Rosemount™ 2410 Tank Hub
for tank gauging systems

Handles communication between tank devices and the control room
- Save installation cost with the bus-powered intrinsically safe 2-wire Tankbus
- Calculate average temperature, observed density, and strapping table based volume
- Simplify start-up with tank device auto-configuration
- Many communication possibilities, including Modbus®, IEC 62591 (WirelessHART®), and emulation of other vendors’ protocols
- Two configurable alarm output relays
- Certified SIL 2 or SIL 3
Rosemount 2410 Tank Hub for single or multiple tanks

Efficient communication between tanks and control room

Rosemount 2410 handles communication between the field devices and the control room. It also provides IEC 61508 certified SIL 2 and SIL 3 overfill prevention alarm outputs for the Rosemount Tank Gauging System. The device is available in two versions, for single and multiple tanks.

**Tankbus communication**

The Rosemount 2410 Tank Hub communicates with and powers the devices on one or several tanks via the Tankbus.

The Tankbus complies with Fieldbus Intrinsically Safe Concept (FISCO) FOUNDATION™ Fieldbus.

By using FISCO, there is no need to take entity parameters into consideration. It makes it easy to connect devices.

In addition, the available power from a FISCO power supply is higher compared to a conventional entity power supply. This enables the connection of more devices on the Tankbus.

**Auto-configure tank devices**

The Rosemount 2410 supports the auto-configuration of the Tankbus devices within the Rosemount Tank Gauging System. It acts as a FOUNDATION Fieldbus master on the Tankbus, which means it identifies and auto-addresses field devices in the network, manages communication, and supervises the status of all connected devices. It also includes extensive built-in diagnostics.

**Data handling and calculation**

Rosemount 2410 collects measurement values such as level, temperature, and pressure.

It calculates average temperature, observed density, and strapping table based volume.

Such data can be presented on the optional integrated back-lit display, a separate Rosemount 2230 Graphical Field Display, and can be sent to Rosemount TankMaster™ or a host system.

**Improve data security**

All tank hubs have a software write protection function.

In addition, the Rosemount 2410 with display option is equipped with a hardware write protection switch.

**Control room communication**

Rosemount 2410 has slots for two independent communication boards (primary and secondary fieldbus) for TRL2 Modbus, RS485 Modbus, emulation, and wireless communication.

Emulate gauges from other vendors

Rosemount 2410 enables replacement of old mechanical/servo gauges with modern Rosemount devices.

When an old gauge from another vendor is replaced with a tank hub connected to a Rosemount field device, the tank hub will act just like the replaced gauge.

By using the other vendor’s field and control room communication protocol together with modern Rosemount tank gauging devices, the legacy system can be modernized step-by-step. The legacy system can be upgraded while tanks are in operation, and the existing wiring can be re-used.

Analog input/output

The Rosemount 2410 Tank Hub can be ordered with:

- An analog input
- An analog output for connection to a host system
- The analog output is available as certified SIL 2 for overfill prevention or dry-run protection. Suitable for connection to an automatic overfill prevention system.

Output relay functionality

Rosemount 2410 can be equipped with two solid state relays that can be configured to be controlled by level, temperature, and water level. The output is normally connected to an external system for alarm indication or process control.

These relays are user-configurable for normally open or closed operation. They can be either certified SIL 2, and used for overfill prevention via an emergency shutdown system (ESD), or non-SIL.

A third separate relay dedicated for SIL 3 overfill functionality can also be included. This relay is activated both if the alarm level is reached and/or if a device malfunction occurs. It operates in a normally closed mode, and the output can be connected to an ESD system.

Wireless communication

The Emerson™ Wireless 775 THUM™ Adapter acts as a wireless data link between the tank hub and an Emerson Wireless Gateway in a WirelessHART field network. Available tank data such as level, temperature, etc. are transmitted via the wireless THUM Adapter.

Power supply with built-in cable terminator

Rosemount 2410 supplies power to the units on the Tankbus.

It is equipped with an integrated FISCO-certified IS barrier, has power conditioner functionality, and built-in electronics for bus termination. A terminator at each end of the Tankbus ensures that the fieldbus network has proper signal levels.

All these features enable the easy setup of the Rosemount Tank Gauging System.

Specifications

General specifications

Single tank version

- Supports one Rosemount 5900S 2-in-1 gauge or two radar level gauges, type 5300, 5400, or 5900
- Total Observed Volume (TOV) and API corrected Net Standard Volume (NSV) calculation with 100-point strapping table

Multiple tank version

For a Rosemount 5300/5400/5900 system configuration:

- The software supports 16 field devices and 10 tanks per tank hub
- Maximum five type 5300 or 5400 gauges per tank hub

The actual number of tanks/instruments a tank hub supports depends on the configuration, which types of units are connected and how many:

- Hybrid calculations (mass and density) for up to three tanks
- Total Observed Volume (TOV) and API corrected Net Standard Volume (NSV) calculation with 100-point strapping table for one tank

For more information, see Table 6 on page Wireless-14.

Examples of connected field devices

Radar level gauges (type 5900[^1], 5300, and 5400), Rosemount 2240S Multi-input Temperature Transmitter, Rosemount 644 Temperature Transmitter, Temperature/Water Level Sensors, Rosemount 3051S Scalable Pressure Transmitter, Rosemount 2230 Graphical Field Display

Start-up time

Less than 30 s

Communication/display/configuration specifications

Tankbus

The intrinsically safe side of the Rosemount 2410 connects to the Tankbus which communicates with the field devices on the tank using FOUNDATION Fieldbus.

Fieldbus

Rosemount 2410 communicates with a host or a system hub via the supported communication protocols for the primary and secondary fieldbus.

**Primary fieldbus:** TRL2 Modbus, RS485 Modbus, Analog output/input 4-20 mA/HART or Enraf

**Secondary fieldbus:** TRL2 Modbus, Analog output/input 4-20 mA/HART, WirelessHART or other vendors’ protocols, such as Enraf, L&J Tankway and Sakura MDP/V1

For combination guidance, see Table 3 on page Wireless-11 and Table 4 on page Wireless-12.

Relay outputs

**SIL 3 relay output:** One certified SIL 3 relay is available for overfill prevention. This non-intrinsically safe solid state relay is closed/energized during normal operation.

Maximum voltage and current: 260 VAC/VDC, 80 mA

Single pole

**Relay outputs (SIL 2 or non-SIL):** Maximum two relays, controlled by 10 independent virtual relay functions, which can be configured for different tanks and process variables. The two non-intrinsically safe solid state relays are user configurable for normally energized or de-energized operation.

Maximum voltage and current: 350 VAC/VDC, 80 mA

Single pole

For combination guidance, see Table 3 on page Wireless-11 and Table 4 on page Wireless-12.

Analog inputs/outputs

The tank hub supports analog output and input 4-20 mA/HART, active or passive, IS or non-IS. The analog output is available as certified SIL 2.

---

1. One Rosemount 5900S with a 2-in-1 solution or maximum two Rosemount 5900 gauges installed on separate tanks can be connected to one tank hub.

Analog input/output

Analog input

- Maximum number of input channels: 1
- Input Current range: 0-23 mA
- Configurable Min and Max alarm limits
- Lift-off voltage (Passive IS and NON-IS): 10.5 V
- Max input voltage (Passive IS and NON-IS): 30 V
- Output voltage (Active):
  - Non-IS: 22 ±2.0 V (open loop); 20.8 ±2.0 V @3.75 mA; 14.8 ±2.0 V @21.75 mA
  - IS: 21 ±2.0 V (open loop); 18.8 ±2.0 V @3.75 mA; 8.2 ±2.0 V @21.75 mA
- For IS parameters, see “Product certifications” on page 18.

HART master:
- Maximum 5 HART Slave Devices (Passive)
- Maximum 3 HART Slave Devices (Active)

Analog output

- Maximum number of output channels: 1
- Output range: 3.5-23 mA
- Software configurable High and Low Alarm Limits
- Separate software configurable alarms for process and hardware failures
- Low voltage and invalid loop current detection
- Lift-off voltage (Passive IS and NON-IS): 10.5 V
- Max input voltage (Passive IS and NON-IS): 30 V
- Output voltage (Active):
  - Non-IS: 22 ±2.0 V (open loop); 22.8 ±2.0 V @3.75 mA; 16.8 ±2.0 V @21.75 mA
  - IS: 21 ±2.0 V (open loop); 20.8 ±2.0 V @3.75 mA; 10.2 ±2.0 V @21.75 mA
- SIL 2 capable

Integral display output variables

- The integral digital read-out display can toggle between:
  - Level
  - Level rate
  - Ullage
  - Signal strength
  - Volume (TOV)
  - Liquid average temperature
  - 1-16 spot temperature
  - Vapor average temperature
  - Ambient temperature
  - Free water level
  - Vapor pressure
  - Liquid pressure
  - Air pressure
  - Observed density
  - Reference density
  - Flow rate

Display output units

- Level, free water level, and ullage: meter, millimeter, feet, or imperial 1/16
- Level rate: meter/second, meter/hour, feet/second, or feet/hour
- Flow rate: meter³/hour, liter/minute, barrel/hour, or US gallon/hour
- Total Observed Volume (TOV): meter³, liters, barrel, or US gallon
- Temperature: °F, °C, or °K
- Pressure: psi, psiA, psiG, bar, barA or barG, atm, Pa, or kPa
- Density: kg/m³, °API, or 60/60DegF
- Signal strength: mV

Configuration tools

- Rosemount TankMaster

Autoconfiguration support

- Yes (Tankbus addressing)
Electrical specifications

Power supply (nominal values)
24-48 VDC (-15% to +10%)
48-240 VAC (-15% to +10%), 50/60 Hz

Power consumption
Max. 20 W depending on configuration.
Recommended Miniature Circuit Breaker (MCB): 2A slow

Tankbus cabling
0.5-1.5 mm² (AWG 22-16), twisted shielded pairs.
Recommended cabling is shielded twisted pairs, 0.75 mm² (AWG 18). Tankbus cabling must fulfill FISCO cable and installation requirements, and must also be approved for use at minimum 85 °C (185 °F).

FISCO (Fieldbus Intrinsically Safe Concept)
The following cable characteristics are specified for FISCO according to IEC 60079-27:

Table 5. FISCO Cable Characteristics

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loop resistance</td>
<td>15 Ω/km to 150 Ω/km</td>
</tr>
<tr>
<td>Capacitance</td>
<td>45 nF/km to 200 nF/km</td>
</tr>
<tr>
<td>Maximum length of each spur(1) cable</td>
<td>60 m in gas Group IIC</td>
</tr>
<tr>
<td>Maximum length of each trunk(2) cable</td>
<td>1000 m in gas Group IIC, and 1900 m in gas Group IIB</td>
</tr>
</tbody>
</table>

1. The spur is an unterminated part of the network. It is allowed to have an up to 60 m long spur. For longer distances, an alternative network configuration should be considered.

2. The trunk is the part of the network that has terminators at both ends. In the Rosemount Tank Gauging System, a trunk can be the part of the network between the tank hub and a segment coupler or the last device in a daisy-chain configuration.

Table 6. Power Budget

<table>
<thead>
<tr>
<th>Field device</th>
<th>Power consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rosemount 5900S or 5900C Radar Level Gauge</td>

</tr>
</tbody>
</table>
Figure 1. Cable Distances
The total cable distance A+B+C+D must not exceed the values given in Table 7.

Table 7. Allowed Cabling Distances for Different System Configurations

<table>
<thead>
<tr>
<th>Cable diameter</th>
<th>Loop resistance</th>
<th>Maximum cabling distance from power source to all devices on the tank</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>With maximum power usage of 250 mA</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Distance in m (ft)</td>
</tr>
<tr>
<td>20 AWG (0.5 mm²)</td>
<td>66 Ω/km</td>
<td>212 (695)</td>
</tr>
<tr>
<td>18 AWG (0.75 mm²)</td>
<td>42 Ω/km</td>
<td>333 (1092)</td>
</tr>
<tr>
<td>17 AWG (1.0 mm²)</td>
<td>33 Ω/km</td>
<td>424 (1391)</td>
</tr>
<tr>
<td>16 AWG (1.5 mm²)</td>
<td>26 Ω/km</td>
<td>538 (1765)</td>
</tr>
</tbody>
</table>

The typical cabling distance from the tank hub towards the control room is up to 4 km (2.5 miles) depending on which protocol is used.

Power and relay cabling
0.5-2.5 mm² (AWG 22-14), twisted shielded pairs

Maximum Tankbus cable lengths
Depends on the cable. For details, see the Rosemount Tank Gauging System Data Sheet.

Built-in Tankbus terminator
The Rosemount 2410 Tank Hub has a built-in tank bus terminator, which can be disconnected if required.
**Mechanical specifications**

**Housing material**
Polyurethane-covered die-cast aluminum

**Cable entry (connection/glands)**
Non-IS side: Two ½ - 14 NPT and Two ¾ - 14 NPT entries for cable glands or conduits
IS side: Two ½ - 14 NPT entries for cable glands or conduits
Three metal plugs to seal any unused ports are included in the delivery
Optional:
- M20 x 1.5 and M25 x 1.5 conduit/cable adapter
- Cable glands in metal (½ - 14 NPT and ¾ - 14 NPT)
- 4-pin male eurofast connector or A size Mini 4-pin male minifast connector

**Installation**
Can be installed on a 33.4-60.3 mm (1-2 in.) diameter pipe or wall, at ground level close to the tank or on top of the tank using existing cabling.

**Weight**
4.7 kg (10.4 lbs)

**Environmental specification**

**Ambient temperature**
-40 to 70 °C (-40 to 158 °F). Minimum start-up temperature is -50 °C (-58 °F).
With LCD display: -25 to 70 °C (-13 to 158 °F)

**Storage temperature**
-50 to 85 °C (-58 to 185 °F)
With LCD display: -40 to 85 °C (-40 to 185 °F)

**Humidity**
0 - 100% relative humidity

**Ingress protection**
IP 66 and IP 67 (NEMA® 4X)

**Metrology sealing possibility**
Yes

**Write protect switch**
Yes (hardware and software write protection)

**Transient/built-in lightning protection**
In accordance with IEC 61000-4-5, level 4 kV line to ground. Compliant with IEEE 587 category B transient protection and IEEE 472 surge protection.
Specifications for Emerson Wireless 775 THUM Adapter Assembly

General specifications

The THUM Adapter allows WirelessHART communication according to the IEC 62591 standard between the Rosemount 2410 Tank Hub and the Emerson Wireless Gateway. The THUM is integrated with a connection box.

Transmission range

Application dependent. Consult factory

Communication specifications

Communication protocol

IEC 62591 (WirelessHART)

Radio characteristics

- Standard IEEE 802.15.4 radio
- 2.4 GHz ISM band sliced into 16 radio-channels
- Continually “hop” across channels to avoid interference and increase reliability
- Direct sequence spread spectrum (DSSS) delivers high reliability in challenging radio environment

Update rate

User selectable, 8 seconds to 60 minutes

Electrical specifications

Power supply

Powered by Rosemount 2410 Tank Hub

Output cabling

Shielded twisted pair wiring, 0.5-2.5 mm² (AWG 22-14)
Maximum cable length depends on cable characteristics.

Mechanical specifications

Housing/enclosure

Polyurethane painted, low-copper aluminum housing

Cable entry (connection/glands)

One M20x1.5 entry for cable gland or conduit adapter
Optional:
- Metal cable gland M20x1.5
- ½ NPT adapter (female thread)

Installation

The THUM Adapter can be installed on a vertical or horizontal 1- to 2-in. pipe, away from the tank hub at the best possible tank roof position. It should be installed approximately 2 m (6 ft) or more from any large structure or conductive surface.

Antenna

Polybutadine terephthalate (PBT)/polycarbonate (PC) integrated omnidirectional antenna

Weight

Connection box and THUM Adapter: 2.0 kg (4.4 lbs.)

Environmental specifications

Ambient temperature

-40 to 85 °C (-40 to 185 °F)

Storage temperature

-40 to 85 °C (-40 to 185 °F)

Humidity limits

0 - 100% relative humidity

Ingress protection

IP 66 and NEMA 4X

Note

For more information, see the Emerson Wireless 775 THUM Adapter Product Data Sheet.
Product certifications

European directive information
The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary location certification
As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing equipment in North America
The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

Additional certifications

Safety Certification (SIS)

3 Functional Safety
Certificate: ROS 1312032 C001
SIL 3 2-in-1 (1oo2) option (SIS-relays)
Standards: IEC 61508:2010 Parts 1-7

5 Functional Safety
Certificate: ROS 1312032 C004
SIL 2 1-in-1 (1oo1) option,
with 4-20mA or K1/K2 relay
Standards: IEC 61508:2010 Parts 1-7
Certificate: ROS 1312032 C005
SIL 2 2-in-1 (1oo1) option,
with 4-20mA or K1/K2 relay
Standards: IEC 61508:2010 Parts 1-7

Conduit plugs and adapters

IECEEx Flameproof and Increased Safety
Certificate: IECEx FMG 13.0032X
Standards: IEC60079-0:2011,

Product certifications for Emerson 775 THUM Adapter

A copy of the EU Declaration of Conformity can be found at the end of the Emerson Wireless THUM Adapter Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

European Directive Information

Ordinary Location Certification from FM Approvals

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by FM Approvals, a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Telecommunication compliance (for wireless products only)

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC (for wireless products only)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Installing equipment in North America

The US National Electrical Code (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

USA

I5 USA Intrinsically Safe (IS) and Non-incendive
Certificate: 3036224
Markings: IS CL I, DIV 1, GP A, B, C, D; CL II, DIV 1, GP E, F, G; Class III; Class 1, Zone 0, AEx ia IIC T4; NI CL I, DIV 2, GP A, B, C, D T4; T4(-50°C ≤ Ta ≤ +70°C) when connected per Rosemount drawing 00775-0010; Type 4X/IP66

Canada

I6 Canada Intrinsically Safe
Certificate: 2174201
Markings: Intrinsically Safe Class I, Division 1, Groups A, B, C, D T3C; Suitable for use in Class I, Division 2, Groups A, B, C, D T3C; T3C(-50°C ≤ Ta ≤ +70°C) when installed per Rosemount drawing 00775-0012; Type 4X/IP66

Europe

I1 ATEX Intrinsic Safety
Certificate: Baseefa09ATEX0125X
Standards: IEC 60079-0:2011; EN60079-11:2012; Markings: II 1G Ex ia IIC T4 Ga, T4(-50°C ≤ Ta ≤ +70°C)

Special conditions for safe use (X):

1. The surface resistivity of the antenna cover is greater than 1GΩ. To avoid electrostatic charge build-up, it must not be rubbed or cleaned with solvents or a dry cloth.
2. The Model 775 enclosure may be made of aluminum alloy and given a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion if located in zone 0.
N1  ATEX Type n
Certificate: Baseefa09ATEX0131
Markings: Ex ii 3G nA IIC T4 Gc, T4(-50°C ≤ Ta ≤ +70°C)
       IP66

International
I7  IECEx Intrinsic Safety
Certificate: IECEx BAS 09.0050X
Markings: Ex ia IIC T4 Ga, T4(-50°C ≤ Ta ≤ +70°C)
       IP66

Special conditions for safe use (X):
1. The surface resistivity of the antenna is greater than 1GΩ. To avoid electrostatic charge build-up, it must not be rubbed or cleaned with solvents or a dry cloth.
2. The Model 775 enclosure may be made of aluminum alloy and given a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion if located in zone 0.

N7  IECEx Type n
Certificate: IECEx BAS 09.0058
Markings: Ex nA IIC T4 Gc, T4(-50°C ≤ Ta ≤ +70°C)
       IP66

Brazil
I2  INMETRO Intrinsic Safety
Certificate: UL-BR 15.0089X
Markings: Ex ia IIC T4 Ga(-50°C ≤ Ta ≤ +70°C)
       IP66

Special conditions for safe use (X):
1. The surface resistivity of the antenna is greater than 1GΩ. To avoid electrostatic charge build-up, it must not be rubbed or cleaned with solvents or a dry cloth.
2. The enclosure may be made of aluminum alloy and given a protective polyurethane paint finish; special care must be taken to minimize the risk of impact or friction of the housing which can cause the generation of sparks.

N2  INMETRO Type n
Certificate: UL-BR 15.0027
Markings: Ex nA IIC T4 Gc (-50° ≤ Ta ≤ +70°C)
       IP66

China
I3  NEPSI Intrinsic Safety
Certificate: GYJ14.1094X
Standards: GB3836.1 – 2010, GB3836.4 – 2010, GB3836.20-2010
Markings: Ex ia IIC T4 Ga, -50 - +70°C

Special conditions for safe use (X):
1. See certificate for special conditions.

Japan
I4  TIIS Intrinsic Safety
Certificate: TC22150X
Markings: Ex ia IIB T4 Ga, -50°C - +70°C

Special conditions for safe use (X):
1. See certificate for special conditions.

EAC – Belarus, Kazakhstan, Russia
IM  Technical Regulation Customs Union (EAC) Intrinsic Safety
Certificate: TC RU C-US.AA87.8.00993
Markings: 0Ex ia IIC T4 Ga X
       T4 (-50° ≤ Ta ≤ +70°C)
       IP66;

Special conditions for safe use (X):
1. See certificate for special conditions.

Republic of Korea
IP  Korea (KOSHA) Intrinsic Safety
Certificate: 10-KB4BO-0010X
Markings: Ex ia IIC T4

Special conditions for safe use (X):
1. See certificate for special conditions.

India
IW  India (CCOE) Intrinsic Safety
Certificate: A/P/HQ/MH/104/2023(P242867)
Markings: Ex ia IIC T4

For more information, see the Emerson Wireless 775 THUM Adapter Product Data Sheet.
**Dimensional drawings**

**Figure 2. Rosemount 2410 Tank Hub Dimensions**

Rosemount 2410 can be mounted on a wall or a pipe with 33.4-60.3 mm (1-2 in.) diameter. Dimensions are in millimeters (inches).

**Figure 3. Emerson Wireless 775 THUM Adapter Assembly Dimensions**

Dimensions are in millimeters (inches).
