

I need to fulfill my overpressure protection requirements with smaller sized valves and associated piping. There must be a way to reduce valve size, weight and lower my costs.

YOU CAN DO THAT

ANDERSON GREENWOOD™ Anderson Greenwood 9300H low pressure pilot operated relief valves can help you reduce your initial pressure relief valve investment and total cost of ownership. This groundbreaking design provides leak-free operation up to set pressure while providing **best-in-class capacity among low pressure pilot operated relief valves**. The additional capacity reduces the required valve size **and minimizes initial investment** while creating additional savings on the associated piping, fittings, bracing and expansion elbows. For more information on how to meet your overpressure protection requirements, contact your local sales office at [Emerson.com](https://www.emerson.com).
