

EMERSON™

ANDERSON GREENWOOD™

Safety Selector Valve

1 IN. SIZE ONLY

1-1/2 TO 10 IN. SIZES ONLY

Safety Selector Valve

- Provides high C_v values, resulting in less than 3% pressure drop to the active PRV inlet, reducing destructive valve chatter
- Reduces field installation costs and space requirements through pre-assembled and compact design
- Allows PRV maintenance without process shutdown
- Tandem system available for dual PRVs discharging to a closed header system
