1 About this guide

This guide provides basic guidelines for Rosemount 214C Sensor models. If the sensor was ordered assembled to a temperature thermowell or transmitter, see the appropriate product literature for information on configuration and hazardous locations certifications.

1.1 Safety messages

**NOTICE**

Complications can arise when the sensors and the transmitters to which they are assembled are certified to compatible, but each has different approvals. Be aware of the following situations:

- If an I.S. approved 214C sensor is ordered with a housing, a transmitter enclosed in that housing may have a different I.S. approval rating. Refer to the transmitter IS certificate if applicable.

- If a sensor and transmitter have different certifications, or if either has more certifications than the other, installation must comply with the most restrictive requirements required by either component. This is especially (but not exclusively) relevant when combination approvals are ordered on either the sensor or transmitter. Review certifications on both the sensor and transmitter for installation requirements and ensure installation of the sensor/transmitter assembly complies with a single certification that is shared by both of these components and that meets the requirements of the application.

**⚠️ WARNING**

**Explosion**

Explosions could result in death or serious injury.

Installation of sensor in an explosive environment must be in accordance with appropriate local, national, and international standards, codes, and practices.
WARNING

Conduit/cable entries

Unless marked, the conduit/cable entries in the transmitter housing use a ½–14 NPT thread form. Entries marked “M20” are M20 × 1.5 thread form. On devices with multiple conduit entries, all entries will have the same thread form. Only use plugs, adapters, glands, or conduit with a compatible thread form when closing these entries.

When installing in a hazardous location, use only appropriately listed or Ex certified plugs, glands, or adapters in cable/conduit entries. Only use plugs, adapters, glands, or conduit with a compatible thread form when closing these entries.

Physical access

Unauthorized personnel may potentially cause significant damage to and/or misconfiguration of end users’ equipment. This could be intentional or unintentional and needs to be protected against.

Physical security is an important part of any security program and fundamental to protecting your system. Restrict physical access by unauthorized personnel to protect end users’ assets. This is true for all systems used within the facility.
2 Wiring diagram for RTDs

Figure 2-1: RTD Lead Wire Configuration per IEC 60751

Single element, 3-wire

Single element, 4-wire

Dual element, 3-wire

Note
To configure a single element, 4-wire RTD as a 3-wire system, connect only one white lead. Insulate or terminate the unused white lead in a manner that prevents shorting to the ground. To configure a single element, 4-wire RTD as a 2-wire system, connect matching colored wires first and then connect the paired wires to the terminal.
3 Wiring diagram for thermocouples

**Note**
Dual thermocouple sensors are shipped with one pair of the wires shrink-wrapped together.
4 Product certifications

Rev 2.1

European Directive information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary Location Certification

The Rosemount 214C has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

North America

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

4.1 USA

4.1.1 E5 USA Explosionproof (XP) and Dust-Ignitionproof (DIP)

Certificate 70044744

Markings XP CL I, DIV 1, GP B, C, D; DIP CL II, DIV 1, GP E, F, G; CL III; T6 (-50 °C ≤ T_a ≤ +80 °C), T5 (-50 °C ≤ T_a ≤ +95 °C); Seal not required; installed per Rosemount drawing 00214-1030; Type 4X† and IP 66/67; V_{max} 35 VDC, 750 mW_{max}

Special Conditions for Safe Use (X)

1. Flameproof joints are not intended for repair.
2. Cable entries must be used which maintain the ingress protection of the enclosure. Unused cable entries must be filled with suitable blanking plugs.

4.1.2 N5 USA Division 2 (NI)

Certificate 70044744

Markings  NI CL I, DIV 2, GP A, B, C, D; T6 (-50 °C ≤ T_a ≤ +80 °C), T5 (-50 °C ≤ T_a ≤ +95 °C); installed per Rosemount drawing 00214-1030; Type 4X† and IP 66/67; V_{max} 35 VDC, 750 mW_{max}

4.1.3 E6 Canada Explosionproof (XP) and Dust-Ignitionproof (DIP)

Certificate  70044744

Markings  XP CL I, DIV 1, GP B*, C, D; DIP CL II, DIV 1, GP E, F, G; CL III; T6 (-50 °C ≤ T_a ≤ +80 °C), T5 (-50 °C ≤ T_a ≤ +95 °C); Seal not required; installed per Rosemount drawing 00214-1030; Type 4X† and IP 66/67; V_{max} 35 VDC, 750 mW_{max}

Special Conditions for Safe Use (X)
1. Flameproof joints are not intended for repair.
2. Cable entries must be used which maintain the ingress protection of the enclosure. Unused cable entries must be filled with suitable blanking plugs.

4.1.4 N6 Canada Division 2

Certificate  70044744

Markings  CL I, DIV 2, GP A, B, C, D; T6; (-50 °C ≤ T_a ≤ +80 °C), T5 (-50 °C ≤ T_a ≤ +95 °C); installed per Rosemount drawing 00214-1030; Type 4X† and IP 66/67; V_{max} 35 VDC, 750 mW_{max}

† Spring loaded indicator has reduced ingress and dust ratings. Spring loaded sensors must be installed in a thermowell to maintain dust and ingress ratings. Un-painted aluminum enclosures are Type 4 rated. * Assembly is not Canada Explosionproof (E6) rated to Group B if the AT1 (0079) connection head is used.

4.2 Europe
4.2.1 E1 ATEX Flameproof

Certificate  DEMKO 16 ATEX 1677X
Standards EN 60079-0:2012+A11 2013, EN 60079-1:2014

Markings II 2 G Ex db IIC T6...T1 Gb T6(-50 °C ≤ T_a ≤ +80 °C), T5(-50 °C ≤ T_a ≤ +95 °C), T4...T1(-50 °C ≤ T_a ≤ +100 °C) V_{max} = 45 Vdc, P_{max} = 750 mW

Installation Instructions

1. Use field wiring suitable for both the minimum and maximum service temperatures.

2. These devices are provided without cable glands/conduit sealing devices/blanking elements. Proper selection of suitable cable glands/conduit sealing/blanking elements should occur in the field.

3. Unused apertures shall be closed with suitable blanking elements.

4. The enclosures may be provided with up to three ½–14 NPT, ¾–14 NPT, or M20 x 1.5 entries, with location of the entries specified in the installation instructions document.

Special Conditions for Safe Use (X)

1. Refer to certificate for details regarding process and ambient temperature limits.

2. When the Rosemount 214C sensor is provided with an enclosure with a display cover, the maximum ambient shall be 95 °C.

3. The non-metallic label on the device may store an electrostatic charge and become a source of ignition in Group III atmospheres. Care shall be taken to reduce electrostatic build-up. For example, the non-metallic label may be rubbed with a damp cloth.

4. The display covers were impacted at 4 J according to a low risk of mechanical danger. Guard the display covers against impact energies greater than 4 J.

5. Flameproof joints are not intended for repair.

6. The stand-alone Rosemount 214C sensors without an enclosure must be assembled to a suitable Ex certified enclosure of a volume no greater than 0.55 L to maintain the types of protection “db” and “tb”.

7. The spring loaded sensors and DIN sensors must be installed in a thermowell to maintain IP6X ratings.

8. Contact indicating sensors do not meet requirements for protection type “tb” and therefore are not “tb” rated.

1. Refer to certificate for Special Conditions for Safe Use.

4.6.2 IP Korea Intrinsic Safety

**Certificate** 17-KA4BO-0304X

**Markings** Ex ia IIC T6/T5

**Special Condition for Safe Use (X)**
1. Refer to certificate for details regarding process and ambient temperature limits as well as Special Conditions for Safe Use.

4.6.3 KP Korea Flameproof Dust Ignitionproof and Intrinsic Safety

**Certificate** 17-KA4BO-0306X in addition to the EP and IP certificate numbers

**Markings** Ex tb IIC T130 °C, T130 °C (-50 °C ≤ T_a ≤ +100 °C) in addition to the markings for EP and IP

**Special Condition for Safe Use (X)**
1. Refer to certificate for details regarding process and ambient temperature limits as well as Special Conditions for Safe Use.

4.7 Russia

4.7.1 EM Technical Regulation Customs Union TR CU 012/2011 (EAC) Flameproof

**Markings** 1Ex db IIC T6...T1 Gb X, T6(−55 °C ≤ T_a ≤ +80 °C), T5(−55 °C ≤ T_a ≤ +95 °C), T4...T1(−55 °C ≤ T_a ≤ +100 °C)
Special Condition for Safe Use (X)

1. Refer to certificate for Special Conditions for Safe Use

4.7.2 IM Technical Regulation Customs Union TR CU 012/2011 (EAC) Intrinsic Safety

**Markings** 0Ex ia IIC T5,T6 Ga X

Special Condition for Safe Use (X)

1. Refer to certificate for details regarding process and ambient temperature limits as well as Special Conditions for Safe Use.

4.7.3 KM Technical Regulation Customs Union TR CU 012/2011 (EAC) Flameproof, Dust-Ignitionproof, and Intrinsic Safety

**Markings** Ex tb IIIC T130 °C Db X in addition to the markings above for EM and IM.

Special Condition for Safe Use (X)

1. Refer to certificate for details regarding process and ambient temperature limits as well as Special Conditions for Safe Use.

5 Declaration of Conformity

EU Declaration of Conformity
No: RMD 1109 Rev. D

We,

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

declare under our sole responsibility that the product,

Rosemount™ 214C Temperature Sensor

manufactured by,

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

to which this declaration relates, is in conformity with the provisions of the European Union Directives, including the latest amendments, as shown in the attached schedule.

Assumption of conformity is based on the application of the harmonized standards and, when applicable or required, a European Union notified body certification, as shown in the attached schedule.

本表格系依据 SJ/T11364 的规定而制作。
This table is proposed in accordance with the provision of SJ/T11364.

O: 意为该部件的所有均质材料中该有害物质的含量均低于 GB/T 26572 所规定的限量要求。
O: Indicate that said hazardous substance in all of the homogeneous materials for this part is below the limit requirement of GB/T 26572.

X: 意为该部件所使用的所有均质材料中至少有一类均质材料中该有害物质的含量高于 GB/T 26572 所规定的限量要求。
X: Indicate that said hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.
