Rosemount 751 Field Signal Indicator

- Available with an LCD display or analog meter
- Compact, rugged, and designed for industrial environments
- Available with explosion-proof and intrinsic safety certifications
- Provides flexible mounting options
Transcend Your Integral Meter Display with the Rosemount 751

The Rosemount 751 Field Signal Indicators provide a means of displaying important process variables. These devices operate with any two-wire transmitter that measures input variables such as pressure, flow, liquid level, or temperature. Rosemount indicators are ideal for installations where an integral meter would be difficult to view.

Rosemount 751 Indicators are designed for use in industrial environments where all-weather performance is necessary. These units are vibration- and corrosion-resistant, and explosion-proof or intrinsically safe. An LCD display meter or analog meter may be ordered to meet specific application requirements.

LCD display meter

The LCD display meter may be configured from a 4 mA point of –999 to a 20 mA point of 9999 with a linear or square-root response. A 20-segment bar graph at the bottom of the display directly represents the 4–20 mA signal.

Changing the 4 mA and 20 mA points is easy. Just remove the housing and meter covers, and press the meter faceplate buttons. The meter can be rotated in 90-degree increments within the enclosure for convenient viewing.

Analog meter

With the analog meter, several meter scaling options are available to suit special application requirements with ±2 percent of calibrated span accuracy. Linear 0 to 100 percent meter scaling is adequate for the majority of measurement applications. With a flow transmitter, a logarithmic 0 to 100 percent flow scale is available. As an option, the user can specify special meter scaling for direct readout in psi, gph, °F, °C, or other convenient engineering units.

The large, 2 1/8-in. diameter meter face has a 2-in. long scale for easy readability. A zero adjustment is located on the meter faceplate (accessible with the housing cover removed). The meter can be rotated within the enclosure for convenient viewing in 90-degree increments.

Material selection
Emerson provides a variety of Rosemount product with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser’s sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson Process Management is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Conformance to specifications \[\pm 3\sigma \text{ (Sigma)}\]
Technology leadership, advanced manufacturing techniques, and statistical process control ensure specification conformance to at least \(\pm 3\sigma\).

Materials of construction
Enclosure
Low-copper aluminum

Paint
Polyurethane

O-rings
Buna N

Meter mounting materials
GE polyphenylene oxide plastic

Electrical connections
3-pole terminal block with 8–32 nickel-plated brass screw terminals, with \(\frac{3}{4}-14\) NPT conduit (stainless steel \(\frac{3}{4}-16\)-in. reducer available as an option).

Enclosure rating
NEMA Type 4x. CSA Type 4x. IP66

Weight
Indicator only: 1.8 kg (4 lb)
Indicator with optional mounting bracket: 2.27 (5 lb)

Tagging
The indicator will be tagged, at no charge, in accordance with customer requirements. All tags are stainless steel. The standard tag is permanently attached to the indicator. Tag character height is \(\frac{1}{16}\) in. (1.6 mm). A wired-on tag is available upon request.

LCD display meter specifications

Functional specifications

Input signal
4–20 mA dc

Display

4 mA point limits
–999 to 1000

Span limits
200 to 9999
The sum of the 4 mA point and span must not exceed 9999. Adjustments are made using non-interactive zero and span buttons.

Display options
Standard display response is linear with mA input. Optional square root or filtered response may be selected.

Overload limitations
666 mA, maximum

Temperature limits
Storage
–40 to 85 °C (–40 to 185 °F)

Operating
–40 to 70 °C (–40 to 185 °F)

(1) For temperatures below -20 °C or above 60 °C the LCD display may not be readable, but the loop will remain intact and the LCD display will not be damaged.

Humidity limitation
0 to 95 percent non-condensing relative humidity

Update period
750 ms

Response time
Responds to changes in input within a maximum of two update periods. If the filter is activated, then the display responds to the change within nine update periods.

Voltage drop
0.7 Vdc typical, 1.0 Vdc maximum
Performance specifications

Digital display resolution
0.05 percent of calibrated range ± 1 digit

Analog bar graph resolution
5.0 percent of calibrated range

Indication accuracy
0.25 percent of calibrated range ± 1 digit

Stability
0.1 percent calibrated range ± 1 digit per six months

Temperature effect
0.01 percent of calibrated range per °C on zero
0.02 percent of calibrated range per °C on span over the operating temperature range

Power interrupt
All calibration constants are stored in EEPROM memory and are not affected by power loss.

Failure mode
LCD display meter failure will not affect transmitter operation.

Under/Over range indication
Input current < 3.5 mA: Display blank
Input current > 22.0 mA: Display flashes 112.5 percent of full scale value or 9999, whichever is less

Physical specification

Meter size
2 1/4-in. diameter face with four 1/2-in. high characters

Analog meter specifications

Functional specifications

Input signal
- 4–20 mA dc
- 10–50 mA dc
- 40–200 mV

Note
Maximum series resistance is ten ohms for ammeters.

Meter indication
0 to 100 percent linear scale
0 to 100 percent flow scale
Special optional ranges

Overload limitation
150 percent of rated end scale value for two minutes

Temperature limits
-40 to 65 °C (–40 to 150 °F)

Humidity limits
0 to 100 percent relative humidity

Zero adjustment
Adjustment screw on face of meter

Performance specifications

Indication accuracy
±2 percent of calibrated span

Temperature effect
Less than 2 percent of full scale at any point within the temperature limits

Physical specification

Meter size
2 1/4-in. diameter face with 2-in. long scale
