

Executive Bio

Claudio Fayad

Vice President of Technology

Claudio Fayad is currently vice president of technology of Emerson's process systems and solutions business. In this role since August 2016, Fayad is responsible for product strategy and development of mission-critical platforms. He actively works with customers and stakeholders across the organization to develop innovative digital initiatives and extend DeltaV into a broader digital ecosystem.

Fayad's 27 years in the Automations Solutions business include previous roles in engineering, sales, project execution, project management, business management, product marketing and technology, participating in many projects around the world.

Fayad has a passion for bringing people together to drive results through change, engagement and diversity.

Originally from Brazil, Fayad attained his electrical engineering degree from UNICAMP (Campinas University) University with a major in process control. He earned his executive MBA degree from Fundação Dom Cabral and is also a graduate of the post-MBA executive program from Kellogg.
