1 About this guide

This guide provides basic guidelines for the Rosemount™ 848T Temperature Transmitter. It does not provide instructions for detailed configuration, diagnostics, maintenance, service, troubleshooting. Refer to the Rosemount 848T Reference Manual for more instruction. The manual and this guide are also available electronically on Emerson.com/Rosemount

⚠️ WARNING

Explosions could result in death or serious injury.

Installation of this transmitter in an explosive environment must be in accordance with the appropriate local, national, and international standards, codes, and practices. Review the approvals section of this manual for any restrictions associated with a safe installation.

- Before connecting a Field Communicator in an explosive atmosphere, make sure the instruments in the loop are installed in accordance with intrinsically safe or non-incendive field wiring practices.

Electrical shock can result in death or serious injury.

- Avoid contact with the leads and terminals. High voltage that may be present on leads can cause electrical shock.

Physical access

- Unauthorized personnel may potentially cause significant damage to and/or misconfiguration of end users’ equipment. This could be intentional or unintentional and needs to be protected against.

- Physical security is an important part of any security program and fundamental to protecting your system. Restrict physical access by unauthorized personnel to protect end users’ assets. This is true for all systems used within the facility.

⚠️ CAUTION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions:

- This device may not cause harmful interference.

- This device must accept any interference received, including interference that may cause undesired operation.

- This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.
NOTICE

Battery hazards remain when cells are discharged.

The power module may be replaced in a hazardous area. The power module has surface resistivity greater than one gigaohm and must be properly installed in the wireless device enclosure. Care must be taken during transportation to and from the point of installation to prevent electrostatic charge build-up.

Shipping considerations for wireless products.

- The unit was shipped to you without the power module installed. Remove the power module prior to shipping.

- Each power module contains two “C” size primary lithium batteries. Primary lithium batteries are regulated in transportation by the U. S. Department of Transportation, and are also covered by IATA (International Air Transport Association), ICAO (International Civil Aviation Organization), and ARD (European Ground Transportation of Dangerous Goods). It is the responsibility of the shipper to ensure compliance with these or any other local requirements. Consult current regulations and requirements before shipping.
2 Mount the transmitter

2.1 Mount to a DIN rail without a junction box

Procedure

1. Pull up the DIN rail mounting clip located on the top back side of the transmitter.
2. Hinge the DIN rail into the slots on the bottom of the transmitter.
3. Tilt the Rosemount™ 848T and place onto the DIN rail.
4. Release the mounting clip.

Figure 2-1: Mounting the Rosemount 848T to a DIN Rail

A. Rosemount 848T without installed enclosure
B. DIN rail
C. DIN rail mounting clip
2.2 Mount to a panel with a junction box

Figure 2-2: Aluminum/Plastic Junction Box

Figure 2-3: Stainless Steel Junction Box

A. Stainless steel junction box
B. Mounting screws (2)
C. Panel

(1) Mount using four \( \frac{1}{4} \)-20 x 1.25-in. screws.
2.3 Mount to a 2-in. pipe stand

Prerequisites

Use the optional mounting bracket (option code B6) to attach the Rosemount™ 848T to a 2-in. pipe stand when using a junction box.

3 Wire and apply power

3.1 Using cable glands

![Figure 3-1: Cable Gland](image)

A. Sensor 1  
B. Sensor 2  
C. Sensor 3  
D. Sensor 4  
E. Sensor 5  
F. Sensor 6  
G. Sensor 7  
H. Sensor 8  
I. Power/signal  
J. Cover screw

**Procedure**

1. Remove the four cover screws to remove the junction box cover.
2. Run the sensor and power/signal wires through the appropriate pre-installed cable glands.
3. Install the sensor wires into the correct screw terminals.
4. Attach the FOUNDATION™ Fieldbus wires to the screw terminals.
5. Replace the FOUNDATION Fieldbus cover and tighten all cover screws.
3.2 Using conduit entries

**Figure 3-2: Conduit Entries**

A. Sensor 1 and 2  
B. Sensor 3 and 4  
C. Sensor 5 and 6  
D. Sensor 7 and 8  
E. Power/signal  
F. Cover screw

**Procedure**

1. Unscrew the four cover screws to remove the junction box cover.  
2. Remove the five conduit plugs and install the user-supplied conduit fittings.  
3. Run pairs of sensor wires through each conduit fitting.  
4. Install the sensor wires into the correct screw terminals.  
5. Attach the FOUNDATION™ Fieldbus wires to the screw terminals.  
6. Replace the enclosure cover and tighten all cover screws.

3.3 Sensor wiring and power supply

- Compatible with eight independently configurable channels including combinations of 2- and 3-wire RTDs, thermocouples, mV, ohm, and mA sensors.
- All sensor and power terminals are rated to 42.4 Vdc.
- FOUNDATION Fieldbus network powered with a terminal voltage of 9.0–32.0 Vdc and 22 mA maximum current draw.
- For best network performance twisted, shielded pair cabling should be used. Proper gage wire should be selected to maintain the 9.0 Vdc minimum.
Figure 3-3: Sensor Wiring Diagrams

2-wire RTD and Ohms

3-wire RTD and Ohms\(^{(1)}\)

Thermocouples/Ohms and millivolts

2-Wire RTD with compensation loop\(^{(2)}\)

\(^{(1)}\) Emerson provides 4-wire sensors for all single-element RTDs. Use these RTDs in 3-wire configurations by clipping the fourth lead or leaving it disconnected and insulated with electrical tape.

\(^{(2)}\) The transmitter must be configured for a 3-wire RTD in order to recognize an RTD with a compensation loop.

The wiring of 3-wire RTDs for this unit is different than some earlier Rosemount™ 848T models. Pay careful attention to the wiring diagram on the label, especially if this unit is replacing an older unit.
3.4  Wiring analog inputs

Figure 3-4: Rosemount™ 848T Analog Input Wiring Diagram

A. Analog input connectors  
B. Analog transmitters  
C. Power supply

3.5  Typical configuration for FOUNDATION Fieldbus networking

Note
Each segment in a FOUNDATION™ Fieldbus trunk must be terminated at both ends.
A. 6234 ft. (1900 m) max (depending upon cable characteristics)
B. Integrated power conditioner and filter
C. Terminators
D. Trunk
E. Sput
F. Signal wiring

3.5.1 Ground the transmitter
Proper ground is crucial to reliable temperature readings.

3.5.2 Ungrounded thermocouple, mV, and RTD/Ohm inputs
Option 1

Procedure

1. Connect FOUNDATION™ Fieldbus signal wiring shield to the sensor wiring shield(s).
2. Ensure the shields are tied together and electrically isolated from the transmitter enclosure.
3. Only ground the shield at the power supply end.
4. Ensure that the sensor shield(s) is electrically isolated from the surrounding grounded fixtures.
Option 2

Procedure

1. Connect sensor wiring shield(s) to the transmitter enclosure (only if the enclosure is grounded).
2. Ensure the sensor shield(s) is electrically isolated from surrounding fixtures that may be grounded.
3. Ground **FOUNDATION™** Fieldbus signal wiring shield at the power supply end.

3.5.3 Grounded thermocouple inputs

Procedure

1. Ground sensor wiring shield(s) at the sensor.
2. Ensure the sensor wiring and **FOUNDATION™** Fieldbus signal wiring shields are electrically isolated from the transmitter enclosure.
3. Do not connect the **FOUNDATION** Fieldbus signal wiring shield to the sensor wiring shield(s).
4. Ground FOUNDATION Fieldbus signal wiring shield at the power supply end.

3.6 Analog device inputs

Procedure

1. Ground analog signal wire at the power supply of the analog devices.
2. Ensure the analog signal wire and the FOUNDATION™ Fieldbus signal wire shields are electrically isolated from the transmitter enclosure.
3. Do not connect the analog signal wire shield to the FOUNDATION Fieldbus signal wire shield.

3.6.1 Transmitter enclosure (optional)

Ground in accordance with local electrical requirements.
4 Verify the tag

The Rosemount 848T has a removable commissioning tag that contains both the Device ID (the unique code that identifies a particular device in the absence of a device tag) and a space to record the device tag (the operational identification for the device as defined by the Piping and Instrumentation Diagram [P&ID]).

When commissioning more than one device on a FOUNDATION™ Fieldbus segment, it can be difficult to identify which device is at a particular location. The removable tag aids in this process by linking the Device ID to physical location. The installer should note the physical location of the transmitter on both the upper and lower location of the commissioning tag. The bottom portion should be torn off for each device on the segment and used for commissioning the segment in the control system.
5 Verify the transmitter configuration

Each FOUNDATION™ Fieldbus host or configuration tool has a different way of displaying and performing configurations. Some use Device Descriptions (DD) or DD wizards for configuration and to display data consistently across platforms. There is no requirement that a host or configuration tool support these features.

The following is the minimum configuration requirement for a temperature measurement. This guide is designed for systems not using DD wizards. For a complete list of parameters and configuration information refer to the Rosemount™ 848T Reference Manual.
6  Product certifications

Rev 2.12

European Directive Information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary Location Certification from FM Approvals

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by FM Approvals, a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

North America

The US National Electrical Code™ (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

6.1  U.S.A

6.1.1  I5 FM Intrinsically Safe and Nonincendive

Certificate  3011568

Markings  IS CL I, DIV 1, GP A, B, C, D; T4(−50 °C ≤ T_a ≤ +60 °C); NI CL I, DIV 2, GP A, B, C, D; T4A(−50 °C ≤ T_a ≤ +85 °C); T5(−50 °C ≤ T_a ≤ +70 °C) when installed per Rosemount™ drawing 00848-4404.

Note

Transmitters marked with Nonincendive CL I, DV 2 can be installed in Division 2 locations using general Division 2 wiring methods or Nonincendive Field Wiring (NIFW). See Drawing 00848-4404.

6.1.2  IE FM FISCO

Certificate  3011568
Standards  

Markings  
IS CL I, DIV 1, GP A, B, C, D; T4(−50 °C ≤ Ta ≤ +60 °C); NI CL I, DIV 2, GP A, B, C, D; T4A(−50 °C ≤ Ta ≤ +85 °C); T5(−50 °C ≤ Ta ≤ +70 °C) when installed per Rosemount™ drawing 00848-4404.

6.1.3 N5 Nonincendive and Dust-Ignitionproof

Certificate 3011568

Markings NI CL I, DIV 2, GP A, B, C, D; DIP CL II/III, DIV 1, GP E, F, G; T4A(−50 °C ≤ Ta ≤ +85 °C); T5(−50 °C ≤ Ta ≤ +70 °C) when installed per Rosemount™ drawing 00848-4404; Type 4X

6.1.4 NK Nonincendive

Certificate 3011568

Markings NI CL I, DIV 2, GP A, B, C, D; T4A(−50 °C ≤ Ta ≤ +85 °C); T5(−50 °C ≤ Ta ≤ +70 °C) when installed per Rosemount™ drawing 00848-4404

Note
Only the N5 and NK are valid with the S002 option.

6.6 China

6.6.1 I3 NEPSI Intrinsic Safety

**Certificate**  GYJ16.1205X

**Standards**  GB3836.1-2010, GB3836.4-2010, GB3836.20-2010

**Markings**  Ex ia IIC T4/T5 Ga
产品安全使用特殊条件:

产品防爆合格证后缀“X”代表产品安全使用有特殊条件。

输出为 FOUNDATION Fieldbus 时：

1. 温度变送器须安装于外壳防护等级不低于国家标准 GB4208-2008 规定的 IP20 的壳体中，方可用于爆炸性危险场所，金属壳体须符合国家标准 GB3836.1-2010 第 8 条的规定，非金属壳体须符合 GB3836.1-2010 第 7.4 条的规定。

2. 此设备不能承受 GB3836.4-2010 标准中第 6.3.12 条规定的 500V 交流有效值试验电压的介电强度试验。

输出为 Wireless 时：

1. 天线的表面电阻大于 1 GΩ，不允许用溶剂清洗或用干布擦拭，以避免电荷积累。

2. 电源模块表面电阻大于 1 GΩ，必须置于无线设备外壳内使用，现场安装及运输过程中避免电荷积累。

3. 产品需使用厂家提供的由 2 块 Tadiran TL-5920 Lithium Thionyl-Chloride 原电池组成的电池组。

产品使用注意事项：

1. 产品环境温度为：

<table>
<thead>

注 1：上表中非 FISCO 参数必须来自于使用电阻限流的线性输出。
注 2：本安电气参数符合 GB3836.19-2010 对 FISCO 现场仪表的参数要求。当其连接符合 FISCO 模型的电路板时，其本安参数及内部最大等效参数见上表。

传感器端：
输出代码 | 端子 | 最高输出电压 | 最大输出电流 | 最大输出功率 | 最大外部等效参数
---|---|---|---|---|---
 |  | $U_o \, (V)$ | $I_o \, (mA)$ | $P_o \, (mW)$ | $C_o \, (\mu H)$ | $L_o \, (H)$
F | 1-8 | 12.5 | 4.8 | 15 | 1.2 | 1
F (FISCO) | 1-20 | 6.6 | 3.2 | 5.3 | 22 | 1

3. 输出代码为 F 时，该产品必须与已通过防爆认证的关联设备配套共同组成安防爆系统方可使用于爆炸性气体环境。其系统接线必须同时遵守本产品和所配关联设备的使用说明书要求，接线端子不得接错。

4. 该产品于关联设备的连接电缆应为带绝缘护套的屏蔽电缆，其屏蔽层应为安全接地。

5. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。产品的安装、使用和维护应同时遵守产品使用说明书、GB3836.13-2013“爆炸性环境 第 13 部分：设备的修理、检修、修复和改造”、GB3836.15-2000“爆炸性气体环境用电气设备 第 15 部分：危险场所电气安装（煤矿除外）”、GB3836.16-2006“爆炸性气体环境用电气设备 第 16 部分：电气装置的检查和维护（煤矿除外）”、GB3836.18-2010“爆炸性环境 第 18 部分：本质安全系统”和 GB50257-2014“电气装置安装工程爆炸和火灾危险环境电力装置施工及验收规范”的有关规定。

6.6.2 N3 NEPSI Type n

**Certificate**
GYJ17.1008U

**Standards**
GB3836.1-2010, GB3836.8-2014

**Markings**
Ex nA nL IIC T4/T5 Gc

产品安全使用特殊条件：

1. 设备不能承受 GB3836.8-2014 标准中第 6.5.1 条规定的 500V 耐压试验，安装时必须考虑在内。

2. 此设备必须安装于具有不低于 IP54 外壳防护等级的 Ex 元件外壳，外壳应符合 GB3836.1-2010 和 GB3836.8-2014 标准中对外壳材料和环境的相关要求。

3. 在此设备外部应采取措施以防触到电压因瞬态干扰而超过 40%。

产品使用注意事项：

1. 产品使用环境温度范围：
<table>

<td>-50 °C ≤ $T_a$ ≤ +70 °C</td>
</tr>
</tbody>
</table>

2. 最高工作电压：42.4V。

3. 用户不得自行更换该产品的零部件，应会同产品制造商共同解决运行中出现的故障，以杜绝损坏现象的发生。

7 Declaration of conformity

EU Declaration of Conformity
No: RMD 1047 Rev. M

We,
Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

declare under our sole responsibility that the product,

Rosemount™ Model 848T Temperature Transmitter

manufactured by,
Rosemount, Inc.
8200 Market Boulevard
Chanhassen, MN 55317-9685
USA

to which this declaration relates, is in conformity with the provisions of the European Union Directives, including the latest amendments, as shown in the attached schedule.

Assumption of conformity is based on the application of the harmonized standards and, when applicable or required, a European Union notified body certification, as shown in the attached schedule.

This table is proposed in accordance with the provision of SJ/T11364.

O: Indicate that said hazardous substance in all of the homogeneous materials for this part is below the limit requirement of GB/T 26572.

X: Indicate that said hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

本表格系依据 SJ/T11364 的规定而制定。

O: 意为该部件的所有均质材料中该有害物质的含量均低于 GB/T 26572 所规定的限量要求。

X: 意为该部件所使用的所有均质材料中，至少有一类均质材料中该有害物质的含量高于 GB/T 26572 所规定的限量要求。
