1 About this guide

This guide provides basic guidelines for installing the Rosemount 3144P Transmitter. It does not provide instructions for detailed configuration, diagnostics, maintenance, service, troubleshooting, Explosion-proof, Flameproof, or intrinsically safe (I.S.) installations. Refer to the Rosemount 3144P Transmitter Reference Manual for more instructions. The manual and this guide are also available electronically on Emerson.com/Rosemount.

⚠️ WARNING

Explosions

Explosions could result in death or serious injury.

- Installation of device in an explosive environment must be in accordance with appropriate local, national, and international standards, codes, and practices.
- Review the Product Certifications section of this document for any restrictions associated with a safe installation.
- In an Explosion-proof/Flameproof installation, do not remove the transmitter covers when power is applied to the unit.

Process leaks

Process leaks may cause harm or result in death.

- Install and tighten thermowells and sensors before applying pressure.
- Do not remove the thermowell while in operation.

Conduit/cable entries

- The conduit/cable entries in the transmitter housing use a ½–14 NPT thread form.
- When installing in a hazardous location, use only appropriately listed or Ex certified plugs, glands, or adapters in cable/conduit entries.

Electrical shock

Electrical shock can result in death or serious injury.

Avoid contact with the leads and terminals. High voltage that may be present on leads could cause electrical shock.
WARNING

Physical access

Unauthorized personnel may potentially cause significant damage to and/or misconfiguration of end users’ equipment. This could be intentional or unintentional and needs to be protected against.

Physical security is an important part of any security program and fundamental to protecting your system. Restrict physical access by unauthorized personnel to protect end users’ assets. This is true for all systems used within the facility.
2 Mount the transmitter

Mount the transmitter at a high point in the conduit run to prevent moisture from draining into the transmitter housing.

2.1 Typical North American installation

**Figure 2-1: Typical Direct-Mounted Configuration**

A. Thermowell  
B. Extension (nipple)  
C. Union or coupling  
D. Conduit for field wiring (dc power)  
E. Extension fitting length

**Procedure**

1. Mount the thermowell to the process container wall.  
2. Install and tighten thermowells.  
3. Perform a leak check.  
4. Attach any necessary unions, couplings, and extension fittings. Seal the fitting threads with an approved thread sealant, such as silicone or PTFE tape (if required).  
5. Screw the sensor into the thermowell or directly into the process (depending on installation requirements).  
6. Verify all sealing requirements.  
7. Attach the transmitter to the thermowell/sensor assembly. Seal all threads with an approved thread sealant, such as silicone or PTFE tape (if required).  
8. Install field wiring conduit into the open transmitter conduit entry (for remote mounting) and feed wires into the transmitter housing.  
9. Pull the field wiring leads into the terminal side of the housing.  
10. Attach the sensor leads to the transmitter sensor terminals. The wiring diagram is located inside the housing cover.
11. Attach and tighten both transmitter covers.

2.2 Typical European installation

Figure 2-2: Typical Remote-Mounted Configuration with Cable Glands

A. Cable gland
B. Shielded cable from sensor to transmitter
C. Shielded cable from transmitter to control room
D. 2-in. (50 mm) pipe
E. B4 mounting bracket

Procedure

1. Mount the thermowell to the process container wall.
2. Install and tighten thermowells.
3. Perform a leak check.
4. Attach a connection head to the thermowell.
5. Insert sensor into the thermowell and wire the sensor to the connection head.
   The wiring diagram is located inside the connection head.
6. Mount the transmitter to a 2-in. (50 mm) pipe or a panel using one of the optional mounting brackets.
7. Attach cable glands to the shielded cable running from the connection head to the transmitter conduit entry.
8. Run the shielded cable from the opposite conduit entry on the transmitter back to the control room.
9. Insert shielded cable leads through the cable entries into the connection head/transmitter. Connect and tighten cable glands.
10. Connect the shielded cable leads to the connection head terminals (located inside the connection head) and to the sensor wiring terminals (located inside the transmitter housing).
3  Wire and apply power

3.1  Wire the transmitter

**Table 3-1: Single Sensor**

<table>
<thead>
<tr>
<th>2-wire RTD and ohms</th>
<th>3-wire RTD and ohms$^1$</th>
<th>4-wire RTD and ohms</th>
<th>T/Cs and millivolts</th>
<th>RTD with compensation loop$^2$</th>

<td><img src="image4" alt="Diagram 4" /></td>
<td><img src="image5" alt="Diagram 5" /></td>
</tr>
</tbody>
</table>

$^1$ Emerson provides 4-wire sensors for all single-element RTDs. You can use these RTDs in 3-wire configurations by leaving the unneeded leads disconnected and insulated with electrical tape.

$^2$ Transmitter must be configured for a 3-wire RTD in order to recognize an RTD with a compensation loop.

**Table 3-2: Dual Sensor**

Emerson provides 4-wire sensors for all single-element RTDs. To use these RTDs in three-wire configurations, leave the unneeded leads disconnected and insulated with electrical tape.

3.2 Power the transmitter

A. Sensor terminals (1–5)
B. Power terminals
C. Ground

Procedure

1. Remove the terminal block cover.
2. Connect power to the power terminal.
   The terminals are polarity insensitive.
3. Tighten the terminal screws.
4. Reattach and tighten the cover.

⚠️ WARNING

Enclosure

Enclosure covers must be fully engaged to meet explosion-proof requirements.

5. Apply power.
3.3  Ground the transmitter

3.3.1  Ungrounded thermocouple, mV, and RTD/ohm inputs

Each process installation has different requirements for grounding. Use the grounding options recommended by the facility for the specific sensor type or begin with grounding option 1 (the most common).

**Ground the transmitter: option 1**

Emerson recommends this option for ungrounded transmitter housing.

**Procedure**

1. Connect signal wiring shield to the sensor wiring shield.
2. Ensure the two shields are tied together and electrically isolated from the transmitter housing.
3. Ground shield at the power supply end only.
4. Ensure that the sensor shield is electrically isolated from the surrounding grounded fixtures.
5. Connect shields together, electrically isolated from the transmitter.

![Diagram](A: Sensor wire, B: Transmitter, C: Shield ground point)

**Ground the transmitter: option 2**

Emerson recommends this method for grounded transmitter housing.

**Procedure**

1. Connect sensor wiring shield to the transmitter housing. 
   Do this only if the housing is grounded.
2. Ensure that the sensor is electrically isolated from surrounding fixtures that may be grounded.
3. Ground signal wiring shield at the power supply end.
Ground the transmitter: option 3

Procedure

1. Ground sensor wiring shield at the sensor, if possible.
2. Ensure the sensor wiring and signal wiring shields are electrically isolated from the transmitter housing and other grounded fixtures.
3. Ground signal wiring shield at the power supply end.

3.3.2 Ground thermocouple inputs

Procedure

1. Ground sensor wiring shield at the sensor.
2. Ensure the sensor wiring and signal wiring shields are electrically isolated from the transmitter housing and other grounded fixtures.

3. Ground signal wiring shield at the power supply end.

A. Sensor wire  
B. Transmitter  
C. Shield ground point
4 Verify tagging

4.1 Commissioning (paper) tag

To identify which device is at a particular location use the removable tag provided with the transmitter. Ensure the physical device tag (PD Tag field) is properly entered in both places on the removable commissioning tag and tear off the bottom portion for each transmitter.

![Commissioning Tag]

**Note**
The device description loaded in the host system must be at the same revision as this device. You can download the device description from Emerson.com/Rosemount.

4.1.1 Verify transmitter configuration

Each FOUNDATION Fieldbus host or configuration tool has a different way of displaying and performing configurations. Some use Device Descriptions (DD) or DD methods for configuration and to display data consistently across platforms. There is no requirement that a host or configuration tool support these features.
The following is the minimum configuration requirement for a temperature measurement. This guide is designed for systems not using DD methods. For a complete list of parameters and configuration information, refer to the Rosemount 3144P Temperature Transmitter Reference Manual.

4.2 Transducer function block

This block contains temperature measurement data for the sensors and the terminal temperature. It also includes information about sensor types, engineering units, damping, and diagnostics.

At a minimum, verify the parameters in Table 4-1.

**Table 4-1: Transducer Block Parameters**

4.2.1 Analog Input (AI) function block

The AI block processes field device measurements and makes the outputs available to other function blocks. The output value of the AI block is in engineering units and contains a status indicating the quality of the measurements. Use the channel number to define the variable that the AI block processes.

At a minimum, verify the parameters of each AI block in Table 4-2.

**Note**

All devices ship with the AI blocks scheduled, meaning the operator does not need to configure the block or he or she uses factory default channels.

**Table 4-2: AI Block Parameters**

Configure one AI Block for each desired measurement.

</tbody>
</table>
Note
To make changes to the AI block, set the BLOCK_MODE (TARGET) to OOS (out of service). After making the changes, return the BLOCK_MODE TARGET to AUTO.

4.2.2 Set switches

The security and simulate switches are located on the top center of the electronics module.

Note
The factory ships the simulate switch in the "ON" position.

Set the switches with an LCD display

Procedure
1. Set the loop to manual (if applicable) and disconnect the power.
2. Remove the electronics housing cover.
3. Unscrew the LCD display screws and gently slide the meter straight off.
4. Set the alarm and security switches to the desired position.
5. Gently slide the LCD display back into place.
6. Replace and tighten the LCD display screws to secure the LCD display.
7. Reattach housing cover.
8. Apply power and set the loop to automatic control.

Set the switches without an LCD display

Procedure
1. Set the loop to manual (if applicable) and disconnect the power.
2. Remove the electronics housing cover.
3. Set the alarm and security switches to the desired position.
4. Reattach housing cover.
5. Apply power and set the loop to automatic control.
5 Product certifications

Rev 2.4

5.1 European Directive information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

5.2 Ordinary location certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

5.3 North America

5.3.1 E5 FM Explosionproof, Dust-Ignitionproof, and Nonincendive

**Certificate** 1242650

**Markings** Explosionproof for Class I, Groups A, B, C, D; Class II, Groups E, F, G; Class III;

[HART only zone markings]: Suitable for Class I Zone 1 Group IIC; Intrinsically Safe for Class I Groups A, B, C, D; Class II, Groups E, F, G; Class III;

[HART only zone markings]: Suitable for Class I Zone 0 Group IIC; T4(-50 °C ≤ T_a ≤ +60 °C); Type 4X; Suitable for Class I, Div. 2, Groups A, B, C, D;

[HART only zone markings]: Suitable for Class I Zone 2 Group IIC; T6(-60 °C ≤ T_a ≤ +60 °C); T5(-60 °C ≤ T_a ≤ +85 °C); when installed per Rosemount drawing 03144-5076.

5.4 **Europe**

5.4.1 **E1 ATEX Flameproof**

**Certificate** FM12ATEX0065X

Markings

II 2 G Ex db IIC T6...T1 Gb, T6(-50 °C ≤ T_a ≤ +40 °C), T5...
T1(-50 °C ≤ T_a ≤ +60 °C);
See Process temperature limits for process temperatures.

Specific Conditions of Use (X):

1. See certificate for ambient temperature range.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than four joules.
4. Flameproof joints are not intended for repair.
5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option "N".
6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 266 °F (130 °C).
7. Non-standard paint options may cause risk of electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

5.4.2 I1 ATEX Intrinsic Safety

Certificate
BAS01ATEX1431X [HART]; Baseefa03ATEX0708X [Fieldbus]

Standards
EN IEC 60079-0: 2018; EN 60079-11:2012

Markings
HART: II 1 G Ex ia IIC T5/T6 Ga; T6(-60 °C ≤ T_a ≤ +50 °C), T5(-60 °C ≤ T_a ≤ +75 °C)
Fieldbus: II 1 G Ex ia IIC T4 Ga; T4(-60 °C ≤ T_a ≤ +60 °C)
See Table 5-9 for entity parameters.

Special Conditions for Safe Use (X):

1. When fitted with the transient terminal options, the equipment is not capable of passing the 500 V insulation test. This must be taken into account during installation.
2. The enclosure may be made from aluminum alloy with a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion when located in Zone 0.
5.4.3 N1 ATEX Type n

**Certificate**  BAS01ATEX3432X [HART]; Baseefa03ATEX0709X [Fieldbus]

**Standards**  EN IEC 60079-0:2018, EN 60079-15:2010

**Markings**  
HART: Ex II 3 G Ex nA IIC T5/T6 Gc; T6(-40 °C ≤ T_a ≤ +50 °C), T5(-40 °C ≤ T_a ≤ +75 °C);
Fieldbus: Ex II 3 G Ex nA IIC T5 Gc; T5(-40 °C ≤ T_a ≤ +75 °C);

**Special Condition for Safe Use (X):**

1. When fitted with the transient terminal options, the equipment is not capable of passing the 500 V electrical strength test as defined in clause 6.5.1 of EN 60079-15: 2010. This must be taken into account during installation.

5.4.4 ND ATEX Dust

**Certificate**  FM12ATEX0065X

**Markings**  Ex II 2 D Ex tb IIIC T130°C Db, (-40 °C ≤ T_a ≤ +70 °C); IP66
See Process temperature limits for process temperature.

**Specific Conditions of Use (X):**

1. See certificate for ambient temperature range.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than four joules.
4. Flameproof joints are not intended for repair.
5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option "N".
6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 266 °F (130 °C).
7. Non-standard paint options may cause risk of electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.
5.5  International

5.5.1  E7 IECEx Flameproof

**Certificate**  IECEx FMG 12.0022X

**Standards**  IEC 60079-0:2011, IEC 60079-1:2014-06

**Markings**  Ex db IIC T6...T1 Gb, T6(-50 °C ≤ T_a ≤ +40 °C), T5...T1(-50 °C ≤ T_a ≤ +60 °C)

See Process temperature limits for process temperatures.

**Specific Conditions of Use (X):**

1. See certificate for ambient temperature range.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than four joules.
4. Flameproof joints are not intended for repair.
5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option "N".
6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 266 °F (130 °C).
7. Non-standard paint options may cause risk of electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

Additionally available with option K7

**IECEx Dust**

**Certificate**  IECEx FMG 12.0022X

**Standards**  IEC 60079-0:2011 and IEC 60079-31:2013

**Markings**  Ex tb IIIC T130 °C Db, (-40 °C ≤ T_a ≤ +70 °C); IP66

See Process temperature limits for process temperatures.

**Specific conditions of use (X):**

1. See certificate for ambient temperature range.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.

3. Guard the LCD display cover against impact energies greater than four joules.

4. Flameproof joints are not intended for repair.

5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option "N".

6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 266 °F (130 °C).

7. Non-standard paint options may cause risk of electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

5.5.2 I7 IECEx Intrinsic Safety

**Certificate** IECEx BAS 07.0002X [HART]; IECEx BAS 07.0004X [Fieldbus]

**Standards** IEC 60079-0: 2017; IEC 60079-11: 2011

**Markings** HART: Ex ia IIC T5/T6 Ga; T6(−60 °C ≤ T_a ≤ +50 °C), T5(−60 °C ≤ T_a ≤ +75 °C);
Fieldbus: Ex ia IIC T4 Ga; T4(−60 °C ≤ T_a ≤ +60 °C)
See Table 5-9 for entity parameters.

**Special Conditions for Safe Use (X):**

1. When fitted with the transient terminal options, the equipment is not capable of passing the 500 V electrical strength test as defined in Clause 6.3.13 of IEC 60079-11: 2011. This must be taken into account during installation.

2. The enclosure may be made from aluminum alloy with a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion when located in Zone 0.

5.5.3 N7 IECEx Type n

**Certificate** IECEx BAS 07.0003X [HART]; IECEx BAS 07.0005X [Fieldbus]

**Standards** IEC 60079-0:2017, IEC 60079-15:2010

**Markings** HART: Ex nA IIC T5/T6 Gc; T6(−40 °C ≤ T_a ≤ +50 °C), T5(−40 °C ≤ T_a ≤ +75 °C);
Fieldbus: Ex nA IIC T5 Gc; T5(−40 °C ≤ T_a ≤ +75 °C);
**Special Condition for Safe Use (X):**

1. When fitted with the transient terminal options, the equipment is not capable of passing the 500 V electrical strength test as defined in clause 6.5.1 of EN 60079-15: 2010. This must be taken into account during installation.

5.6 Brazil

5.6.1 E2 INMETRO Flameproof and Dust

**Certificate**  UL-BR 13.0535X

**Standards**  ABNT NBR IEC 60079-0:2013; ABNT NBR IEC 60079-1:2016; ABNT NBR IEC 60079-31:2014

**Markings**  Ex db IIC T6...T1 Gb; T6(-50 °C ≤ T_a ≤ +40 °C); T5...T1(-50 °C ≤ T_a ≤ +60 °C)

**Special Conditions for Safe Use (X):**

1. See product description for ambient temperature limits and process temperature limits.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than four joules.
4. Consult the manufacturer if dimensional information on the flameproof joints is necessary.

5.6.2 I2 INMETRO Intrinsic Safety [HART]

**Certificate**  UL-BR 15.0088X

**Standards**  ABNT NBR IEC 60079-0:2013, ABNT NBR IEC 60079-11:2013

**Markings**  Ex ia IIC T6 Ga (-60 °C < T_a < 50 °C), Ex ia IIC T5 Ga (-60 °C < T_a < 75 °C)

See Table 5-9 for entity parameters.

**Special Conditions for Safe Use (X):**

1. When fitted with the transient terminal options, the equipment is not capable of withstanding the 500 V electrical strength test as defined in ABNT NBR IEC60079-11. This must be taken into account during installation.
2. The enclosure may be made from aluminum alloy with a protective polyurethane paint finish; however, care should be taken to protect it
from impact and abrasion when located in areas that require EPL Ga (Zone 0).

**INMETRO Intrinsic Safety [Fieldbus/FISCO]**

**Certificate**  UL-BR 15.0030X

**Standards**  ABNT NBR IEC 60079-0:2013, ABNT NBR IEC 60079-11:2013

**Markings**  Ex ia IIC T4 Ga (-60 °C < T<sub>a</sub> < +60 °C)

See Table 5-9 at the end of the Product Certifications section for Entity Parameters

**Special Conditions for Safe Use (X):**

1. When fitted with the transient terminal options, the equipment is not capable of withstanding the 500 V electrical strength test as defined in ABNT NBR IEC60079-11. This must be taken into account during installation.

2. The enclosure may be made from aluminum alloy with a protective polyurethane paint finish; however, care should be taken to protect it from impact and abrasion when located in areas that require EPL Ga (Zone 0).

5.7  China

5.7.1  E3 China Flameproof

**Certificate**  GYJ16.1339X

**Standards**  GB3836.1-2010, GB3836.2-2010

**Markings**  Ex d IIC T6…T1 Gb

- 产品安全使用特殊条件
  证书编号后缀“X”表明产品具有安全使用特殊条件：涉及隔爆接合面的维修须联系产品制造商。

- 产品使用注意事项
  1. 产品使用环境温度与温度组别的关系为:

<table>
<thead>
<tr>
<th>温度组别</th>
<th>环境温度</th>
</tr>
</thead>
<tbody>
<tr>
<td>T6~T1</td>
<td>-50 °C ≤ T&lt;sub&gt;a&lt;/sub&gt; ≤ +40 °C</td>
</tr>
<tr>
<td>T5~T1</td>
<td>-50 °C ≤ T&lt;sub&gt;a&lt;/sub&gt; ≤ +60 °C</td>
</tr>
</tbody>
</table>

2. 产品外壳设有接地端子，用户在使用时应可靠接地
3. 安装现场应不存在对产品外壳有腐蚀作用的有害气体
4. 现场安装时，电缆引入口须选用国家指定的防爆检验机构按检验认可、具有 Ex dⅡC 防爆等级的电缆引入装置或堵封件，冗余电缆引入口须用堵封件有效密封。

5. 现场安装、使用和维护必须严格遵守“断电后开盖！”的警告语。

6. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。

5.7.2 I3 China Intrinsic Safety

**Certificate**  GYJ16.1338X  
**Standards**  GB3836.1-2010, GB3836.4-2010, GB3836.20-2010  
**Markings**  Ex ia IIC T4/T5/T6 Ga

- 产品安全使用特殊条件
  证书编号后缀“X”表明产品具有安全使用特殊条件：
  1. 产品外壳含有轻金属，用于 0 区时需注意防止由于冲击或摩擦产生的点燃危险
  2. 产品选用瞬态保护端子板（选项代码为 T1）时，此设备不能承受 GB3836.4-2010 标准中第 6.3.12 条规定的 500V 交流有效值试验电压的介电强度试验

- 产品使用注意事项
  1. 产品温度组别与使用环境温度范围的关系：

<table>
<thead>
<tr>
<th>输出</th>
<th>温度组别</th>
<th>环境温度</th>
</tr>
</thead>
<tbody>
<tr>
<td>HART®</td>
<td>T6</td>
<td>-60 °C ≤ Ta ≤ +50 °C</td>

</tbody>
</table>

3. 该产品必须与已通过防爆认证的关联设备配套共同组成本安防爆系统方可使用于爆炸性气体环境。其系统接线必须同时遵守本产品和所配关联设备的使用说明书要求，接线端子不得接错
4. 该产品与关联设备的连接电缆应为带绝缘护套的屏蔽电缆，其屏蔽层应在安全场所接地

5. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生

2. 输入电压：32 Vdc (Fieldbus)，42.4 Vdc (HART)
3. 现场安装时，电缆引入口须选用经国家指定的防爆检验机构检验认可的 Exe 或 Exn 型、螺纹规格为 14NPT 的电缆引入装置或封堵件，冗余电缆引入口须用封堵件有效密封。

4. 现场安装时，电缆引入口须选用经国家指定的防爆检验机构检验认可的 Exe 或 Exn 型、螺纹规格为 14NPT 的电缆引入装置或封堵件，冗余电缆引入口须用封堵件有效密封。

5. 安装现场确认无可燃性气体存在时方可维修。

6. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。

5.8 EAC - Belarus, Kazakhstan, Russia

5.8.1 EM Technical Regulation Customs Union (EAC) Flameproof

**Standards** GOST 31610.0-2014, GOST IEC 60079-1-2013

**Markings** 1Ex db IIC T6...T1 Gb X, T6(-50 °C ≤ T_a ≤ +40 °C), T5...T1(-50 °C ≤ T_a ≤ +60 °C)

See Process temperature limits for process temperatures.

**Special Condition for Safe Use (X):**

1. Non-standard paint options may cause risk of electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

5.8.2 IM Technical Regulation Customs Union (EAC) Intrinsic Safety

**Standards** GOST 31610.0-2014, GOST IEC 60079-11-2014

**Markings** [HART]: 0Ex ia IIC T5, T6 Ga X, T6(-60 °C ≤ T_a ≤ +50 °C), T5(-60 °C ≤ T_a ≤ +75 °C);

[Fieldbus/PROFIBUS]: 0Ex ia IIC T4 Ga X, T4(-60 °C ≤ T_a ≤ +60 °C)

See Table 5-9 for entity parameters.

**Special Conditions for Safe Use (X):**

1. When fitted with the transient terminal options, the apparatus is not capable of withstanding the 500 V electrical strength test as defined...
in Clause 6.3.13 of GOST 31610.11-2014. This must be taken into account during installation.

2. The enclosure may be made from aluminum alloy with a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion when located in Zone 0.

5.8.3 **KM Technical Regulation Customs Union (EAC) Flameproof, Intrinsic Safety, and Dust**

**Standards**  GOST 31610.0-2014, GOST IEC 60079-1-2013, GOST IEC 60079-11-2014, GOST IEC 60079-31-2013

**Markings**  Ex tb IIIC T130 °C Db X (-40 °C ≤ T_a ≤ +70 °C), IP 66 in addition to markings listed for EM and IM above.

**Special Condition for Safe Use (X):**

5.14 Declaration of conformity

EU Declaration of Conformity
No: RMD 1045 Rev. N

We,

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

declare under our sole responsibility that the product,

Rosemount™ 3144P Temperature Transmitter

manufactured by

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

to which this declaration relates, is in conformity with the provisions of the European Union Directives, including the latest amendments, as shown in the attached schedule.

Assumption of conformity is based on the application of the harmonized standards and, when applicable or required, a European Union notified body certification, as shown in the attached schedule.

Chris LaPoint
Vice President of Global Quality
