycle
- Has Stellite® grade 21 body seat that will last the entire valve/ plant life for gaseous as well as liquid natural gas
- One-piece metal seal rings made of UNS 520910 (or Nitronic®50), an austenitic stainless steel which is resistant to corrosion while keeping important mechanical features at low temperatures
- Offers exceptional yield strength, approximately double that of other series 300 stainless steels at ambient temperature
