

# PROJECT BEYOND

## ENTERPRISE OPERATIONS PLATFORM (EOP)

A software-defined OT-ready digital platform

### SCALABLE COMPUTING POWER

Computing environment integrating on-premise, edge and cloud.

### SECURE NETWORKING

Infrastructure to connect different OT assets in IT environments.

### UNIFIED DATAOPS

AspenTech Inmation Software to provide a single source of contextualized data.

### APP CATALOG

Built for agility – orchestrated deployment and scaled buildouts of existing and new, innovative apps.

### AI ORCHESTRATION

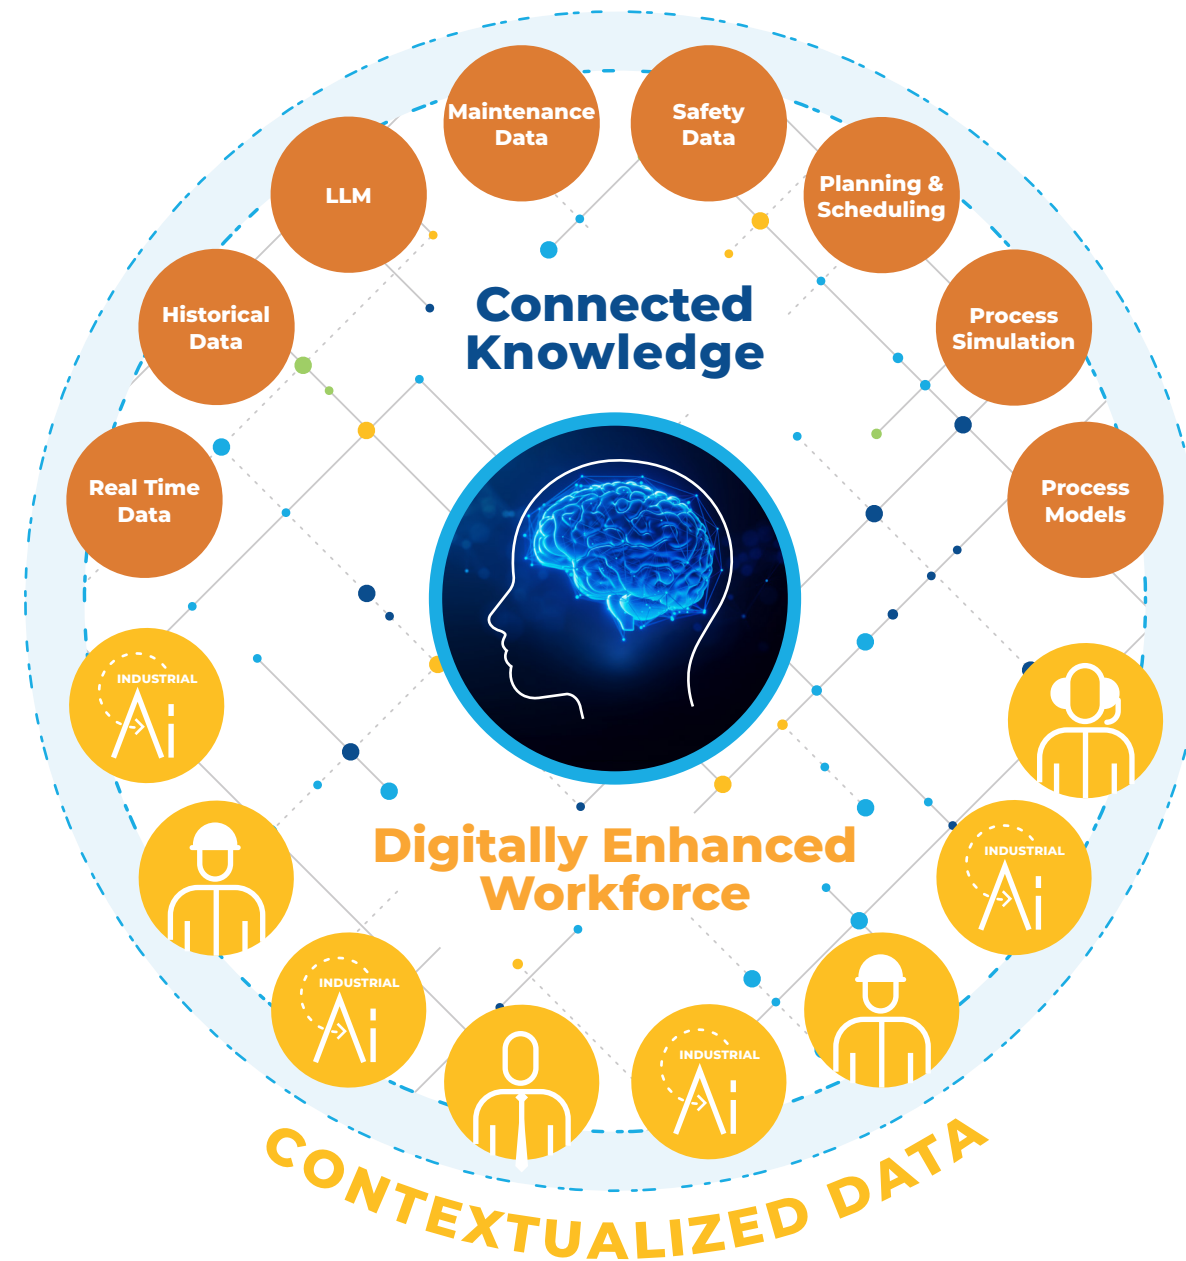

Facilitate simple, optimized, unlimited integration of AI Agents.

### ZERO-TRUST SECURITY

## DIGITAL INTELLIGENCE

Unlocking deep analytics through connected data

## OPTIMIZED AUTONOMOUS OPERATIONS

Going beyond to deliver breakthrough performance

*Project Beyond allows you to reach your **digital transformation goals** by evolving*

- Siloed system architectures > Cohesive software platform
- Data islands > Unifying data fabric
- Cybersecurity defense in depth > Inherently secure by design
- Hardware defined > Software defined
- Single site focus > Enterprise operations
- Local operation > Operations anywhere
