Rosemount™ 644H Temperature Transmitter

with PROFIBUS® PA
Safety messages

**NOTICE**

This guide provides basic guidelines for installing the Rosemount™ 644 Temperature Transmitter. It does not provide instructions for detailed configuration, diagnostics, maintenance, service, troubleshooting, or installation. Refer to the Rosemount 644 Reference Manual for more instruction. The manual and this guide are also available electronically on Emerson.com/Rosemount.

---

**Important**

Read this manual before working with the product. For personal and system safety, and for optimum product performance, make sure to thoroughly understand the contents before installing, using, or maintaining this product. The United States has two toll-free assistance numbers and one international number.

Customer Central: 1-800-999-9307 (7:00 a.m. to 7:00 p.m. Central Standard Time)
National Response Center: 1-800-654-7768 (24 hours a day). Equipment service needs
International: 1-(952)-906-8888

---

**WARNING**

**Physical access**

Unauthorized personnel may potentially cause significant damage to and/or misconfiguration of end users' equipment. This could be intentional or unintentional and needs to be protected against. Physical security is an important part of any security program and fundamental to protecting your system. Restrict physical access by unauthorized personnel to protect end users' assets. This is true for all systems used within the facility.

---

**WARNING**

**Follow instructions**

Failure to follow these installation guidelines could result in death or serious injury.

Ensure only qualified personnel perform the installation.

---

**WARNING**

**Explosions**

Explosions could result in death or serious injury.

Installation of the transmitters in a hazardous environment must be in accordance with the appropriate local, national, and international standards, codes, and practices. Please review the Product Certifications section for any restrictions associated with a safe installation. Do not remove the connection head cover in explosive atmospheres when the circuit is live. Before connecting a handheld communicator in an explosive atmosphere, ensure the instruments are installed in accordance with intrinsically safe or non-incendive field wiring practices. Verify the operating atmosphere of the transmitter is consistent with the appropriate hazardous locations certifications. All connection head covers must be fully engaged to meet explosion-proof requirements.
WARNING

Process leaks
Process leaks could result in death or serious injury.
- Do not remove the thermowell while in operation.
- Install and tighten thermowells and sensors before applying pressure.

WARNING

Electrical shock
Electrical shock could cause death or serious injury.
- Avoid contact with the leads and terminals. High voltage that may be present on leads can cause electrical shock.

Transmitter configuration.......................................................................................................... 16
Product certifications................................................................................................................. 20
1 Mount the transmitter

Mount the transmitter at a high point in the conduit run to prevent moisture from draining into the transmitter housing.

1.1 Install connection head

Head mount transmitter with DIN plate style sensor.

Procedure

1. Attach the thermowell to the pipe or process container wall. Install and tighten the thermowell before applying process pressure.
2. Assemble the transmitter to the sensor. Push the transmitter mounting screws through the sensor mounting plate and insert the snap rings (optional) into the transmitter mounting screw groove.
3. Wire the sensor to the transmitter.
4. Insert the transmitter-sensor assembly into the connection head. Thread the transmitter mounting screws into the connection head mounting holes. Assemble the extension to the connection head. Insert the assembly into the thermowell.
5. Slip the shielded cable though the cable gland.
6. Attach the cable gland into the shielded cable.
7. Insert the shielded cable leads into the connection head through the cable entry. Connect and tighten the cable gland.
8. Connect the shielded power cable leads to the transmitter power terminals. Avoid contact with sensor leads and sensor connections.
9. Install and tighten the connection head cover.

⚠️ WARNING

Enclosure covers must be fully engaged to meet explosion-proof requirements.
1.2 Install universal head

Head mount transmitter with threaded sensor.

Procedure

1. Attach the thermowell to the pipe or process container wall. Install and tighten thermowells before applying process pressure.

2. Attach necessary extension nipples and adapters to the thermowell. Seal the nipple and adapter threads with silicone tape.

3. Screw the sensor into the thermowell. Install drain seals if required for severe environments or to satisfy code requirements.

4. Verify the correct installation of Integral Transient Protection (option code T1).
   a) Ensure the transient protector unit is firmly connected to the transmitter puck assembly.
   b) Ensure the transient protector power leads are adequately secured under the transmitter power terminal screws.
   c) Verify the transient protector’s ground wire is secured to the internal ground screw found within the universal head.

Note
The transient protector requires the use of an enclosure of at least 3.5-in. (89 mm) in diameter.

5. Pull the sensor wiring leads through the universal head and transmitter. Mount the transmitter in the universal head by
threading the transmitter mounting screws into the universal head mounting holes.

6. Mount the transmitter-sensor assembly into the thermowell. Seal adapter threads with silicone tape.

7. Install conduit for field wiring to the conduit entry of the universal head. Seal conduit threads with PTFE tape.

8. Pull the field wiring leads through the conduit into the universal head. Attach the sensor and power leads to the transmitter. Avoid contact with other terminals.

9. Install and tighten the universal head cover. Enclosure covers must be fully engaged to meet explosion-proof requirements.

**Example**

<td>E. Conduit entry</td>
</tr>
</tbody>
</table>
2 **Wire and apply power**

Wiring diagrams are located inside the terminal block cover.

An external power supply is required to power a Fieldbus segment.

The power required across the transmitter power terminals is 9 to 32 Vdc (the power terminals are rated to 32 Vdc). To prevent damaging the transmitter, do not allow terminal voltage to drop below 9 Vdc when changing the configuration parameters.

2.1 **Power filter**

A PROFIBUS segment requires a power conditioner to isolate the power supply filter and decouple the segment from other segments attached to the same power supply.

2.2 **Power the transmitter**

**Procedure**

1. Remove the terminal block cover (if applicable).
2. Connect the power lead to the power terminals.
   
   The Rosemount™ 644 power terminals are polarity insensitive for the PROFIBUS® protocol.
3. Tighten the terminal screws.
   
   When tightening the sensor and power wires, the max torque is 6 in-lb. (0.7 N-m).
4. Reattach and tighten the cover (if applicable).
5. Apply power (9–32 Vdc).
Example

A. Sensor terminals
B. Communication terminals
C. Power terminals

Figure 2-1: Sensor Connections

<table>
<thead>
<tr>
<th>Two-wire RTD and Ω</th>
<th>Three-wire RTD(^{(1)}) and Ω</th>
<th>Four-wire RTD(^{(2)}) and Ω</th>
<th>T/C and mV</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Two-wire RTD and Ω" /></td>
<td><img src="image2" alt="Three-wire RTD(^{(1)}) and Ω" /></td>
<td><img src="image3" alt="Four-wire RTD(^{(2)}) and Ω" /></td>
<td><img src="image4" alt="T/C and mV" /></td>
</tr>
</tbody>
</table>

\(^{(1)}\) Emerson provides four-wire sensors for all single element RTDs. Use these RTDs in three-wire configurations by leaving the unneeded leads disconnected and insulated with electrical tape.

\(^{(2)}\) The transmitters must be configured for at least a three-wire RTD in order to recognize an RTD with a compensation loop.
2.3 Ground the transmitter

2.3.1 Ungrounded thermocouple, mV, and RTD/Ohm inputs

Each process installation has different requirements for grounding. Use the grounding options recommended by the facility for the specific sensor type, or begin with grounding option 1 (the most common).

Ground the transmitter: option 1

Procedure

1. Connect sensor wiring shield to the transmitter housing.
2. Ensure the sensor shield is electrically isolated from surrounding fixtures that may be grounded.
3. Ground signal wiring shield at the power supply end.

**Example**

A. Sensor wires  
B. Transmitter  
C. Shield ground point  
D. 4-20 mA loop

---

**Ground the transmitter: option 2**

**Procedure**

1. Connect signal wiring shield to the sensor wiring shield.
2. Ensure the two shields are tied together and electrically isolated from the transmitter housing.
3. Ground shield at the power supply end only.
4. Ensure the sensor shield is electrically isolated from the surrounding grounded fixtures.
**Example**

![Diagram of sensor and DCS](image)

- **A. Sensor wires**
- **B. Transmitter**
- **C. Shield ground point**
- **D. 4-20 mA loop**

**Note**
Connect shields together, electrically isolated from the transmitter.

**Ground the transmitter: option 3**

**Procedure**

1. Ground sensor wiring shield at the sensor if possible.
2. Ensure the sensor wiring and signal wiring shields are electrically isolated from the transmitter housing.
3. Do not connect the signal wiring shield to the sensor wiring shield.
4. Ground the signal wiring shield at the power supply end.
2.3.2 Grounded thermocouple inputs

Ground the transmitter: option 4

Procedure

1. Ground sensor wiring shield at the sensor.
2. Ensure the sensor wiring and signal wiring shields are electrically isolated from the transmitter housing.
3. Do not connect the signal wiring shield to the sensor wiring shield.
4. Ground signal wiring shield at the power supply end.
Example

A. Sensor wires
B. Transmitter
C. Shield ground point
D. 4-20 mA loop
3 Verify tagging

3.1 Commissioning (paper) tag

To identify which device is at a particular location use the removable tag provided with the transmitter. Ensure the physical device tag (PD Tag field) is properly entered in both places on the removable commissioning tag and tear off the bottom portion for each transmitter.

Note
The device description loaded in the host system must be at the same revision as this device. You can download the device description from Emerson.com/Rosemount.
4 Transmitter configuration

Each PROFINET® capable host or configuration tool has a different way of displaying and performing configurations. Some use Device Descriptions (DD) or DD methods for configuration and to display data consistently across platforms. There is no requirement that a host or configuration tool support these features.

The following is the minimum configuration requirement for a temperature measurement. This guide is designed for systems not using DD methods. For a complete list of parameters and configuration information refer to the Rosemount™ 644 Head and Rail Mount Temperature Transmitter Reference Manual.

The Rosemount 644 must be configured via a Class 2 master (DD or DTM based). The basic configuration tasks for the PROFINET PA Temperature Transmitter include:

- Assign address.
- Set sensor type and connection.
- Configure engineering units.

4.1 Assign address

Rosemount™ ships the transmitter with a temporary address of 126. To establish communication with the host, change the address to a unique value between 0 and 125. Usually, addresses 0-2 are reserved for masters or couplers; therefore Emerson recommends using transmitter addresses between 3 and 125.

Note

When shipped from the factory, Rosemount 644 PROFINET Profile 3.02 devices are defaulted in Identification Number ADAPTATION MODE. This mode allows the transmitter to communicate with any PROFINET® control host with either the generic Profile GSD file (9700) or the Rosemount 644 specific GSD (4153) loaded in the host; therefore, you do not have to change the transmitter identification number at startup.

4.1.1 Transducer function block

This block contains temperature measurement data for the sensors and the terminal temperature. It also includes information about sensor types, engineering units, damping, and diagnostics.

At a minimum, verify the parameters in Table 4-1.
Table 4-1: Transducer Block Parameters

<table>

</tbody>
</table>

4.1.2 Analog Input (AI) function block

The AI block processes field device measurements and makes the outputs available to other function blocks. The output value of the AI block is in engineering units and contains a status indicating the quality of the measurements. Use the channel number to define the variable that the AI block processes.

At a minimum, verify the parameters of each AI block in **Table 4-2**.

Table 4-2: AI Block Parameters

Configure one AI Block for each desired measurement.

</tr>
</tbody>
</table>

**Note**

To make changes to the AI block, set the BLOCK_MODE (TARGET) to OOS (out of service). After making the changes, return the BLOCK_MODE TARGET to AUTO.

4.2 Physical block

The physical Block encompasses all parameters and functions required to identify the hardware and software (revision numbers, status values, device address etc.) of the device. Use the IDENT_NUMBER_SELECTOR parameter to change how the host sees the device.

Table 4-3: Physical Block Parameter

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>• Profile Specific mode: Shows the generic GSD associated with the PROFIBUS® Profile version (9700) of the device.</td>
</tr>
<tr>
<td></td>
<td>• Manufacturer Specific mode: Displays the GSD file with parameters specific to the transmitter.</td>
</tr>
</tbody>
</table>

4.3 Host integration

**Control host (Class 1)**

The Rosemount 644 device utilizes Condensed Status as recommended by the Profile 3.02 specification and NE 107. See manual for Condensed Status bit assignment information.

The appropriate GSD file must be loaded on the control host - Rosemount 644 specific (rmt4053.gsd) or Profile 3.02 Generic (pa139700.gsd). These files can be found on EmersonProcess.com/Rosemount or www.profibus.com.
Configuration host (Class 2)

The appropriate DD or DTM file must be installed in the configuration host. These files can be found at EmersonProcess.com/Rosemount.
5  **Product certifications**

Rev: 0.1

5.1 **European Directive Information**

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

5.2 **Ordinary Location Certification**

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

5.3 **North America**

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

5.4 **USA**

5.4.1 **E5 USA Explosionproof, Non-Incendive, Dust-Ignitionproof**

**Certificate:** [XP & DIP]: 3006278; [NI]: 3008880 & 3044581

**Markings:** XP CL I, DIV 1, GP B, C, D; DIP CL II / III, DIV 1, GP E, F, G; T5 (–50 °C ≤ T_a ≤ +85 °C); Type 4X; IP66; See I5 description for Non-Incendive markings

Markings:  CL I/II/III, DIV 1, GP B, C, D, E, F, G

See I6 description for Intrinsic Safety and Division 2 markings
5.6  Europe

5.6.1  E1 ATEX Flameproof

**Certificate:**  FM12ATEX0065X  
**Markings:**  II 2 G Ex db IIC T6...T1 Gb, T6(−50 °C ≤ Ta ≤ +40 °C), T5...T1(−50 °C ≤ Ta ≤ +60 °C)  

See Table 5-1 for process temperatures.

**Special Conditions for Safe Use (X):**

1. See certificate for ambient temperature range.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than 4 joules.
4. Flameproof joints are not intended for repair.
5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option “N”.
6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 130 °C.
7. Non-Standard Paint options may cause risk from electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

5.6.2  I1 ATEX Intrinsic Safety

**Certificate:**  [Headmount HART]: Baseefa12ATEX0101X  
[Headmount Fieldbus/PROFIBUS]: Baseefa03ATEX0499X  
[Railmount HART]: BAS00ATEX1033X  

**Standards:**  EN IEC 60079-0: 2018, EN 60079-11: 2012  
**Markings:**  [HART]: ⅡⅠ G Ex ia IIC T6...T4 Ga; [Fieldbus/PROFIBUS]: ⅡⅠ G Ex ia IIC T4 Ga  

See Table 5-5 for Entity Parameters and Temperature Classifications.
**Special Conditions for Safe Use (X):**

1. The equipment must be installed in an enclosure which affords it a degree of protection of at least IP20 in accordance with the requirements of IEC 60529. Non-metallic enclosures must have a surface resistance of less than 1G Ω; light alloy or zirconium enclosures must be protected from impact and friction when installed in a Zone 0 environment.

2. When fitted with the Transient Protector Assembly, the equipment is not capable of withstanding the 500 V test as defined in Clause 6.3.13 of EN 60079-11:2012. This must be taken into account during installation.

5.6.3 N1 ATEX Type n – with enclosure

**Certificate:** BAS00ATEX3145  
**Standards:** EN 60079-0: 2012+A11: 2013, EN 60079-15: 2010  
**Markings:** Ex II 3 G Ex nA IIC T5 Gc (−40 °C ≤ T_a ≤ +70 °C)

5.6.4 NC ATEX Type n – without enclosure

**Certificate:**  
[Headmount Fieldbus/PROFIBUS, Railmount HART]: Baseefa13ATEX0093X  
[Headmount HART]: Baseefa12ATEX0102U

**Markings:**  
Ex nA IIC T5 Gc (−40 °C ≤ T_a ≤ +70 °C)
5.7.4 NG IECEx Type n – without enclosure

**Certificate:**  [Headmount Fieldbus/PROFIBUS, Railmount HART]: IECEx BAS 13.0053X  
[Headmount HART]: IECEx BAS 12.0070U  

**Standards:**  IEC 60079-0: 2017, IEC 60079-15: 2010

**Markings:**  [Headmount Fieldbus/PROFIBUS, Railmount HART]: Ex nA IIC T5 Gc (–40 °C ≤ Tₐ ≤ +70 °C)  
[Headmount HART]: Ex nA IIC T6…T5 Gc; T6(–60 °C ≤ Tₐ ≤ +40 °C); T5(–60 °C ≤ Tₐ ≤ +85 °C)

**Special Conditions for Safe Use (X):**

1. The Rosemount 644 Temperature Transmitter must be installed in a suitably certified enclosure such that it is afforded a degree of protection of at least IP54 in accordance with IEC 60529 and IEC 60079-15.

2. When fitted with the Transient Protector Assembly, the equipment is not capable of withstanding the 500 V test. This must be taken into account during installation.

5.7.5 NK IECEx Dust

**Certificate:**  IECEx FMG 12.0022X

**Standards:**  IEC 60079-0: 2011, IEC 60079-31: 2013

**Markings:**  Ex tb IIIC T130 °C Db, (–40 °C ≤ Tₐ ≤ +70 °C); IP66

See Table 5-1 for process temperatures

**Special Conditions for Safe Use (X):**

1. See certificate for ambient temperature range.

2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.

3. Guard the LCD display cover against impact energies greater than 4 joules.

4. Flameproof joints are not intended for repair.

5. A suitable certified Ex d or Ex tb enclosure is required to be connected to temperature probes with Enclosure option “N”.

6. Care shall be taken by the end user to ensure that the external surface temperature on the equipment and the neck of DIN Style Sensor probe does not exceed 130 °C.
7. Non-Standard Paint options may cause risk from electrostatic discharge. Avoid installations that cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

5.8 Brazil

5.8.1 E2 INMETRO Flameproof and Dust

**Certificate:** UL-BR 13.0535X

**Standards:** ABNT NBR IEC 60079-0:2013, ABNT NBR IEC 60079-1:2016, ABNT NBR IEC 60079-31:2014

**Markings:** Ex db IIC T6...T1 Gb; T6...T1: (−50 °C ≤ T_a ≤ +40 °C), T5...T1: (−50 °C ≤ T_a ≤ +60 °C) Ex tb IIIC T130 °C; IP66; (−40 °C ≤ T_a ≤ +70 °C)

**Special Conditions for Safe Use (X):**

1. See product description for ambient temperature limits and process temperature limits.
2. The non-metallic label may store an electrostatic charge and become a source of ignition in Group III environments.
3. Guard the LCD display cover against impact energies greater than 4 joules.
4. Consult the manufacturer if dimensional information on the flameproof joints is necessary.

5.8.2 I2 INMETRO Intrinsic Safety

**Certificate:** [Fieldbus]: UL-BR 15.0264X [HART]: UL-BR 14.0670X

**Standards:** ABNT NBR IEC 60079-0:2008 + Corrigendum 1:2011, ABNT NBR IEC 60079-11:2011

**Markings:** [Fieldbus]: Ex ia IIC T* Ga (−60 °C ≤ T_a ≤ +** °C) [HART]: Ex ia IIC T* Ga (−60 °C ≤ T_a ≤ +** °C)

See Table 5-5 for Entity Parameters and Temperature Classifications.

**Special Conditions for Safe Use (X):**

1. The apparatus must be installed in an enclosure which affords it a degree of protection of at least IP20.
2. Non-metallic enclosures must have a surface resistance of less than 1 GΩ; light alloy or zirconium enclosures must be protected from impact and friction when installed in a zone 0 environment.
3. When fitted with the Transient Protector Assembly, the equipment is not capable of withstanding the 500 V test as defined on ABNT NBR IEC 60079-11. This must be taken into account during installation.

4. The ingress protection degree IP66 is provided only for the Rosemount 644 Field Mount Assembly which is formed by installing an Enhanced Model 644 Temperature Transmitter within a dual-compartment enclosure Plantweb enclosure.

5.9 China

5.9.1 E3 China Flameproof

Certificate: GYJ16.1192X

Standards: GB3836.1-2010, GB3836.2-2010, GB12476.1-2013, GB12476.5-2013

Markings: Ex d IIC T6...T1; Ex tD A21 T130 °C; IP66

产品安全使用特定条件

产品防爆合格证后缀“X”代表产品安全使用有特定条件：

1. 涉及隔爆接合面的维修须联系产品制造商。

2. 产品铭牌材质为非金属，使用时须防止产生静电火花，只能用湿布清理。

3. 产品使用环境温度与温度组别的关系为:

<table>
<thead>
<tr>
<th>防爆标志</th>
<th>温度组别</th>
<th>环境温度</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ex d IIC T6~T1 Gb</td>
<td>T6~T1</td>
<td>-50 °C ≤ T ≤ +40 °C</td>
</tr>
<tr>
<td></td>
<td>T5~T1</td>
<td>-50 °C ≤ T ≤ +60 °C</td>
</tr>
<tr>
<td>Ex Td A21 IP66 T130 °C</td>
<td>N/A</td>
<td>-40 °C ≤ T ≤ +70 °C</td>
</tr>
</tbody>
</table>

4. 产品外壳设有接地端子，用户在安装使用时应可靠接地。

5. 现场安装时，电缆引入口须选用国家指定的防爆检验机构按检验认可、具有 Ex dIIIC, Ex tD A21 IP66 防爆等级的电缆引入装置或堵封件，冗余电缆引入口须用堵封件有效密封。

6. 用于爆炸性气体环境中，现场安装、使用和维护必须严格遵守“断电后开盖！”的警告语。用于爆炸性粉尘环境中，现场安装、使用、和维护必须严格遵守“爆炸性粉尘场所严禁开盖！”的警告语。

7. 用于爆炸性粉尘环境中，产品外壳表面须保持清洁，以防粉尘堆积，严禁用压缩空气吹扫。

5.9.2 I3 China Intrinsic Safety

Certificate: GYJ16.1191X
Standards: GB3836.1-2010, GB3836.4-2010, GB3836.20-2010
Markings: Ex ia IIC T4~T6 Ga

产品安全使用特殊条件

防爆合格证号后缀“X”代表产品安全使用有特定条件:

1. 温度变送器须安装于外壳防护等级不低于国家标准 GB/T4208-2017 规定的 IP20 的壳体中，方可用于爆炸性危险场所，金属壳体须符合国家标准 GB3836.1-2010 第 8 条的规定，非金属壳体须符合 GB3836.1-2010 第 7.4 条的规定。

2. 非金属外壳表面电阻必须小于 1GΩ，轻金属或者锆外壳在安装时必须防止冲击和摩擦。

3. 当 Transmitter Type 为 F、D 时，产品外壳含有轻金属，用于 0 区时需注意防止由于冲击或摩擦产生的点燃危险。

4. 产品选用瞬态保护端子板（选项代码为 T1）时，此设备不能承受 GB3836.4-2010 标准中第 6.3.12 条规定的 500V 交流有效值试验电压的介电强度试验。

产品使用注意事项

1. 产品环境温度为:
   当 Options 不选择 Enhanced Performance 时

<table>
<thead>

注：本电气参数符合 GB3836.19-2010 对 FISCO 现场仪表的参数要求。

3. 该产品必须与已通过防爆认证的关联设备配套共同组成安防爆系统方可用于爆炸性气体环境。其系统接线必须同时遵守本产品和所配关联设备的使用说明书要求，接线端子不得接错。

4. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。

5.9.3 N3 China Type n

**Certificate:**  GYJ15.1502

**Standards:**  GB3836.1-2010, GB3836.8-2014

**Markings:**  Ex nA IIC T5/T6 Gc

**产品安全使用特殊条件**

1. 产品温度组别和使用环境温度范围之间的关系为：

当 Options 不选择 Enhanced Performance 时：

<table>
<thead>
<tr>
<th>温度组别</th>
<th>环境温度</th>
</tr>
</thead>
<tbody>
<tr>
<td>T5</td>
<td>$-40 ^\circ C \leq T_a \leq +70 ^\circ C$</td>
</tr>
</tbody>
</table>
当 Options 选择 Enhanced Performance 时:

<table>
<thead>
<tr>
<th>温度组别</th>
<th>环境温度</th>
</tr>
</thead>
<tbody>
<tr>
<td>T6</td>
<td>(-60 ^\circ \text{C} \leq T_a \leq +40 ^\circ \text{C})</td>
</tr>
<tr>
<td>T5</td>
<td>(-60 ^\circ \text{C} \leq T_a \leq +85 ^\circ \text{C})</td>
</tr>
</tbody>
</table>

2. 最高工作电压: 45Vdc

3. 现场安装时，电缆引入口须选用经国家指定的防爆检验机构检验认可、具有 Ex e IIC Gb 防爆等级的电缆引入装置或堵封件，冗余电缆引入口须用封堵件有效密封。电缆引装置或封堵件的安装使用必须遵守其使用说明书的要求并保证外壳防护等级达到 IP54（符合 GB/T4208-2017 标准要求）以上。

4. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。

5.15 Declaration of Conformity

EU Declaration of Conformity
No: RMD 1016 Rev. Y

We,

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

declare under our sole responsibility that the product,

**Rosemount**™ **644 Temperature Transmitter**

manufactured by,

Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

to which this declaration relates, is in conformity with the provisions of the European Union Directives, including the latest amendments, as shown in the attached schedule.

Assumption of conformity is based on the application of the harmonized standards and, when applicable or required, a European Union notified body certification, as shown in the attached schedule.

Ex ia IIC T6...T4 Ga
Harmonized Standards
EN IEC60079-0:2018, EN 60079-11:2012

Basefa12ATEX0102U – Type n Certificate; no enclosure option
Equipment Group II, Category 3 G
Ex nA IIC T6...T5 Gc
Harmonized Standards

Rossumount 644 Head Mount Temperature Transmitter (Fieldbus Output)

Basefa03ATEX0499X – Intrinsic Safety Certificate
Equipment Group II, Category 1 G
Ex ia IIC T4 Ga
Harmonized Standards
EN IEC60079-0:2018, EN 60079-11:2012

Basefa13ATEX0093X – Type n Certificate; no enclosure option
Equipment Group II, Category 3 G
Ex nA IIC T5 Gc
Harmonized Standards
EU Declaration of Conformity
No: RMD 1016 Rev. Y

Rosemount 644 Head/Field Mount Temperature Transmitter
(All output protocols)

FM12ATEX0065X – Flameproof Certificate
Equipment Group II, Category 2 G
Ex db IIC T6...T1 Gb
Harmonized Standards

FM12ATEX0065X – Dust Certificate
Equipment Group II, Category 2 D
Ex tb IIC T130°C Db
Harmonized Standards

BAS00ATEX3145 – Type n Certificate
Equipment Group II, Category 3 G
Ex nA IIC T5 Gc
Harmonized Standards

Rosemount 644R Rail Mount Temperature Transmitters
(HART Output)

BAS00ATEX1033X – Intrinsic Safety Certificate
Equipment Group II, Category 1 G
Ex ia IIC T6...T4 Ga
Harmonized Standards
EN IEC 60079-0:2010, EN 60079-11:2012

Baseefa1ATEX0093X – Type n Certificate
Equipment Group II, Category 3 G
Ex nA IIC T5 Gc
Harmonized Standards
EN IEC 60079-0:2010, EN 60079-15:2010

RoHS Directive (2011/65/EU)
644 HART Head Mount
Harmonized Standard EN 50581:2012
EU Declaration of Conformity
No: RMD 1016 Rev. Y

本表格系依据 SJ/T 11364 的规定而制作。
This table is proposed in accordance with the provision of SJ/T 11364.

O: 意为该部件的所有均质材料中该有害物质的含量均低于 GB/T 26572 所规定的限量要求。
O: Indicate that said hazardous substance in all of the homogeneous materials for this part is below the limit requirement of GB/T 26572.

X: 意为该部件所使用的均质材料中至少有一类均质材料中该有害物质的含量高于 GB/T 26572 所规定的限量要求。
X: Indicate that said hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.
